Preface

Video table of contents

List of Illustrations

List of Tables

Part I. Arthroplasty

Technique 1. Total hip arthroplasty: Standard Posterolateral Approach

Exposure and removal of the femoral head

Credits

Technique 2. Direct anterior approach for total hip arthroplasty

Postoperative care

Technique 3. Total knee arthroplasty: Standard Midline Approach and Bone Preparation

Surgical approach

Bone preparation for primary total knee arthroplasty

Technique 4. Component implantation in total knee arthroplasty

Technique 5. Unicondylar knee arthroplasty

Credits

Technique 6. Total ankle arthroplasty

Postoperative care

Credits

Technique 7. Total shoulder arthroplasty

Preparation of the humerus

Preparation of the glenoid

Component implantation

Postoperative care

Technique 8. Reverse total shoulder arthroplasty

Postoperative care

Part II. Spine

Technique 9. Anterior cervical discectomy and fusion with locking plate

Postoperative care

Technique 10. Minimally invasive transforaminal lumbar interbody fusion (MITLIF)

Postoperative care

Technique 11. Microscopic lumbar discectomy

Approach for use of a mcculloch retractor

Approach for use of tubular retractor

Postoperative care

Technique 12. Facet block injections: Cervical, lumbar, sacroiliac joint

Cervical medial branch block injection

Lumbar intraarticular injection

Lumbar medial branch block injection

Sacroiliac joint injection

Part III. Sports Medicine

Technique 13. Ankle arthroscopy

Postoperative care

Technique 14. Anterior cruciate ligament reconstruction: Anatomical Single-Bundle Endoscopic Reconstruction Using Bone–Patellar Tendon–Bone Graft

Graft harvest

Graft preparation

Tibial tunnel preparation and determining appropriate length

Femoral tunnel preparation

Graft fixation

Closure

Postoperative care (Box 14.1)

#### Technique 15. Anterior cruciate ligament reconstruction: Transepiphyseal, Physeal-Sparing

Transepiphyseal replacement of anterior cruciate ligament using quadruple hamstring grafts

Physeal-sparing reconstruction of the anterior cruciate ligament

Postoperative care

#### Technique 16. Open repair of achilles tendon rupture

Open repair of achilles tendon rupture—Krackow et al.

Open repair of achilles tendon rupture—Lindholm

Open repair of achilles tendon rupture—Lynn

Open repair of achilles tendon rupture—Teuffer

Postoperative care

#### Technique 17. Minimally invasive repair of achilles tendon rupture

Postoperative care

#### Technique 18. Treatment of shoulder instability: Bankart repair, open, and arthroscopic

Open bankart repair

Postoperative care

Arthroscopic bankart repair

Postoperative care

Technique 19. Treatment of shoulder instability: Capsular shift, posterior capsular shift, arthroscopic capsular shift

Capsular shift

Postoperative care

Inferior capsular shift through a posterior approach

Postoperative care

Arthroscopic capsular shift

Postoperative care

Technique 20. Arthroscopic repair of rotator cuff tears

Postoperative care

Technique 21. Arthroscopic fixation of type II slap lesions

Postoperative care

Technique 22. Biceps repair: Open approaches

Subpectoral biceps tenodesis

Postoperative care

Two-incision technique for repair of the distal biceps tendon

Postoperative care

Single-incision technique for repair of the distal biceps tendon

Postoperative care

Technique 23. Ulnar collateral ligament reconstruction

Andrews et al. technique

Postoperative care

Altchek et al. technique

Postoperative care

Lateral ulnar collateral ligament reconstruction for posterolateral rotatory instability

Postoperative care

#### Part IV. Trauma

#### Technique 24. Fixation of the lateral and medial malleoli

Fixation of the lateral malleolus

Fixation of the medial malleolus

Postoperative care

#### Technique 25. Intramedullary nailing of tibial shaft fractures

Fracture table

Standard operating table

Measurement of rotation

Nail placement

Postoperative care

#### Technique 26. Open reduction and fixation of tibial plateau fractures

Postoperative care

#### Technique 27. Tension band wiring fixation of patellar fractures

Postoperative care

#### Technique 28. Compression hip screw fixation of intertrochanteric femoral fractures

Patient positioning

Reduction

Exposure

Stabilization

Postoperative care

#### Technique 29. Intramedullary nailing of subtrochanteric fractures

Postoperative care

Technique 30. Open reduction and internal fixation of the distal humerus with olecranon osteotomy

Postoperative care

Technique 31. Open reduction and internal fixation of both-bone forearm fractures

Postoperative care

Technique 32. Fasciotomy for acute compartment syndrome in the leg: Single and double incisions

Single-incision fasciotomy

Double-incision fasciotomy

Postoperative care

Technique 33. Closed reduction and percutaneous pinning of supracondylar fractures (two lateral pins)

Postoperative care

Credits

Technique 34. Flexible intramedullary nailing of femoral fractures

Postoperative care

Technique 35. Percutaneous in situ pinning for slipped capital femoral epiphysis

Postoperative care

Part V. Hand and Wrist

Technique 36. Flexor tendon repair

Zone I

Zone II

Zone III

Zone IV

Zone V

Postoperative care

Technique 37. Subcutaneous fasciotomy, partial fasciectomy for Dupuytren contracture

Subcutaneous fasciotomy

Postoperative care

Partial fasciectomy

Postoperative care

Technique 38. Closed reduction and percutaneous pinning of distal radial fractures

Postoperative care

Technique 39. Volar plate fixation of fractures of the distal radius

Postoperative care

Technique 40. Scaphoid fractures: Open reduction internal fixation and percutaneous fixation

ORIF — volar approach

ORIF — dorsal approach

Postoperative care

Percutaneous fixation of scaphoid fractures

Postoperative care

Technique 41. Mini-palm open and open carpal tunnel release

Mini-palm open carpal tunnel release

Open carpal tunnel release

Postoperative care

Technique 42. Endoscopic carpal tunnel release through one or two incisions

Endoscopic carpal tunnel release through a single incision

Postoperative care

Endoscopic carpal tunnel release through two incisions

Postoperative care

Technique 43. Trigger finger release: Open and percutaneous

Open release of trigger finger

Postoperative care

Percutaneous release of trigger finger

Postoperative care

Part VI. Foot and Ankle

Technique 44. Distal chevron metatarsal osteotomy for hallux valgus

Modified chevron distal metatarsal osteotomy

Postoperative care

Johnson modified chevron osteotomy

Postoperative care

Technique 45. Minimally invasive chevron-Akin osteotomy

Exposure

Chevron osteotomy

Akin osteotomy

Postoperative care

Credits

Technique 46. Arthrodesis of the first metatarsocuneiform articulation (Lapidus procedure)

Exposure

Postoperative care

Credits

Technique 47. Calcaneal fracture: Open reduction and internal fixation; percutaneous fixation

Open reduction of calcaneal fracture

Postoperative care

Percutaneous reduction and fixation of calcaneal fracture

Credits

Technique 48. Screw fixation of fifth metatarsal fractures

Postoperative care

Technique 49. Lateral repair of chronic instability: Modified Broström

Postoperative care

Technique 50. Ankle arthrodesis: Mini-incision technique

Preparation and exposure

Postoperative care

Index
