

1. Basic genetics and cytogenetics: a brief reminder Karen Sermon
2. Application of whole-genome technologies to ART Elia Fernandez Gallardo, Thomas Lefevre, Koen Theunis, and Thierry Voet
3. Meiosis: how to get a good start in life Ursula Eichenlaub-Ritter
4. Chromosomes in early human embryo development: incidence of chromosomal abnormalities, underlying mechanisms, and consequences for development Esther B. Baart, Effrosyni Chavli, and Diane Van Opstal
5. DNA is not the whole story: transgenerational epigenesis and imprinting Ashwini Balakrishnan and J. Richard Challiet
6. Genes are not the whole story: retrotransposons as new determinants of male fertility Patricia Fauque and Deborah Bourc'h
7. Chromosomal causes of infertility: the story continues Svetlana A. Yatsenko and Aleksandar Rajkovic
8. Genetics of human male infertility Stephane Viville and Ozlem Okutman
9. Genetics of human female infertility Svetlana A. Yatsenko and Aleksandar Rajkovic
10. Preconception genetics analysis and screening in IVF Juan Jose Guillen and Rita Vassena
11. Genetic counseling in ART Christine De Die-Smulders and Ron van Golde
12. Mitochondrial genetics in reproductive medicine Claudia Spits and Filippo Zambelli
13. Preimplantation genetic diagnosis Jan Traeger-Synodinos and Carmen Rubio Llusa
14. Epigenetics and ART Aafke P. A. van Montfoort
15. Ethical considerations in human reproductive genetics Guido de Vert and Wybo Dondorp.
