

Features:

- Provides **complete clinical coverage of every aspect of cutaneous and systemic lupus erythematosus**, including definitions, pathogenesis, autoantibodies, clinical and laboratory features, management, prognosis, and patient education.
- Includes **significant new content throughout**: a new chapter on the endocrine system and hormones; newly distinct chapters on the heart and lung; new content on social disparities in lupus, clinical presentation of nephritis, and pulmonary hypertension; a new concluding chapter on future directions in the field; new basic science coverage of the microbiome, autoinflammatory, and monogenic lupus; and new coverage of diversity, inclusion, gender, compliance, and adherence.
- Offers a fresh perspective from **two new associate editors and many new authors** with representation from 30 countries.
- Contains an up-to-date overview of significant advances in **cellular, molecular, and genetic technologies**, including genetic advancements in identifying at-risk patients.
- Discusses the **clinical management of related disorders** such as Sjogren's syndrome, scleroderma, polymyositis, and antiphospholipid syndrome (APS).
- Presents the knowledge and expertise of international contributors to provide **new global perspectives** on manifestations, diagnosis, and treatment.
- Features a **vibrant, full-color format**, with graphs, algorithms, differential diagnosis comparisons, new and improved figures, and schematic diagrams throughout.

An eBook version is included with purchase. The eBook allows you to access all of the text, figures, and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud.

Περιεχόμενα:

SECTION 1 What Is Lupus?

- 1 History of Lupus
- 2 Definition and Classification of Lupus and Lupus-Related Disorders
- 3 The Epidemiology of Lupus

SECTION 2 Pathogenesis

- 4 Overview of Lupus Pathogenesis
- 5 Genetics of SLE
- 6 Single Gene Defects and Autoinflammation: Relation to Lupus
- 7 Epigenetics of Lupus
- 8 The Role of the Environment and Microbiome in Lupus
- 9 The Innate Immune System in SLE
- 10 B Cells and Generation of Antibodies
- 11 T cells
- 12 Immunoregulatory Cells and Networks in Lupus
- 13 Cytokines in Lupus
- 14 Metabolic Control of Immunopathogenesis in Systemic Lupus Erythematosus
- 15 Animal Models of Systemic Lupus Erythematosus (SLE)

SECTION 3 Mechanisms of Tissue Injury

- 16 Abnormalities in Clearance of Immune Complexes and Dying Cells in Lupus
- 17 Complement and Systemic Lupus Erythematosus
- 18 Apoptosis and Inflammatory Forms of Cell Death
- 19 Tissue Damage in Lupus: Free Radicals and Fibrosis
- 20 Lupus Nephritis
- 21 Pathogenesis of Accelerated Atherosclerosis and Vascular Injury in Systemic Lupus Erythematosus
- 22 Pathogenesis of Cutaneous Lupus
- 23 Pathogenesis of Neuropsychiatric Lupus

24 Pathogenesis of Sjögren Syndrome

SECTION 4 Autoantibodies

- 25 Antinuclear Antibodies, Antibodies to DNA, Histones, and Nucleosomes
- 26 Antibodies Against Extractable Nuclear Antigens(RNP, Sm, SS-A/Ro, and SS-B/La)
- 27 Other Autoantibodies: Antibodies to C1q, Lipoprotein, and Endothelial Cells
- 28 Pathogenesis of Antiphospholipid Antibody Syndrome
- 29 Drug-Induced Lupus

SECTION 5 Clinical Aspects of Lupus Erythematosus

- 30 Overview and Clinical Presentation
- 31 Skin Disease in Cutaneous Lupus Erythematosus
- 32 The Musculoskeletal System and Bone Metabolism
- 33 Lupus and the Cardiovascular System
- 34 Pulmonary Manifestations of Systemic Lupus Erythematosus
- 35 Lupus and the Nervous System: Clinical Presentation, Diagnosis, and Treatment
- 36 Gastrointestinal and Hepatic Manifestations
- 37 The Gut Microbiome and Lupus Pathogenesis
- 38 Hematologic and Lymphoid Abnormalities in SLE
- 39 Neonatal Lupus: Pathogenesis and Clinical Approaches
- 40 Pregnancy and Reproductive Health Issues in Systemic Lupus Erythematosus
- 41 Systemic Lupus Erythematosus in Childhood and Adolescence
- 42 Clinical Aspects of Antiphospholipid Syndrome
- 43 Lupus and Infections
- 44 Ocular, Aural, and Oral Manifestations of Lupus
- 45 Clinical Aspects of Sjögren's Disease
- 46 Clinical Presentations of Lupus in the Kidney and Urogenital System
- 47 The Endocrine System and Hormones in Lupus

SECTION 6 Assessment of Lupus

- 48 Clinical Application of Serologic Tests, Serum Protein Abnormalities, and Other Laboratory Tests in Systemic Lupus Erythematosus
- 49 Differential Diagnosis and Disease Associations
- 50 Incomplete Lupus, Undifferentiated Connective Tissue Disease, and Mixed Connective Tissue Disease
- 51 Clinical Markers, Metrics, Indices, and Clinical Trials

SECTION 7 Management of Lupus

- 52 Principles of Therapy, Local Measures, and NSAIDs
- 53 Antimalarial Medications
- 54 Systemic Glucocorticoid Therapy for SLE
- 55 Immunosuppressive Drug Therapy
- 56 Complementary and Integrative Health Approaches
- 57 Specialized and Niche Therapies
- 58 Adjunctive and Preventive Measures
- 59 Management of Cutaneous Lupus Erythematosus
- 60 Targeted Therapies in SLE
- 61 Management of Lupus Nephritis
- 62 Management of Sjögren Disease Syndrome

SECTION 8 Outcomes

- 63 Socioeconomics, Disparities, and Disability
- 64 Prognosis and Mortality of Systemic Lupus Erythematosus
- 65 Future Directions: Therapeutics
- 66 Expanding the Opportunities to Effectively Treat Patients: Clinical Considerations
