

Acknowledgments

Preface

1. Neurons, Glia, and Basic Neuroanatomy
2. Electrical Signaling in Neurons
3. Chemical Neurotransmission and Neuropsychopharmacology
4. Cranium, Spine, Meninges, Ventricles, and Cerebrospinal Fluid
5. Blood Supply of the Brain
6. The Peripheral Nervous System
7. The Spinal Cord
8. The Brainstem
9. The Cerebellum
10. The Diencephalon
11. The Basal Ganglia
12. Limbic Structures
13. The Cerebral Cortex
14. The Occipital Lobes and Visual Processing
15. The Parietal Lobes and Associated Disorders
16. The Temporal Lobes and Associated Disorders
17. The Frontal Lobes and Associated Disorders
18. Stroke and Vascular Cognitive Impairment
19. Epilepsy
20. Traumatic Brain Injury
21. Brain Neoplasms
22. Brain Infections
23. White Matter Disease
24. The Motor System and Motor Disorders
25. Disorders of Consciousness
26. Memory and Amnesia
27. Language and the Aphasias
28. Alexia, Agraphia, and Acalculia
29. Brain Imaging
30. The Neurological Examination
31. Neuropsychological Assessment
