

PART I Basic Science and Clinical Use of Neuromodulators

- 1 Update on Noncosmetic Uses of Botulinum Neurotoxins
- 2 History of Cosmetic Botulinum Toxin
- 3 Pharmacology of BOTOX® Cosmetic
- 4 Abobotulinum Toxin A: Science and Clinical Usage
- 5 Basic Science: Xeomin
- 6 Prabotulinum Toxin A
- 7 Basic Science: Myobloc®
- 8 Basic Science of Botulinum Toxin E
- 9 Neuronox®, Innotox®, and Coretox®
- 10 DaxibotulinumtoxinA for Injection (DAXI)
- 11 Comparison of Botulinum Toxins
- 12 Topical Botulinum Toxin Type A
- 13 Reconstitution and Dilution
- 14 Benzyl Alcohol

PART II Neuromodulator Injection Sites

- 15 Treatment of Glabellar Lines With Neuromodulators
- 16 Treatment of Frontalis and Horizontal Forehead Lines With Neuromodulators
- 17 Shaping the Eyebrow and Upper Face (Palpebral Aperture) With Neuromodulators
- 18 Treatment of Crow's Feet
- 19 Treatment of Infraorbital/Upper and Lower Eyelids With Neuromodulators
- 20 Treatment of the Midface With Botulinum Toxin
- 21 Treatment of Orbicularis Oris, Mentalis, Depressor Anguli Oris With Neuromodulators
- 22 Platysma, Nefertiti Lift, and Beyond
- 23 The Masseters: Hypertrophy, Bruxism, and Facial Shaping With Botulinum Toxin
- 24 Treatment of Darker Skin Types with Neuromodulators
- 25 Combination Noninvasive Facial Aesthetic Treatments With Botulinum Toxin Type A
