

SECTION 1 NORMAL AND ABNORMAL DEVELOPMENT

- 1.1 Embryo at 18 Days
- 1.2 Embryo at 20 to 24 Days
- 1.3 Central Nervous System at 28 Days
- 1.4 Central Nervous System at 36 Days
- 1.5 Defective Neural Tube Formation
- 1.6 Defective Neural Tube Formation (Continued)
- 1.7 Spinal Dysraphism
- 1.8 Spinal Dysraphism (Continued)
- 1.9 Fetal Brain Growth in the First Trimester
- 1.10 Craniosynostosis
- 1.11 Extracranial Hemorrhage and Skull Fractures in the Newborn
- 1.12 Intracranial Hemorrhage in the Newborn
- 1.13 External Development of the Brain in the Second and Third Trimesters
- 1.14 Mature Brain Ventricles
- 1.15 Hydrocephalus
- 1.16 Surgical Treatment of Hydrocephalus
- 1.17 Cerebral Palsy
- 1.18 Establishing Cellular Diversity in the Embryonic Brain and Spinal Cord
- 1.19 Generation of Neuronal Diversity in the Spinal Cord and Hindbrain
- 1.20 Circuit Formation in the Spinal Cord
- 1.21 Sheath and Satellite Cell Formation
- 1.22 Development of Myelination and Axon Ensheathment
- 1.23 Brachial Plexus and/or Cervical Nerve Root Injuries at Birth
- 1.24 Morphogenesis and Regional Differentiation of the Forebrain
- 1.25 Neurogenesis and Cell Migration in the Developing Neocortex
- 1.26 Neuronal Proliferation and Migration Disorders
- 1.27 Developmental Dyslexia
- 1.28 Autism Spectrum Disorders
- 1.29 Rett Syndrome
- 1.30 Rett Syndrome (Continued)

SECTION 2 CEREBRAL CORTEX AND NEUROCOGNITIVE DISORDERS

- 2.1 Surfaces of Cerebrum: Superolateral Surface
- 2.2 Surfaces of Cerebrum: Medial Surface
- 2.3 Surfaces of Cerebrum: Inferior Surface
- 2.4 Cerebral Cortex: Function and Association Pathways
- 2.5 Major Cortical Association Bundles
- 2.6 Corticocortical and Subcorticocortical Projection Circuits
- 2.7 Corpus Callosum
- 2.8 Rhinencephalon and Limbic System
- 2.9 Hippocampus
- 2.10 Fornix
- 2.11 Amygdala
- 2.12 Forebrain Regions Associated With Hypothalamus
- 2.13 Thalamocortical Radiations
- 2.14 Neuronal Structure and Synapses
- 2.15 Chemical Synaptic Transmission
- 2.16 Summation of Excitation and Inhibition
- 2.17 Types of Neurons in Cerebral Cortex
- 2.18 Astrocytes
- 2.19 Testing for Defects of Higher Cortical Function
- 2.20 Memory Circuits
- 2.21 Amnesia
- 2.22 Dominant Hemisphere Language Dysfunction
- 2.23 Nondominant Hemisphere Higher Cortical Dysfunction
- 2.24 Alzheimer Disease: Pathology
- 2.25 Alzheimer Disease: Distribution of Pathology

- 2.26 Alzheimer Disease: Clinical Manifestations, Progressive Phases
- 2.27 Frontotemporal Dementia
- 2.28 Dementia with Lewy Bodies
- 2.29 Vascular Dementia
- 2.30 Treatable Dementias
- 2.31 Normal-Pressure Hydrocephalus

SECTION 3 EPILEPSY

- 3.1 Electroencephalography
- 3.2 Focal (Partial) Seizures
- 3.3 Generalized Tonic-Clonic Seizures
- 3.4 Absence Seizures
- 3.5 Epilepsy Syndromes
- 3.6 Neonatal Seizures
- 3.7 Status Epilepticus
- 3.8 Causes of Seizures
- 3.9 Neurobiology of Epilepsy: Ion channels
- 3.10 Neurobiology of Epilepsy: Synaptic Receptors
- 3.11 Neurobiology of Epilepsy: Antiepileptic Drug Targets
- 3.12 Treatment of Epilepsy: Preoperative Evaluation
- 3.13 Treatment of Epilepsy: Resective Surgery

SECTION 4 PSYCHIATRY

- 4.1 Limbic System
- 4.2 Major Depressive Disorder
- 4.3 Postpartum Depression
- 4.4 Bipolar Disorder
- 4.5 Bipolar Disorder (Continued)
- 4.6 Generalized Anxiety Disorder
- 4.7 Social Anxiety Disorder
- 4.8 Panic Disorder
- 4.9 Posttraumatic Stress Disorder
- 4.10 Obsessive-Compulsive Disorder
- 4.11 Somatization
- 4.12 Conversion Disorder
- 4.13 Schizophrenia
- 4.14 Alcohol Use Disorder
- 4.15 Treatment for Alcohol Use Disorder
- 4.16 Alcohol Withdrawal
- 4.17 Opioid Use Disorders: Brain Substrates of Addictive Behaviors
- 4.18 Opioid Use Disorders: Overdose Reversal
- 4.19 Opioid Withdrawal
- 4.20 Borderline Personality Disorder
- 4.21 Antisocial Personality Disorder
- 4.22 Intimate Partner Violence
- 4.23 Abuse in Later Life
- 4.24 Delirium and Acute Personality Changes
- 4.25 Delirium and Acute Personality Changes (Continued)
- 4.26 Insomnia
- 4.27 Pediatrics: Depressive Disorders
- 4.28 Pediatrics: Anxiety Disorders
- 4.29 Pediatrics: Disruptive Behavior Disorders
- 4.30 Pediatrics: Attention-Deficit/Hyperactivity Disorders
- 4.31 Pediatrics: Eating and Feeding Disorders
- 4.32 Child Abuse: Fractures in Abused Children
- 4.33 Child Abuse: Staging of Injuries and Injury Patterns

SECTION 5 HYPOTHALAMUS, PITUITARY, SLEEP, AND THALAMUS

- 5.1 Anatomic Relationships of the Hypothalamus
- 5.2 Development and Developmental Disorders of the Hypothalamus
- 5.3 Blood Supply of the Hypothalamus and Pituitary Gland
- 5.4 General Topography of the Hypothalamus
- 5.5 Overview of Hypothalamic Nuclei
- 5.6 Hypothalamic Control of the Pituitary Gland
- 5.7 Hypothalamic Control of the Autonomic Nervous System
- 5.8 Olfactory Inputs to the Hypothalamus
- 5.9 Visual Inputs to the Hypothalamus
- 5.10 Somatosensory Inputs to the Hypothalamus
- 5.11 Taste and Other Visceral Sensory Inputs to the Hypothalamus
- 5.12 Limbic and Cortical Inputs to the Hypothalamus
- 5.13 Overview of Hypothalamic Function and Dysfunction
- 5.14 Regulation of Water Balance
- 5.15 Temperature Regulation
- 5.16 Fever: Cytokines and Prostaglandins Cause the Sickness Response
- 5.17 Fever: Hypothalamic Responses During Inflammation Modulate Immune Response
- 5.18 Regulation of Food Intake, Body Weight, and Metabolism
- 5.19 Stress Response
- 5.20 Hypothalamic Regulation of Cardiovascular Function
- 5.21 Hypothalamic Regulation of Sleep
- 5.22 Narcolepsy: A Hypothalamic Sleep Disorder
- 5.23 Sleep-Disordered Breathing
- 5.24 Parasomnias
- 5.25 Divisions of the Pituitary Gland and Its Relationships to the Hypothalamus
- 5.26 Posterior Pituitary Gland
- 5.27 Anatomic Relationships of the Pituitary Gland
- 5.28 Effects of Pituitary Mass Lesions on the Visual Apparatus
- 5.29 Anterior Pituitary Hormone Deficiencies
- 5.30 Severe Anterior Pituitary Hormone Deficiencies (Panhypopituitarism)
- 5.31 Postpartum Pituitary Infarction (Sheehan Syndrome)
- 5.32 Pituitary Apoplexy
- 5.33 Thalamic Anatomy and Pathology
- 5.34 Thalamic Anatomy and Pathology (Continued)

SECTION 6 DISORDERS OF CONSCIOUSNESS (COMA)

- 6.1 Coma
- 6.2 Disorders of Consciousness
- 6.3 Emergency Management: Full Outline of Unresponsiveness Score (FOUR)
- 6.4 Emergency Management: Prognosis in Coma Related to Severe Head Injuries
- 6.5 Differential Diagnosis of Coma
- 6.6 Hypoxic-Ischemic Brain Damage
- 6.7 Vegetative State, Minimally Conscious State, and Unresponsive Wakefulness Syndrome
- 6.8 Brain Death or Death by Neurologic Criteria
- 6.9 Ventilatory Patterns and the Apnea Test

SECTION 7 BASAL GANGLIA AND MOVEMENT DISORDERS

- 7.1 Basal Nuclei (Ganglia)
- 7.2 Basal Ganglia and Related Structures
- 7.3 Schematic and Cross Section of Basal Ganglia
- 7.4 Parkinsonism: Early Manifestations
- 7.5 Parkinsonism: Successive Clinical Stages
- 7.6 Neuropathology of Parkinson Disease
- 7.7 Progressive Supranuclear Palsy
- 7.8 Corticobasal Degeneration
- 7.9 Parkinsonism: Hypothesized Role of Dopamine

- 7.10 Surgical Management of Movement Disorders
- 7.11 Hyperkinetic Movement Disorder: Idiopathic Torsion Dystonia
- 7.12 Hyperkinetic Movement Disorder: Cervical Dystonia
- 7.12 Chorea/Ballism
- 7.13 Tremor
- 7.14 Tics and Tourette Syndrome
- 7.15 Myoclonus
- 7.17 Wilson Disease
- 7.18 Psychogenic Movement Disorders
- 7.19 Cerebral Palsy

SECTION 8 CEREBELLUM AND ATAXIA

- 8.1 Cerebellum and the Fourth Ventricle
- 8.2 Cerebellum Gross Anatomy
- 8.3 Cerebellar Peduncles
- 8.4 Cerebellar Cortex and Nuclei: Neuronal Elements
- 8.5 Cerebellar Cortex: Neuronal Elements
- 8.6 Cerebellar Cortical and Corticonuclear Circuitry: Cerebellar Neuronal Circuitry
- 8.7 Cerebellar Cortical and Corticonuclear Circuitry: Circuit Diagram of Afferent Connections
- 8.8 Cerebellum Subdivisions and Afferent Pathways
- 8.9 Cerebellum Subdivisions and Afferent Pathways: Spinocerebellar Pathways
- 8.10 Cerebellar Efferent Pathways
- 8.11 Cerebellovestibular Pathways
- 8.12 Cerebellum Modular Organization
- 8.13 Cerebrocerebellar Connections
- 8.14 Cerebellar Motor Examination
- 8.15 Cerebellar Cognitive Affective Syndrome
- 8.16 Cerebellar Disorders: Differential Diagnosis I
- 8.17 Gait Disorders: Differential Diagnosis II
- 8.18 Gait Disorders: Differential Diagnosis III
- 8.19 Friedreich Ataxia
- 8.20 Friedreich Ataxia: Cardiac Abnormalities and GAA Expansion Mutation

SECTION 9 CEREBROVASCULAR CIRCULATION AND STROKE

Overview and Approach to Stroke Patient

- 9.1 Arteries to Brain: Schema
- 9.2 Arteries to Brain and Meninges
- 9.3 Temporal and Infratemporal Fossae
- 9.4 Territories of the Cerebral Arteries
- 9.5 Arteries of Brain: Lateral and Medial Views
- 9.6 Arteries of Brain: Frontal View and Section
- 9.7 Types of Stroke
- 9.8 Temporal Profile of Transient Ischemic Attack (TIA) and Completed Infarction
- 9.9 Clinical Evaluation and Treatment of Stroke
- 9.10 Clinical Evaluation and Treatment of Stroke (Continued)
- 9.11 Uncommon Etiologic Mechanisms of Stroke
- Anterior Circulation Ischemia
- 9.12 Common Sites of Cerebrovascular Occlusive Disease
- 9.13 Other Etiologies of Carotid Artery Disease
- 9.14 Clinical Manifestations of Carotid Artery Disease
- 9.15 Occlusion of Middle and Anterior Cerebral Arteries
- 9.16 Diagnosis of Internal Carotid Disease
- 9.17 Diagnosis of Carotid Artery Disease
- 9.18 Carotid Endarterectomy
- 9.19 Endovascular ICA Angioplasty and Stenting Using a Protective Device
- Vertebral Basilar System Disorders

- 9.20 Arterial Distribution to the Brain: Basal View
- 9.21 Arteries of Posterior Cranial Fossa
- 9.22 Clinical Manifestations of Vertebrobasilar Territory Ischemia
- 9.23 Intracranial Occlusion of Vertebral Artery
- 9.24 Occlusion of Basilar Artery and Branches
- 9.25 Occlusion of Top-of-the-Basilar and Posterior Cerebral Arteries
- Brain Emboli
- 9.26 Cardiac Sources of Brain Emboli
- 9.27 Uncommon Cardiac Mechanisms in Stroke
- Lacunar Stroke
- 9.28 Lacunar Infarction
- 9.29 Risk Factors for Cardiovascular Disease
- Other
- 9.30 Hypertensive Encephalopathy
- 9.31 Hypoxia
- Coagulopathies
- 9.32 Role of Platelets in Arterial Thrombosis
- 9.33 Inherited Thrombophilias
- 9.34 Antiphospholipid Antibody Syndrome
- Venous Sinus Thrombosis
- 9.35 Meninges and Superficial Cerebral Veins
- 9.36 Intracranial Venous Sinuses
- 9.37 Diagnosis of Venous Sinus Thrombosis
- Intracerebral Hemorrhage
- 9.38 Pathogenesis and Types
- 9.39 Clinical Manifestations of Intracerebral Hemorrhage Related to Site
- 9.40 Vascular Malformations
- Intracranial Aneurysms and Subarachnoid Hemorrhage
- 9.41 Distribution and Clinical Manifestations of Congenital Aneurysm Rupture
- 9.42 Giant Congenital Aneurysms
- 9.43 Ophthalmologic Manifestations of Cerebral Aneurysms
- 9.44 Approach to Internal Carotid Aneurysms
- 9.45 Flow Diversion Stent for Treatment of Unruptured Intracranial Aneurysm
- Pediatrics
- 9.46 Pediatric Cerebrovascular Disease
- Rehabilitation
- 9.47 Introduction and Initial Stroke Rehabilitation
- 9.48 Aphasia Rehabilitation
- 9.49 Other Rehabilitative Issues: Gait Training, Upper Limb Function, Locked-in Syndrome
- 9.50 Other Rehabilitative Issues: Dysphagia

SECTION 10 MULTIPLE SCLEROSIS AND OTHER CENTRAL NERVOUS SYSTEM AUTOIMMUNE DISORDERS

Multiple Sclerosis

- 10.1 Overview
- 10.2 Clinical Manifestations
- 10.3 Diagnosis: Typical MRI Findings—Brain
- 10.4 Diagnosis: Typical MRI Findings—Spinal Cord
- 10.5 Diagnosis: Visual Evoked Potential and Spinal Fluid Analysis
- 10.6 Pathophysiology
- 10.7 Pathophysiology (Continued)
- 10.8 Relapses: Steps 1 to 5
- 10.9 Relapses: Step 6
- 10.10 Relapses: Steps 7 to 8
- 10.11 Relapses: Consequences
- 10.12 Enigma of Progressive Multiple Sclerosis
- 10.13 Pathology
- 10.14 Treatment

Neuroimmunologic Syndromes

- 10.15 Neuromyelitis Optica, Acute Disseminated Encephalomyelitis, and Acute Hemorrhagic Leukoencephalitis—Radiologic Findings
- 10.16 Neuromyelitis Optica, Acute Disseminated Encephalomyelitis, and Acute Hemorrhagic Leukoencephalitis—Histopathologic Findings
- 10.17 Introduction to Autoimmune Neurologic Syndromes
- 10.18 Stiff-Person Syndrome Spectrum Disorder
- 10.19 Autoimmune and Paraneoplastic Neurologic Syndromes
- 10.20 Autoimmune and Paraneoplastic Neurologic Syndromes (Continued)
- 10.21 Autoimmune Neurologic Syndromes: Central and Peripheral Nervous System Manifestations
- 10.22 Autoimmune Neurologic Syndromes: Central and Peripheral Nervous System Manifestations (Continued)

SECTION 11 INFECTIONS OF THE NERVOUS SYSTEM

- 11.1 Bacterial Meningitis I
- 11.2 Bacterial Meningitis II
- 11.3 Brain Abscess
- 11.4 Parameningeal Infections
- 11.5 Infections in the Immunocompromised Host: Progressive Multifocal Leukoencephalopathy and Nocardiosis
- 11.6 Infections in the Immunocompromised Host: Listeriosis and Toxoplasmosis
- 11.7 Neurocysticercosis
- 11.8 Spirochetal Infections: Neurosyphilis
- 11.9 Spirochetal Infections: Lyme Disease
- 11.10 Tuberculosis of Brain and Spine
- 11.11 Tetanus
- 11.12 Aseptic Meningitis and Select Arthropod-Borne Virus Infections
- 11.13 Human Immunodeficiency Virus: Primary Infection of the Nervous System
- 11.14 Human Immunodeficiency Virus: Life Cycle and Antiretroviral Medications
- 11.15 Poliomyelitis
- 11.16 Acute Flaccid Paralysis
- 11.17 Herpes Zoster
- 11.18 Herpes Simplex Virus Encephalitis and Rabies
- 11.19 Parasitic Infections: Cerebral Malaria and African Trypanosomiasis
- 11.20 Parasitic Infections: Trichinosis (Trichinellosis)
- 11.21 Parasitic Infections: Cryptococcal Meningitis
- 11.22 Creutzfeldt-Jakob Disease
- 11.23 Neurosarcoidosis
- 11.24 Neurologic Complications of COVID-19

SECTION 12 NEURO-ONCOLOGY

- 12.1 Clinical Presentations of Brain Tumors
- 12.2 WHO Classification of CNS Tumors
- 12.3 Gliomas
- 12.4 Glioblastoma
- 12.5 Pediatric Brain Tumors: Medulloblastoma
- 12.6 Pediatric Brain Tumors: Brainstem Glioma
- 12.7 Ependymomas
- 12.8 Metastatic Tumors to Brain
- 12.9 Meningiomas
- 12.10 Meningiomas (Continued)
- 12.11 Pituitary Tumors
- 12.12 Clinically Nonfunctioning Pituitary Tumor
- 12.13 Craniopharyngioma
- 12.14 Tumors of Pineal Region
- 12.15 Vestibular Schwannomas

- 12.16 Removal of Vestibular Schwannoma
- 12.17 Intraventricular Tumors
- 12.18 Chordomas
- 12.19 Differential Diagnosis of CNS Tumors
- 12.20 Spinal Tumors: Classification
- 12.21 Spinal Tumors: Clinical Profile
- 12.22 Treatment Modalities

SECTION 13 HEADACHE

- 13.1 Overview of Headaches
- 13.2 Migraine Pathophysiology
- 13.3 Migraine Presentation
- 13.4 Migraine Aura
- 13.5 Migraine Management
- 13.6 Trigeminal Autonomic Cephalalgias: Cluster Headache
- 13.7 Trigeminal Autonomic Cephalalgias: Paroxysmal Hemicrania
- 13.8 Tension-Type Headache and Other Benign Episodic and Chronic Headaches
- 13.9 Pediatric Headache
- 13.10 Cranial Neuralgias: Trigeminal Neuralgia
- 13.11 Other Cranial Neuralgias
- 13.12 Idiopathic Intracranial Hypertension, Pseudotumor Cerebri
- 13.13 Intracranial Hypotension/Low Cerebrospinal Fluid Pressure Headache
- 13.14 Giant Cell Arteritis
- 13.15 Contiguous Structure Headaches
- 13.16 Thunderclap Headache and Other Headaches Presenting in the Emergency Department
- 13.17 Headaches Presenting in the Emergency Department (Continued)
- 13.18 Headaches Presenting in the Emergency Department (Continued)
- 13.19 Headaches Presenting in the Emergency Department (Continued)

SECTION 14 HEAD TRAUMA

- 14.1 Skull: Anterior View
- 14.2 Skull: Lateral View
- 14.3 Skull: Midsagittal Section
- 14.4 Calvaria
- 14.5 External Aspect of Skull Base
- 14.6 Internal Aspects of Base of Skull: Bones
- 14.7 Internal Aspects of Base of Skull: Orifices
- 14.8 Skull Injuries
- 14.9 Concussion
- 14.10 Acute Epidural Hematoma
- 14.11 Acute Subdural Hematoma
- 14.12 CT Scans and MR Images of Intracranial Hematomas
- 14.13 Vascular Injury
- 14.14 Glasgow Coma Score
- 14.15 Initial Assessment and Management of Head Injury
- 14.16 Neurocritical Care and Management After Traumatic Brain Injury: Devices for Monitoring Intracranial Pressure
- 14.17 Neurocritical Care and Management: Decompressive Craniectomy
