

*Preface*

*Contributors*

**1. Updated Guidelines for Setting up an Assisted Reproductive Technology Laboratory**

Jacques Cohen, Mina Alikani, and Antonia Gilligan

**2. Quality Control: Maintaining Stability in the Laboratory**

Ronny Janssens, Neelke De Munck, and Johan Guns

**3. KPIs for the IVF Laboratory**

Alison Campbell

**4. QC in the Clouds—Digitizing Quality Control**

Giles Anthony Palmer

**5. The Assisted Reproduction Technology Laboratory: Current Standards**

Cecilia Sjöblom

**6. Evaluation of Sperm**

Chelsey A. Leisinger, Kaylen M. Silverberg, and Matthew D. VerMilyea

**7. Sperm Preparation Techniques and Advanced Sperm Selection for Intracytoplasmic Sperm Injection**

Sinan Ozkavukcu, George Hughes, and Christopher LR Barratt

**8. Sperm Chromatin Assessment**

Ashok Agarwal and Rakesh Sharma

**9. Oocyte Retrieval and Selection**

Laura Rienzi, Rosaria Gentile, Federica Innocenti, Danilo Cimadomo, Alberto Vaiarelli, and Filippo Maria Ubaldi

**10. Preparation and Evaluation of Oocytes for Intracytoplasmic Sperm Injection**

Irit Granot and Nava Dekel

**11. Use of IVM in a Clinical Setting: What is its Role in ART?**

Tuong M Ho and Lan N Vuong

**12. Intracytoplasmic Sperm Injection: Technical Aspects**

Sydney Souness, Philip Xie, Stephanie Cheung, Olena M. Kocur, Lily Ng, Zev Rosenwaks, and Gianpiero D. Palermo

**13. Human Embryo Biopsy Procedures**

Maurizio Poli, Ludovica Picchetta, and Antonio Capalbo

**14. Analysis of Fertilization**

Thomas Ebner

**15. Culture Systems for the Human Embryo**

David K. Gardner

**16. Embryo Selection through the Analysis of Morphology and Physiology**

Denny Sakkas and David K. Gardner

**17. Evaluation of Embryo Quality: Time-Lapse Imaging to Assess Embryo Morphokinesis**

Akhil Garg, María Ángeles Valera, and Marcos Meseguer

**18. Artificial Intelligence (AI)**

Daniella Gilboa

**19. Artificial Intelligence (AI) in Gamete and Embryo Selection**

Peter He, Neringa Karpaviciute, Cristina Hickman, and Nikica Zaninovic

**20. Demystifying Vitrification**

Debra A. Gook and Kelly Lewis

**21. Vitrification of the Human Oocyte**

Masashige Kuwayama

**22. The Human Embryo: Vitrification**

Zsolt Peter Nagy and Ching-Chien Chang

**23. Managing an Oocyte Bank**

Ana Cobo, Pilar Alamá, José María De Los Santos, María José De Los Santos, and José Remohí

**24. Severe Male Factor Infertility: Genetic Consequences and Recommendations for Genetic Testing**

Katrien Stouffs

**25. Pre-Implantation Genetic Testing for Aneuploidy to Improve Clinical Outcomes**

Jenna S. Hynes, Eric J. Forman, and Alan H. Handyside

**26. Diagnosis of Endometrial Receptivity, Embryo–Endometrial Dialogue, and Endometrial Microbiome**

Maria Ruiz-Alonso, Inmaculada Moreno, Felipe Vilella, and Carlos Simon

**27. Artificial Gametes: Oocytes**

Evelyn E Telfer and Yvonne L Odey

**28. How Microfluidics and Microfabrication will Improve Diagnosis and Treatment in Human Art**

Dale M. Goss, Steven A. Vasilescu, Majid E. Warkiani, Jeremy G. Thompson, and David K. Gardner

**29. Genome Editing in Human Reproduction**

Helen C O'Neill

**30. Designing Disaster Plans for IVF Laboratories**

Kimball O Pomeroy and Michael L Reed

**31. Early Human Embryo Development Revealed by Static Imaging**

Yanina D. Alvarez and Melanie D. White
