<i>About the authors</i>	<i>page</i> x
<i>Preface</i>	xi
<i>Acknowledgements</i>	xii
<b>1 Basic concepts in pharmacology and therapeutics</b>	<b>1</b>
1.1 Introduction	1
1.2 Role of drugs in dentistry	1
1.3 The fundamentals of drug response	3
1.4 Administration and absorption of drugs	7
1.5 First pass metabolism	10
1.6 Oromucosal drug administration and absorption	11
1.7 Parenteral drug administration	11
1.8 Pro-drugs	11
1.9 Drug distribution	12
1.10 Drug metabolism and excretion	13
1.11 Drug excretion	13
1.12 Pharmacodynamics	14
1.13 What are pharmacogenetics and pharmacogenomics?	16
1.14 Drug interactions and drug response	16
Further reading	23
References	23
<b>2 Prescribing essentials</b>	<b>25</b>
2.1 Introduction	25
2.2 What is prescribing?	25
2.3 Medication errors and safety	28
2.4 Drugs and poisons legislation in Australia	30
2.5 Drugs legislation and subsidisation in Aotearoa New Zealand	40
Further reading	42
References	42
<b>3 Drug allergy versus adverse reactions</b>	<b>44</b>
3.1 Introduction	44
3.2 Definition of adverse drug reactions	45
3.3 Discovery of adverse drug effects and pharmacovigilance	46
3.4 Immunological mechanisms for drug allergies	47
3.5 Penicillin allergy	50
3.6 Allergy to local anaesthetics	53
3.7 When to report ADRs	53
Further reading	54
References	54

<b>4</b>	<b>Antimicrobials</b>	<b>57</b>
4.1	Introduction	57
4.2	General principles of antibiotic use in dentistry	57
4.3	Antimicrobial resistance	58
4.4	Antimicrobial stewardship	60
4.5	Antibiotics	61
4.6	Antibiotic prophylaxis	62
4.7	$\beta$ -lactam antibiotics: penicillins and cephalosporins	67
4.8	Metronidazole	71
4.9	Clindamycin	73
4.10	Macrolides	76
4.11	Doxycycline	79
4.12	Antivirals	81
4.13	Guanine analogues	82
4.14	Antifungals	83
4.15	Polyene antifungals	84
4.16	Azole antifungals	84
	Further reading	86
	References	86
<b>5</b>	<b>Analgesics and anti-inflammatories</b>	<b>91</b>
5.1	Introduction	91
5.2	Definition of pain	91
5.3	Classification of pain	92
5.4	Types of pain	92
5.5	Pain physiology	93
5.6	Pain management in dentistry	94
5.7	Anti-inflammatories	95
5.8	Opioids	106
5.9	Drugs used for treatment of neuropathic pain in the orofacial region	119
	Further reading	127
	References	127
<b>6</b>	<b>Anxiolytics</b>	<b>132</b>
6.1	Introduction	132
6.2	Definition of anxiolysis	132
6.3	Definitions of sedation and sedation as a continuum	132
6.4	Medications for anxiolysis	133
6.5	Benzodiazepines	134
6.6	Nitrous oxide	136
6.7	Methoxyflurane	138
	Further reading	138
	References	139

<b>7 Local anaesthesia</b>	<b>141</b>
7.1 Introduction	141
7.2 Chemistry: amide versus ester LAs	141
7.3 Pharmacodynamics and physiochemical properties	142
7.4 LA effectiveness in inflammation	145
7.5 Resistance to local anaesthetic	145
7.6 Vasoconstrictors	146
7.7 Drug interactions	147
7.8 Pregnancy and lactation recommendations	147
7.9 Allergy to local anaesthetics	147
7.10 Local adverse effects	148
7.11 Systemic adverse effects in overdose	151
7.12 Other considerations	152
7.13 Dosing of local anaesthetic	153
Further reading	154
References	154
<b>8 Topical medications</b>	<b>158</b>
8.1 Introduction	158
8.2 Topical anaesthetics	159
8.3 Topical products for dental caries	160
8.4 Oral antiseptics	162
8.5 Topical antifungals	165
8.6 Topical antivirals	167
8.7 Topical anti-inflammatories	167
8.8 Botulinum toxin therapy	169
Further reading	170
References	170
<b>9 Drugs associated with increased bleeding risk</b>	<b>175</b>
9.1 Introduction	175
9.2 General principles of haemostasis	175
9.3 Antithrombotic effects of drugs	178
9.4 Antiplatelet drugs	179
9.5 Anticoagulants	184
9.6 Other medications associated with increased bleeding	191
9.7 Tranexamic acid	197
9.8 Assessment of bleeding risk in dental practice	197
9.9 Perioperative bleeding risk management of patients prior to dental procedures	198
Further reading	198
References	198

<b>10</b>	<b>Drugs associated with medication-related osteonecrosis of the jaw</b>	<b>201</b>
10.1	Introduction	201
10.2	Definition	202
10.3	Pathophysiology	202
10.4	Incidence of MRONJ	202
10.5	Patient risk factors	203
10.6	Medications associated with MRONJ	203
10.7	Dental risk factors	213
	Further reading	214
	References	214
<b>11</b>	<b>Periprocedural medicines management</b>	<b>218</b>
11.1	Introduction	218
11.2	Patients on anticoagulants and antiplatelet agents	221
11.3	Managing people on glucocorticoids and ‘steroid cover’	222
11.4	Managing patients on medicines for diabetes	229
11.5	Managing patients undergoing cancer treatment	232
11.6	Managing patients on immunosuppressants	236
	Further reading	239
	References	239
<b>12</b>	<b>Prescribing for children</b>	<b>241</b>
12.1	Introduction	241
12.2	Limited drug and formulation development	242
12.3	Off-label prescribing in paediatrics	242
12.4	Childhood growth and pharmacology	243
12.5	Pharmacodynamics in infants and children	246
12.6	Adverse drug reactions in paediatric patients	247
12.7	Medication errors in paediatrics	247
12.8	Steps to safer prescribing for children	248
12.9	Prescribing common medications for children in dental practice	251
	Further reading	256
	References	257
<b>13</b>	<b>Drugs in the elderly</b>	<b>259</b>
13.1	Introduction	259
13.2	Who are ‘the elderly’?	260
13.3	What is frailty and how is it relevant?	260
13.4	Medications for the elderly and risks of polypharmacy	261
13.5	The vital importance of an accurate medication history	262
13.6	Medication compliance and adherence	265
13.7	Effects of ageing on pharmacokinetics	266
13.8	Age-related changes in pharmacodynamics	272
13.9	ADRs in the elderly and geriatric syndromes	273
13.10	Avoiding potentially inappropriate medicines	273
13.11	Safe prescribing for older patients	274

Further reading	275
References	276
<b>14 Drugs in pregnancy and lactation</b>	<b>279</b>
14.1 Introduction	279
14.2 Drugs in pregnancy	279
14.3 Drugs in lactation	285
14.4 Recommendations for drugs commonly used in dentistry during pregnancy and breastfeeding	288
Further reading	291
References	291
<b>15 Oral adverse drug reactions</b>	<b>293</b>
15.1 Introduction	293
15.2 Drug-associated bruxism	294
15.3 Drug-associated tardive dyskinesia	295
15.4 Drug-associated hairy tongue	297
15.5 Drug-induced gingival overgrowth	298
15.6 Drug-associated taste disturbance	299
15.7 Drug-associated tooth, gum and alveolar bone discolouration	301
15.8 Drug-associated salivary secretory disorders	302
15.9 Medication-related osteonecrosis of the jaw	306
15.10 Drug-associated oral lichenoid reactions	306
15.11 Drug-associated aphthous ulceration	308
15.12 Drug-associated oral mucositis	309
15.13 Drug-associated lupus	311
15.14 Drug-associated pemphigoid	312
15.15 Drug-associated pemphigus	313
15.16 Drug-associated erythema multiforme	315
15.17 Drug-associated Stevens-Johnson syndrome and toxic epidermal necrolysis	317
15.18 Pharmacovigilance and reporting ADRs	319
Further reading	321
References	322
<b>16 Emergency medicines</b>	<b>328</b>
16.1 Introduction	328
16.2 Adrenaline	330
16.3 Glyceryl trinitrate	331
16.4 Glucose	332
16.5 Salbutamol	333
16.6 Aspirin	334
16.7 Oxygen	334
Further reading	334
References	334
<i>Index</i>	336
