

1. Coagulation overview
 2. Developmental erythropoiesis
 3. Sickle cell syndromes
 4. Intrinsic and extrinsic red blood cell defects
 5. Thalassemias
 6. Nutritional anemia
 7. Granulocytes
 8. Disorders of platelets
 9. Bone marrow failure syndromes
 10. Hematological manifestations of systemic disease
 11. Epidemiology
 12. Principles of chemotherapy
 13. Principles of immunotherapy
 14. Precision medicine and systems biology
 15. Predisposition syndromes
 16. Health equity and disparities in pediatric and adolescent/young adult oncology
 17. Clinical emergencies in children with cancer
 18. Transfusion medicine
 19. Pediatric radiation oncology
 20. Principles of infectious disease and management of febrile neutropenia
 21. Neoplastic hematopathology
 22. Pediatric solid tumors pathology
 23. Molecular pathology
 24. Survivorship and late effects
 25. Integrative therapies
 26. Palliative Care
 27. An overview of the Emotional and educational needs of children with hematological and oncological conditions
 28. Global health issues in pediatric oncology
 29. Principles of pediatric surgical oncology
 30. Acute lymphoblastic leukemia
 31. Acute myeloid leukemia
 32. Chronic myeloid leukemia/other leukemia
 33. Soft tissue sarcomas
 34. Bone tumors
 35. Neuroblastoma
 36. Hepatic tumors
 37. Kidney tumors in children and adolescents
 38. Hodgkin lymphoma in children and adolescents
 39. Non-hodgkin lymphoma in children and adolescents
 40. Neuro-Oncology
 41. Post-Transplant lymphoproliferative disorder (PTLD)
 42. Retinoblastoma
 43. Langerhans Cell Histiocytosis (LCH)
 44. Hemophagocytic lymphohistiocytosis
 45. Principles and practice of pediatric hematopoietic cell transplantation
 46. Autologous hematopoietic stem cell transplantation for children and young adults
 47. Car-T cells: expanding the universe of immunotherapy in children with malignant diseases
 48. Gene therapy for hemoglobinopathies and other diseases
 49. Hematopoietic cell transplantation for malignant disorders
 50. Stem cell transplantation for children with nonmalignant disorders
 51. Complications associated with allogeneic hematopoietic cell transplantation in children
