Preface	vii	
List of Contributors	ix	
UNIT 1		
DIET AND PHYSICAL ACTIVITY AS DETERMINANTS OF HUMAN HEALTH		
1 The Link between Sub-optimal Diet and Physical Inactivity with Non-communicable Diseases	3	
2 Lifestyle and Epigenetics	19	
3 Healthy/Prudent Diets and Health Benefits in Adults	35	
UNIT 2		
BASIC CONCEPTS OF PHYSICAL ACTIVITY AND FITNESS		
4 Definition of Fitness and Its Components	63	
5 Defining Physical Activity and Exercise	69	
6 Implications and Health Benefits of Physical Activity in Adults	79	
UNIT 3		
DETERMINANTS OF HEALTHY AGING		
7 Healthy Aging: Definition and Scope	93	
8 The Interface Between Healthy Aging, Longevity, and Disease		105
9 Physiological Changes in Multiple Organ Systems Through Aging: Measuring and Monitoring Aging		117
10 The Role of Plant-based Diets on Healthy Aging		133
11 Physical Activity as a Determinant of Healthy Aging		159
UNIT 4		
CARDIOVASCULAR HEALTH, DIET, AND PHYSICAL ACTIVITY		
12 Heart Failure		171
13 Atrial/Flutter Fibrillation		191
14 Endothelial Function		205
UNIT 5		
CARDIO-METABOLIC HEALTH, DIET, AND PHYSICAL ACTIVITY		
15 Diabetes Mellitus		223
16 Hypertension		241

17	Dyslipidemia	259	21	Cancer	347
18	Obesity and Metabolic Syndrome	275	Appendix	Answers to Self-assessment Questions	367
19	Obstructive Sleep Apnea	299		Abbreviations	381
20	Chronic Kidney Disease	327		Glossary	385
				Index	393
