

1 Maximizing Test Performance

SECTION 1 Respiratory

2 Respiratory Embryology and Physiology

3 Respiratory Distress Syndrome, Transient Tachypnea of the Newborn, and Bronchopulmonary Dysplasia

4 Aspiration, Pneumonia, and Persistent Pulmonary Hypertension

5 Pleural Disorders and Additional Causes of Respiratory Distress

6 Apnea of Prematurity and Neonatal Respiratory Depression

7 Assisted Ventilation, ECMO, and Pharmacologic Agents

SECTION 2 Cardiovascular

8 Cardiac Development

9 Cardiovascular Physiology

10 Presentation of Congenital Heart Disease

11 Cardiopulmonary Dysfunction

12 Electrocardiography, Electrophysiology, and Dysrhythmias

13 Pharmacologic Therapy of Heart Disease

SECTION 3 Neurology and Neurodevelopment

14 Neurologic Evaluation

15 Development of the Nervous System

16 Neonatal Encephalopathy

17 Intracranial Hemorrhage and Vascular Injury

18 Neonatal Neurology Cranial and Neurologic Trauma

19 Neonatal Seizures

20 Central Nervous System Infections

21 Neonatal Abstinence Syndromes and Substance Exposure In Utero

22 Hypotonia and Other Aspects

23 Neurodevelopmental Impairments

24 Causes and Effects of Environment on Neurodevelopmental Impairment

25 Clinical Features of Neurodevelopmental Impairment

SECTION 4 Immunology and Infectious Diseases

26 Development of the Immune System

27 Components of the Immune System

28 Abnormal Immune System Development

29 Infections of Organ Systems

30 Causative Agents of Infections

31 Prevention of Infections and Immunization

SECTION 5 Nutrition

32 Nutrition and Growth

33 Minerals, Vitamins, and Trace Minerals

34 Enteral Nutrition

35 Parenteral Nutrition

SECTION 6 Gastroenterology and Bilirubin

36 Gastrointestinal Development

37 Gastrointestinal Anomalies

38 Acquired Disorders of Gastrointestinal Tract

39 Liver Disease, Abdominal Masses, and Ascites in the Newborn

40 Bilirubin Biochemistry Metabolism and Measurement

41 Bilirubin Toxicity

42 Physiologic and Breast Milk Jaundice

SECTION 7 Maternal–Fetal Medicine

43 Pregnancy

44 Fetal Assessment and Treatment

45 Labor and Delivery

SECTION 8 Resuscitation and Stabilization

46 Resuscitation, Stabilization, and Asphyxia

SECTION 9 Genetics and Dysmorphism

47 Molecular Genetics

48 Patterns of Congenital Disorders

49 Nongenetic Etiologies for Congenital Defects

50	Evaluation of Infants With Congenital Anomalies
51	Inborn Errors of Metabolism
	SECTION 10 Water, Salt, Renal
52	Water/Electrolyte Metabolism and Acid–Base Balance
53	Abnormal Renal Development
	SECTION 11 Endocrine, Metabolic, Thermal
54	Normal and Abnormal Sexual Differentiation
55	Adrenal Disorders
56	Thyroid Disorders
57	Glucose Metabolism
58	Calcium, Phosphorus, and Magnesium Metabolism
59	Thermoregulation
	SECTION 12 Hematology and Oncology
60	Erythrocytes
61	White Blood Cells
62	Platelets and Coagulation
63	Transfusion Therapy in Neonates
64	Solid Tumors and Leukemias
	SECTION 13 Head (Ears, Eyes, Nose, Throat), Neck, and Skin
65	Eye Development, Retinopathy of Prematurity
66	Ear Development and Anomalies
67	Nose, Mouth, and Throat Development and Anomalies
68	Skin Development and Function
69	Neonatal Skin Lesions
	SECTION 14 Surgical and Complex NICU Patient Management
70	Neonatal Surgical Management
71	Complex Neonatal Patient Management
	SECTION 15 Basic Pharmacology Principles
72	Drug Disposition and Pharmacokinetics
73	Clinical Toxicology
74	Indications, Mechanisms, and Adverse Reactions for Common Drugs
	SECTION 16 Management of Neonatal Care Systems
75	Organization of Perinatal Care
76	Ethical and Legal Issues in Neonatology
	SECTION 17 Scholarly Activities and Quality Improvement
77	Biostatistics in Research
78	Epidemiology and Clinical Research Design
79	Applying Research to Clinical Practice
80	Quality Improvement
81	Principles of Teaching and Learning
82	Ethics in Research
	SECTION 18 Diagnostic Imaging
83	Neurologic Imaging
84	Chest Imaging
85	Abdominal Imaging
86	Miscellaneous Imaging
	Questions Section
