Preface	ix	4 Focal EEG abnormalities	104
Acknowledgments	xi	4.1 Focal EEG abnormalities	104
1 EEG basics	1	4.2 EEG changes in ischemia	105
1.1 Electrode nomenclature, polarity and montages	1	4.3 Breach effect	106
1.2 Normal EEG: awake and asleep	9	Suggested reading	107
Suggested reading	11	Figures 4.1–4.17	108
Figures 1.7–1.17	13	5 Rhythmic and periodic patterns	133
2 Practical approach to critical care EEG and its classification	36	5.1 Main term 1 (location)	133
2.1 Basic approach	36	5.2 Main term 2 (pattern type)	134
2.2 Classification using the ACNS Standardized Critical		5.3 Major and minor modifiers (including <i>plus</i>	
Care EEG Terminology: 2021 version	38	modifiers)	136
Suggested reading	39	5.4 Stimulus-induced rhythmic, periodic or ictal discharges	
Figures 2.1–2.6	40	(SIRPIDs)	136
3 Encephalopathy and coma	49	5.5 Brief potentially Ictal Rhythmic Discharges (BIRDs)	136
3.1 Nonspecific patterns of encephalopathy	49	Suggested reading	139
3.2 Grading of encephalopathy	49	Figures 5.1–5.48	140
3.3 Findings in specific medical conditions	51	6 Seizures, status epilepticus and the ictal-interictal continuum	215
3.4 Medication effects	52	6.1 Electrographic and Electroclinical seizures	215
Suggested reading	54	6.2 Status epilepticus	216
Figures 3.1–3.31	56	6.3 Ictal-interictal continuum (IIC)	217
		6.4 Rapid EEG	217
		Suggested reading	218
		Figures 6.1–6.29	220

7	Artifacts that can mimic seizures or other physiologic patterns	312	10	Quantitative EEG: special applications and multimodal monitoring	498
	Suggested reading	316	10.1	Delayed ischemia detection	498
	Figures 7.1–7.28	317	10.2	Quantitative thresholds and alarms	498
8	Post cardiac arrest patterns	364	10.3	Multimodal monitoring, including intracranial EEG	499
8.1	Myoclonic status epilepticus	364		Suggested reading	500
8.2	Prognostication	364		Figures 10.1–10.19	502
	Suggested reading	366		ACNS standardized critical care EEG terminology 2021	
	Figures 8.1–8.15	368		(condensed version)	544
9	Quantitative EEG: basics, seizure detection and avoiding pitfalls	411		A. Background EEG	544
9.1	Spectrogram basics	412		B. Sporadic Epileptiform Discharges	545
9.2	Quantitative EEG: basics	412		C. Rhythmic or Periodic Patterns (RPPs)	545
9.3	Quantitative EEG: detection of seizures and rhythmic and periodic patterns	412		Main Terms	545
9.4	Quantitative EEG: pitfalls and solutions	413		Major Modifiers	546
	Suggested reading	413		D. Electrographic and Electroclinical Seizures	548
	Figures 9.1–9.37	415		E. Brief Potentially Ictal Rhythmic Discharges (BIRDs)	548
				F. Ictal-Interictal Continuum (IIC)	548
			Index		549
