

Features:

- Thoroughly covers new treatment guidelines related to recent research and the latest physiologic understanding for a wide range of patients with hypertension and related co-morbidities.
- Includes new chapters on Hypertension in Women, Mineralocorticoid Receptor Antagonists, Exercise and Hypertension, and Telemedicine/Digital Health.
- Contains new or expanded content on epidemiology, pathophysiology, immunology, clinical findings, laboratory testing, invasive and non-invasive testing, risk stratification, clinical decision-making, prognosis, and management.
- Provides new chapter summaries and a new focus on clinical and actionable content using a streamlined, narrative format.
- Covers behavior management and prevention as an integral part of hypertensive and pre-hypertensive treatment plans.
- Highlights combination drug therapies and management of chronic complications of hypertension.
- Offers expert guidance from worldwide experts in cardiology, endocrinology, and nephrology, and integrates the most recent guidelines from leading organizations around the world.
- An eBook version is included with purchase. The eBook allows you to access all of the text, figures and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud.

Περιεχόμενα:SECTION I: EPIDEMIOLOGY

1. General Population and Global Cardiovascular Risk Prediction
2. Diet and Hypertension
3. Exercise and Hypertension
4. Hypertension in Women

SECTION II: PATHOPHYSIOLOGY

5. Pathophysiology of Hypertension
6. Genetics of Hypertension
7. Inflammation and Immunity in Hypertension

SECTION III: DIAGNOSIS AND EVALUATION

8. The Environment and High Blood Pressure
9. Office Blood Pressure Measurement
10. Home Monitoring of Blood Pressure
11. Ambulatory Blood Pressure Monitoring in Clinical Hypertension Management
12. White Coat and Masked Hypertension
13. Renovascular Hypertension and ISchemic Neuropathy

14. Secondary Hypertension: Primary Hyperaldosteronism and Mineralocorticoid Excess States

15. Secondary Hypertension: Pheochromocytoma and Paraganglioma

16. Sleep Disruption and Blood Pressure

SECTION IV: RISK STRATIFICATION

17. Natural History of Untreated Hypertension

18. Isolated Systolic Hypertension

19. Assessment of Hypertension-Mediated Organ Damage

SECTION V: ANTIHYPERTENSIVE THERAPY

20. Diuretics Therapy

21. Calcium Channel Blockers

22. Renin Angiotensin Aldosterone System Blockers

23. Aldosterone and Hypertension

24. β -Blockers, Central Sympathetic Agents, and Direct Vasodilators

25. Peripheral Adrenergic Blockers

26. Initial Combination Therapies

27. Devices Therapies for Hypertension

28. The Treatment of Hypertension With Nutrition, Nutritional Supplements, and Lifestyle

SECTION VI: HYPERTENSION MANAGEMENT APPROACHES

29. Approach to Difficult to Manage Primary Hypertension

30. Team-Based Care for Hypertension Management

31. Medication Adherence: Focus on Improvement

32. Digital Health and Telemedicine for Hypertension

SECTION VII HYPERTENSION MANAGEMENT WITH COMORBIDITIES

33. Ischemic Heart Disease

34. Heart Failure

35. Hypertension and Chronic Kidney Disease Including Dialysis

36. Transplant Hypertension

37. Obesity and Hypertension: Pathophysiology and Treatment

38. Cerebrovascular Disease

39. Diabetes Mellitus: Management of Hypertension in Diabetes

40. Onco-Hypertension: Anticancer Therapy-Associated Hypertension

41. Autonomic Dysfunction and Orthostatic Hypotension

42. Dyslipidemia in Hypertension

43. Aorta and Peripheral Arterial Disease in Hypertension

SECTION VIII SPECIAL POPULATIONS

44. Hypertension in Pregnancy

45. Hypertension in Older People

46. Hypertension in African Americans

47. Resistant Hypertension

48. Hypertensive Emergencies and Urgencies

49. Hypertension in Children: Diagnosis and Treatment

Appendix Meta-Analyses of Blood Pressure Lowering Trials
