Chapter 1 Professionalism in paramedic practice	1
<i>Sarah Neal and Netta Lloyd-Jones</i>	
Introduction	2
Professionalism in paramedic practice	2
Defining professionalism	2
Professionalism as ethical practice	3
Professional identity, socialisation, and culture	3
Learning professionalism	5
Reflective practice	6
Assessment of professionalism	7
Scope of practice and professional confidence	7
Help-seeking behaviour	7
Health and well-being	8
Professionalism whilst working under stress	9
Cultural safety	9
Professional regulation	10
Raising concerns	11
Conclusion	11
Activities	12
Glossary	12
References	13
Chapter 2 Professional health regulation for paramedicine	16
<i>Ramon Z. Shaban, Ruth Townsend, and Markus Pitter</i>	
Introduction	17
Principles for paramedic professional health regulation	17
Health professional regulation for paramedic professionalism	18
The UK experience	19
Paramedics misbehaving	21
Conclusion	23
Activities	24
Glossary	24
References	25

Chapter 3	Legal and ethical aspects of paramedic practice	26
	<i>Nevin Mehmet</i>	
	Introduction	27
	Legal aspects of paramedic practice	27
	Ethical aspects of paramedic practice	31
	Ethical principles: an ethical framework	33
	Conclusion	33
	Activities	34
	Glossary	34
	References	35
Chapter 4	The impact of professional culture on paramedics and students	36
	<i>Sarah Fulford and Derek Collings-Hughes</i>	
	Introduction	37
	Defining culture	37
	Organisational culture	38
	Professional culture	39
	Paramedic culture	40
	How can culture in paramedicine affect your clinical practice?	41
	Conclusion	44
	Activities	45
	References	45
Chapter 5	Human factors in paramedicine	47
	<i>Sam Willis and Helen Pocock</i>	
	Introduction	48
	What are human factors?	48
	Human error in paramedicine	48
	Tasks	49
	Organisation	51
	Tools and technology	51
	Environment	51
	Interactions	52
	Human factors in paramedic practice	52
	Conclusion	54
	Activities	54
	Glossary	55
	References	55
Chapter 6	Sociological aspects of paramedic practice	56
	<i>Kieran Robinson</i>	
	Introduction	57
	The sociological imagination	57
	Three sociological paradigms	57
	The sociocultural context of health	60
	Medicalisation and demedicalisation	61
	Conclusion	62
	Activities	62

	Glossary	63
	References	64
Chapter 7	Communication competency in healthcare	66
	<i>Rasa Piggott</i>	
	Introduction	66
	Communication process	67
	Communication theory	68
	Communication modalities	69
	Patient-centred communication	72
	Patient-centred interview	73
	Barriers to effective communication	77
	Interdisciplinary communication	77
	Critical information communication	78
	Closed loop communication	78
	Clinical handover	79
	Interdisciplinary debriefing	80
	Conclusion	81
	Activities	82
	Glossary	82
	References	83
	Bibliography	84
Chapter 8	Practice-based learning	86
	<i>Joe Copson and Vince Clarke</i>	
	Introduction: the evolution of UK paramedic practice-based learning	87
	Apprenticeships	88
	Undergraduate degrees	88
	Paramedic students as practice-based learners	89
	The supernumerary learner	89
	The benefits of practice-based learning	90
	Developing reflective practice	91
	The role of the practice educator	92
	Learner support: neurodiversity	92
	Learner well-being	93
	Transition to practice (initial)	93
	Conclusion	94
	Activities	94
	Glossary	95
	References	95
Chapter 9	Well-being for paramedics	97
	<i>Emma Geis and Katie Pavoni</i>	
	Introduction	98
	Definitions	99
	Resilience	99
	Stigma	100
	‘The stress bucket’: what factors can affect your well-being?	101
	Context of paramedic mental health and well-being	102

Exposure to traumatic incidents	102
Moral injury	103
The extra challenge	103
Signs your bucket is overflowing: recognition of distress	103
Attaching the tap to the bucket: adaptive coping strategies	104
Take notice	104
Self-compassion	104
Take time for you to be you	105
Connections	105
Social support	105
Reflection	106
Attaching the tap to the bucket: looking after your physical health	106
Supportive conversations	107
Accessing external support	108
Conclusion	108
Activities	109
Glossary	109
References	110

Chapter 10 Mental health for paramedics 113

Renate Taylor and Jade Speed

Introduction	114
What is mental health?	114
What are the factors affecting mental health on the job?	114
Global assessment of the well-being of paramedics	115
Emotional suppression and workplace culture	117
Six distinct stages of critical incidents	118
Changing the stigma and finding support	119
Self-care and well-being of a paramedic	119
Conclusion	121
Activities	121
Glossary	122
References	122

Chapter 11 Responding to mental health in the community 124

Marie Boulianne

Introduction	125
Positive mental health and mental illness	125
Stigma	125
Mental health legislation	126
Overview of common mental health conditions and illnesses	126
Affective disorders	128
Anxiety disorders	128
Personality disorders	129
Post-traumatic stress disorder	129
Schizophrenia and psychotic disorders	129
Self-harm and suicide	131
Family and intimate partner violence and assaults	131
Risk assessment	132
Differential diagnosis	132

Practice considerations	132
Collaboration and innovations	135
Conclusion	135
Activities	135
Glossary	136
References	137
Chapter 12 De-escalation	140
<i>Simon Menz</i>	
Introduction	141
Background	141
Identify	141
Individual approach	142
Spatial awareness	143
Non-verbal and verbal communication	143
Altering stimuli	143
Remain calm	144
Language	144
Common interests	145
Agree to disagree	146
Defer authority	146
Empower with choices	146
Boundaries and social contracts	147
Inform the patient	147
Conclusion	147
Activities	148
Glossary	148
References	149
Chapter 13 Public health and health promotion	151
<i>Michael Fanner</i>	
Introduction	151
The importance of social determinants of health	152
The public health movement	153
The (in)visibility of paramedics in public health	153
The public health model	154
Paramedic practice, public health, and integrative care systems	156
Health promotion	159
Health behaviours	159
Conclusion	161
Activities	161
Glossary	162
Further reading	162
References	162
Chapter 14 Leadership in paramedic practice	164
<i>Jack Howard</i>	
Introduction	165
Theories of leadership: a brief overview	166
Definitions of leadership	166

From leaders to leadership behaviours	166
Leadership styles and approaches	167
Leadership at the individual level	168
Leadership and the mentoring or supervisory role	169
Leadership and teamwork	169
Ongoing leadership development	170
Conclusion	171
Activities	171
Glossary	172
References	172
Chapter 15 The foundations of research in paramedic practice	174
<i>Elicia Austin</i>	
Introduction	174
Research paradigms	175
Research methodologies	176
The research process	177
Study designs	179
Data collection tools	182
Conclusion	183
Activities	184
Glossary	184
References	184
Chapter 16 Medical terminology	187
<i>Samantha Sweet</i>	
Introduction	188
A brief history (Hx) of medical terminology	188
Medical terminology and word structure	189
Root words	189
Affixes	190
Combining vowel	192
Pronunciation of medical terms	192
Forming plurals	192
Eponyms	193
Anatomical positions	193
Movement terminology	196
Medical abbreviations and acronyms	196
Similarities in terminology	199
Spelling: British versus American English	199
Conclusion	199
Activities	200
Glossary	201
References	201
Chapter 17 Essential toxicology for out-of-hospital clinicians	202
<i>Jack Matulich and Simon Menz</i>	
Introduction	203
Pharmacokinetics in toxicology	204
The importance of clinical context and vulnerability	206

	The initial resuscitative approach in toxicology	207
	Toxidromes	210
	Activities	217
	Glossary	218
	References	218
Chapter 18	Trauma	220
	<i>Charlie Gadd</i>	
	Introduction	221
	Prehospital trauma bypass	221
	Head injuries	222
	Neck and back injuries	224
	Chest injuries	226
	Abdominal injuries	228
	Pelvic injuries	229
	Limb injuries	230
	Upper limb injuries	231
	Shock	231
	Conclusion	232
	Activities	232
	Glossary	233
	References	233
Chapter 19	Prehospital electrocardiography	235
	<i>Alexander Olausen</i>	
	Introduction	236
	Background: what is an ECG?	236
	Electrical conduction system of the heart	237
	Capturing the ECG	237
	Indications for ECG	238
	The ECG paper	239
	The components of the ECG	239
	The rate and rhythm of an ECG	240
	A structured interpretation approach	241
	AV heart blocks	241
	Heart blocks and the QRS width	243
	Idioventricular rhythm	243
	Bundle branch blocks	244
	Acute coronary syndromes and the ECG	245
	Acute coronary syndromes and the ECG	246
	Conclusion	247
	Activities	247
	Glossary	247
	References	248
Chapter 20	Assessing the cardiovascular system	249
	<i>Matt Campbell</i>	
	Introduction	250
	Cardiac anatomy and physiology	250
	Cardiac electrophysiology	252

Cardiac pathologies	253
OOH cardiovascular examination	255
OOH management of the cardiac patient	261
Conclusion	262
Activities	262
Glossary	263
References	263
Chapter 21 Assessing the nervous system	265
<i>Charlie Gadd and Jemmima Bowd</i>	
Introduction	266
Structure and function of the nervous system	266
History taking and physical examination	269
Conclusion	275
Activities	275
Glossary	276
References	276
Chapter 22 Assessing the abdomen	278
<i>Matthew Faulkner, Clare Sutton, and Georgina Pickering</i>	
Introduction	279
Abdominal anatomy and physiology	279
Patient assessment	286
Conclusion	291
Activities	292
Glossary	292
References	293
Chapter 23 Assessing the respiratory system	294
<i>Janie Brown, Dan Staines, Samantha Sheridan, and Georgina Pickering</i>	
Introduction	295
Respiratory anatomy and physiology	295
Pathophysiology of respiratory conditions	297
Patient assessment	297
Conclusion	303
Activities	303
Glossary	304
References	304
Chapter 24 Paramedic assessment skills	305
<i>Steven Poulton</i>	
Introduction	306
The ABCDE approach applied to patient assessment	306
A historical narrative of the ABCDE approach	306
Staying safe on scene	308
Applying the primary survey – a case-based approach	308
Adapting the primary survey to trauma	309
Secondary survey	310
Working impression and differential diagnosis	314

Conclusion	315
Activities	315
Glossary	316
References	316
Chapter 25 Birth and the paramedic	317
<i>Aimee Yarrington and Jane Warland</i>	
Introduction	318
Physiological birth	318
Preparing for the birth	319
Conclusion	325
Activities	325
Glossary	326
References	326
Chapter 26 Paediatrics: recognition of the sick child	327
<i>Clare Davies</i>	
Introduction	328
The difference between adults and children	328
Recognition of the sick child: a systematic approach to assessment	331
Conclusion	339
Activities	339
Glossary	340
References	340
Chapter 27 Medical emergencies	341
<i>Jennie McGowan, Jane Jennings, and Marco Scarvaci</i>	
Introduction	341
Early recognition and response to a deteriorating person	342
Neurological emergencies	342
Metabolic emergencies	346
Sepsis	348
Anaphylaxis	349
Conclusion	350
Activities	350
Glossary	350
References	351
Chapter 28 Caring for older adults	354
<i>Melinda (Dolly) McPherson</i>	
Introduction	354
The elderly population	354
Anatomy and physiology	355
Assessing older adults	357
Special circumstances	359
Conclusion	364
Glossary	364
References	364

Chapter 29	Managing minor injuries in the out-of-hospital setting	367	
	<i>Craig Barlow</i>		
	Introduction	368	
	Background	368	
	The importance of history taking	369	
	Consent to treatment	369	
	Clinical examination	370	
	Minor head injuries	372	
	Nasal injuries	372	
	Wound assessment and care	373	
	Ankle injuries	374	
	Minor burns	375	
	Transporting minor injury patients	376	
	Conclusion	376	
	Activities	377	
	Glossary	377	
	References	378	
xiv	Chapter 30	Major incident management	380
	<i>Brian J. Sengstock</i>		
	Introduction	381	
	The nature of a major incident	381	
	First ambulance arriving on scene: managing the incident site	382	
	Casualty management	383	
	Incident management system	386	
	Emergency management	388	
	Conclusion	389	
	Activities	389	
	Glossary	389	
	References	390	
	Chapter 31	Low acuity care	391
	<i>Seán Bolger</i>		
	Introduction	392	
	What is low acuity care?	392	
	History taking	392	
	Urinary tract infection	393	
	Falls	395	
	Chronic obstructive pulmonary disease	397	
	Conclusion	399	
	Activities	400	
	Glossary	401	
	References	401	
	Chapter 32	Family and domestic violence	403
	<i>Simon Sawyer</i>		
	Introduction	404	
	Defining and understanding FDV	404	
	Prevalence and impacts of FDV	406	
	The role of paramedics and ambulance services	408	

Conclusion	412
Activities	412
References	413
Chapter 33 End-of-life care	415
<i>Justin Honey-Jones and Alexander Palmer</i>	
Introduction	416
Principles of palliative and end-of-life care	416
Aims of palliative and end-of-life care	418
History of palliative care	418
Biopsychosocial model of health and illness	419
Opportunities and challenges for paramedics	419
Common terminal illnesses	420
Communication in palliative care	420
The multi-disciplinary team involved in holistic care	421
Introduction to pain	423
Routes of medication administration	426
Pain assessment tools	427
The last year of life	428
After death	429
Conclusion	432
Activities	432
Glossary	433
Further reading	434
References	434
<i>Answers</i>	437
<i>Index</i>	453
