

Exercise Science

- 1:Growth and maturation, *Adam DG Baxter-Jones*
- 2:Development of motor control, *Andrea Utley*
- 3:Developmental biodynamics, *James Watkins*
- 4:Development of muscle strength, *Mark BA De Ste Croix*
- 5:Molecular exercise physiology, *Marius Meinhold and Henning Wackerhage*
- 6:Exercise and physiological variability, *George R Biltz and Christopher J Lundstrom*
- 7:Cerebrovascular responses to exercise, *Ali M McManus and Christine M Tallon*
- 8:Metabolic responses to exercise, *Julia K Zakrzewski-Fruer, Alice. E Thackray, and Michael L Newell*
- 9:Endocrine responses to exercise, *Alon Eliakim and Dan Nemet*
- 10:Cardiopulmonary responses to exercise, *Neil Armstrong and Ali M McManus*
- 11:Muscle and pulmonary oxygen uptake kinetics, *Alan R Barker and Neil Armstrong*
- 12:Neuromuscular fatigue, *Sébastien Ratel and Dimitrios Patikas*
- 13:Effort perception, *Kevin L Lamb, Gaynor Parfitt, and Roger G Eston*

Exercise Medicine

- 14:The role of molecular mechanisms in transducing physical activity and exercise into health benefits, *Dan M Cooper and Shlomit Radom-Aizik*
- 15:Assessment of physical activity behaviours, *Knut Eirik Dalene and Ulf Ekelund*
- 16:Systematic promotion of physical activity, *Stef Kremers, Ree M Meertens, and Robert AC Ruiter*
- 17:Genetics of physical activity and physical fitness, *Yahua Zi, Meike Bartels, and Eco JC de Geus*
- 18:Sedentary behaviour and health, *Natalie Pearson and Lauren Sherar*
- 19:Physical activity, exercise, and cardiovascular health, *Isabel Ferreira and Jason MR Gill*
- 20:Physical activity, exercise, and the metabolic syndrome, *Eero A Haapala and Marja Leppänen*
- 21:Physical activity, exercise, and eating and weight disorders, *Andrew P Hills, Steven J Street, and Nuala M Byrne*
- 22:Physical activity, exercise, and bone health, *Leigh Gabel, Heather Macdonald, and Heather McKay*
- 23:Physical activity, exercise, and diabetes mellitus, *Lauren Turner, Edgar GAH van Mil, and Michael C Riddell*
- 24:Physical activity, exercise, and asthma, *Helge Hebestreit, Susi Kriemler, and Thomas Radtke*
- 25:Physical activity, exercise, and cystic fibrosis, *Thomas Radtke, Susi Kriemler, and Helge Hebestreit*
- 26:Physical activity, exercise, and cerebral palsy, *Olaf Verschuren and Eline Bolster*
- 27:Physical activity, exercise, and mental health, *Cristina Cadenas-Sanchez, Lucia V Torres-Lopez, and Jairo H Migueles*
- 28:Physical activity, exercise, and intellectual disability, *Bo Fernhall, Tracy Baynard, and Thessa Hilgenkamp*

Sport Science

- 29:Bio-banding in youth sport, *Robert M Malina, Sean Cumming, and Manuel J Coelho-e-Silva*
- 30:Morphology of the youth athlete, *Diogo Martinho, João Valente-dos-Santos, and Robert M Malina*
- 31:Development of aerobic and anaerobic fitness, *Neil Armstrong and Melitta A McNarry*
- 32:Aerobic and anaerobic responses to training, *Melitta A McNarry and Neil Armstrong*
- 33:Development and training of speed and agility, *Jon L Oliver and Rhodri S Lloyd*
- 34:High-intensity interval training, *Craig A Williams*
- 35:Resistance training, *Avery D Faigenbaum and Rhodri S Lloyd*
- 36:Neuromuscular training effects on performance, *Urs Granacher, David G Behm, and Avery D Faigenbaum*
- 37:Markers of training stress and overtraining, *Jaak Jürimäe*

- 38: The youth athlete in hot and cold environments, *Bareket Falk and Raffy Dotan*
39: Circadian rhythms, sleep, and the youth athlete, *Thomas W Rowland*
40: Physiological assessment and monitoring of elite youth athletes, *Neil Armstrong and Alan R Barker*
41: Long-term athletic development, *Rhodri S Lloyd and Jon L Oliver*

Sport Medicine

- 42: Epidemiology and prevention of sports injuries, *Joske Nauta, Natalia FN Bittencourt, and Caroline Bolling*
43: Epidemiology and prevention of injuries in physical education, *Dorine CM Collard, Joske Nauta, and Frank JG Backx*
44: Epidemiology and prevention of injuries in competitive non-contact sports, *Luiz Hespanhol, Tiê Parma Yamato, and Per Bo Mahler*
45: Epidemiology and prevention of injuries in competitive contact and collision sports, *Joske Nauta, Nicloa Sewry, and Evert ALM Verhagen*
46: Role of stretching on range of motion, performance, and injury incidence, *David G Behm*
47: Head and cervical spine injuries, *Robert V Cantu and Robert C Cantu*
48: Upper extremity and trunk injuries, *Akin Cil, Christopher M Shaw, and Joshua Locker*
49: Lower limb injuries, *Rocco Aicale and Nicola Maffulli*
50: Disability, youth sport, and clinical care of the youth Para athlete, *Wayne Derman, Eileen Africa, and Candace Vermaak*
51: Nutrition and eating disorders in youth sport, *Therese Fostervold Mathisen, Christine Sundgot-Borgen, and Jorunn Sundgot-Borgen*
52: Dietary supplements in youth sport, *Ronald J. Maughan and Susan M Shirreffs*
53: Doping and anti-doping in youth sport, *Alan Vernec and David Gerrard*
54: Safeguarding child athletes, *Margo Mountjoy and Tine Vertommen*
