

SECTION 1 ANATOMY OF THE URINARY TRACT

- 1.1 Kidney: Position and Relations (Anterior Views)
- 1.2 Kidney: Position and Relations (Posterior Views)
- 1.3 Kidney: Position and Relations (Transverse Sections)
- 1.4 Kidney: Gross Structure
- 1.5 Renal Fascia
- 1.6 Ureters: Position, Relations, Gross Structure
- 1.7 Bladder: Position, Relations, Gross Structure (Male)
- 1.8 Bladder: Position, Relations, Gross Structure (Female)
- 1.9 Bladder: Position, Relations, Gross Structure (Coronal Cross Sections)
- 1.10 Renal Vasculature: Renal Artery and Vein in Situ
- 1.11 Renal Vasculature: Renal Artery Segmental Branches and Intrarenal Arteries
- 1.12 Renal Vasculature: Variations in Renal Artery and Vein
- 1.13 Vasculature of Ureters and Bladder
- 1.14 Innervation of Kidneys, Ureters, and Bladder
- 1.15 Innervation Pathways of the Kidneys and Upper Ureter
- 1.16 Innervation Pathways of the Ureter and Bladder
- 1.17 Lymphatics of Urinary System
- 1.18 Overview of the Nephron
- 1.19 Renal Microvasculature
- 1.20 Glomerulus: Structure and Histology
- 1.21 Glomerulus: Fine Structure
- 1.22 Glomerulus: Electron Microscopy
- 1.23 Proximal Tubule
- 1.24 Thin Limb
- 1.25 Distal Tubule
- 1.26 Collecting Duct
- 1.27 Renal Pelvis, Ureter, and Bladder

SECTION 2 NORMAL AND ABNORMAL DEVELOPMENT

- 2.1 Development of Kidney
- 2.2 Development of Kidney: Nephron Formation
- 2.3 Development of Bladder and Ureter: Formation of Cloaca
- 2.4 Development of Bladder and Ureter: Septation Incorporation of Ureters, and Maturation
- 2.5 Kidney Ascent and Ectopia: Normal Kidney Ascent and Pelvic Kidney
- 2.6 Renal Ascent and Ectopia: Thoracic and Crossed Ectopic Kidney
- 2.7 Renal Rotation and Malrotation
- 2.8 Anomalies in Number of Kidneys: Bilateral Renal Agenesis
- 2.9 Anomalies in Number of Kidneys: Unilateral Renal Agenesis
- 2.10 Anomalies in Number of Kidneys: Supernumerary Kidney
- 2.11 Renal Fusion
- 2.12 Renal Dysplasia
- 2.13 Renal Hypoplasia
- 2.14 Simple Cysts: Bosniak Classification of Cystic Kidney Masses
- 2.15 Simple Cysts: Bosniak Classification of Kidney Cysts
- 2.16 Polycystic Kidney Disease: Gross Appearance
- 2.17 Polycystic Kidney Disease: Radiographic Findings
- 2.18 Medullary Sponge Kidney
- 2.19 Nephronophthisis/Medullary Cystic Kidney Disease Complex
- 2.20 Retrocaval Ureter: Radiographic Findings and Laparoscopic Repair
- 2.21 Retrocaval Ureter: Normal Development of the Inferior Vena Cava
- 2.22 Vesicoureteral Reflux: Mechanism and Grading
- 2.23 Vesicoureteral Reflux: Voiding Cystourethrograms
- 2.24 Ureteral Duplication: Complete
- 2.25 Ureteral Duplication: Incomplete
- 2.26 Ectopic Ureter
- 2.27 Ureterocele: Gross and Fine Appearance
- 2.28 Ureterocele: Radiographic Findings
- 2.29 Prune Belly Syndrome: Appearance of Abdominal Wall

- 2.30 Prune Belly Syndrome: Appearance of Kidneys, Ureters, and Bladder
- 2.31 Epispadias Exstrophy Complex
- 2.32 Epispadias Exstrophy Complex: Bladder Exstrophy
- 2.33 Bladder Duplication and Septation
- 2.34 Anomalies of the Urachus
- 2.35 Posterior Urethral Valves: Congenital Bladder Outlet Obstruction
- 2.36 Posterior Urethral Valves: Radiographic Findings

SECTION 3 PHYSIOLOGY

- 3.1 Basic Functions and Homeostasis
- 3.2 Clearance and Renal Plasma Flow
- 3.3 Glomerular Filtration Rate
- 3.4 Glomerular Filtration Rate: Calculation
- 3.5 Secretion and Reabsorption: Tubular Reabsorption and Saturation Kinetics
- 3.6 Secretion and Reabsorption: Fractional Excretion (Clearance Ratios)
- 3.7 Renal Handling of Sodium and Chloride: Nephron Sites of Sodium Reabsorption
- 3.8 Renal Handling of Sodium and Chloride: Response to Extracellular Fluid Contraction
- 3.9 Renal Handling of Sodium and Chloride: Response to Extracellular Fluid Expansion
- 3.10 Renal Handling of Potassium
- 3.11 Renal Handling of Calcium, Phosphate, and Magnesium
- 3.12 Countercurrent Multiplication: Model of the Countercurrent Multiplier
- 3.13 Countercurrent Multiplication: Models to Demonstrate Principle of Countercurrent Exchange System of Vasa Recta in Minimizing Dissipation of Medullary Osmotic Gradient
- 3.14 Urine Concentration and Dilution: Long-Looped Nephron (ADH Present)
- 3.15 Urine Concentration and Dilution: Long-Looped Nephron (ADH Absent)
- 3.16 Antidiuretic Hormone
- 3.17 Tubuloglomerular Feedback and Modulation of Renin Release
- 3.18 Tubuloglomerular Feedback and Renin-Angiotensin-Aldosterone System
- 3.19 Acid-Base Balance: Roles of Chemical Buffers, Lungs, and Kidneys in Acid-Base Handling
- 3.20 Acid-Base Balance: Renal Bicarbonate Reabsorption
- 3.22 Acid-Base Balance: Acidosis and Alkalosis
- 3.23 Additional Functions: Erythropoiesis and Vitamin D
- 3.24 Renal Tubular Acidosis: Proximal
- 3.25 Renal Tubular Acidosis: Classic Distal
- 3.26 Nephrogenic Diabetes Insipidus
- 3.27 Nephrogenic Diabetes Insipidus: Major Causes and Symptoms

SECTION 4 KIDNEY DISEASES

- 4.1 Overview of Acute Kidney Injury: Causes
- 4.2 Overview of Acute Kidney Injury: Possible Urine Sediment Findings
- 4.3 Acute Tubular Necrosis: Causes, Pathophysiology, and Clinical Features
- 4.4 Acute Tubular Necrosis: Histopathologic Findings
- 4.5 Overview of Nephrotic Syndrome: Pathophysiology
- 4.6 Overview of Nephrotic Syndrome: Causes
- 4.7 Overview of Nephrotic Syndrome: Presentation and Diagnosis
- 4.8 Minimal Change Disease: Causes and Presentation
- 4.9 Minimal Change Disease: Histopathologic Findings
- 4.10 Focal Segmental Glomerulosclerosis: Causes, Clinical Features, and Histopathologic Findings
- 4.11 Focal Segmental Glomerulosclerosis: Histopathologic Findings (Continued)
- 4.12 Membranous Nephropathy: Causes and Clinical Features
- 4.13 Membranous Nephropathy: Histopathologic Findings
- 4.14 Overview of Glomerulonephritis: Clinical Features and Histopathologic Findings
- 4.15 Overview of Glomerulonephritis: Histopathologic Findings (Continued)
- 4.16 Immunoglobulin A Nephropathy: Causes and Clinical Features
- 4.17 Immunoglobulin A Nephropathy: Histopathologic Findings
- 4.18 Immunoglobulin A Nephropathy: Histopathologic Findings (Continued)
- 4.19 Postinfectious Glomerulonephritis: Causes and Clinical Features
- 4.20 Postinfectious Glomerulonephritis: Histopathologic Findings
- 4.21 Postinfectious Glomerulonephritis: Histopathologic Findings (Continued)

- 4.22 Membranoproliferative Glomerulonephritis: Causes, Features, and Assessment
- 4.23 Membranoproliferative Glomerulonephritis: Classical Pathway of Complement Activation
- 4.24 Membranoproliferative Glomerulonephritis: Histopathologic Findings
- 4.25 Rapidly Progressive Glomerulonephritis
- 4.26 Hereditary Nephritis (Alport Syndrome)/Thin Basement Membrane Nephropathy: Pathophysiology and Clinical Features
- 4.27 Hereditary Nephritis (Alport Syndrome)/Thin Basement Membrane Nephropathy: Electron Microscopy Findings
- 4.28 Acute Interstitial Nephritis: Causes and Clinical Features
- 4.29 Acute Interstitial Nephritis: Histopathologic Findings
- 4.30 Chronic Tubulointerstitial Nephritis and Analgesic Nephropathy
- 4.31 Chronic Tubulointerstitial Nephritis: Histopathologic Findings
- 4.32 Thrombotic Microangiopathy: General Features,
- 4.33 Thrombotic Microangiopathy: Hemolytic Uremic Syndrome
- 4.34 Thrombotic Microangiopathy: Thrombotic Thrombocytopenic Purpura
- 4.35 Renal Vein Thrombosis
- 4.36 Renal Artery Stenosis: Pathophysiology of Renovascular Hypertension
- 4.37 Renal Artery Stenosis: Causes
- 4.38 Congestive Heart Failure: Types of Left Heart Failure and Effects on Renal Function
- 4.39 Congestive Heart Failure: Effects of Left Heart Failure on Renal Blood Flow and Tubular Function
- 4.40 Hepatorenal Syndrome: Proposed Pathophysiology
- 4.41 Hepatorenal Syndrome: Symptoms and Diagnosis
- 4.42 Chronic and Malignant Hypertension: Major Causes
- 4.43 Chronic and Malignant Hypertension: Renal Histopathology (Chronic)
- 4.44 Chronic and Malignant Hypertension: Renal Histopathology (Malignant)
- 4.45 Diabetic Nephropathy: Diabetes Mellitus
- 4.46 Diabetic Nephropathy
- 4.47 Amyloidosis: Deposition Sites and Manifestations
- 4.48 Amyloidosis: Histopathologic Findings
- 4.49 Lupus Nephritis: Diagnostic Criteria
- 4.50 Lupus Nephritis: Renal Histopathology (Class I and II Lesions)
- 4.51 Lupus Nephritis: Renal Histopathology (Class III and IV Lesions)
- 4.52 Lupus Nephritis: Renal Histopathology (Class V Lesions)
- 4.53 Myeloma Nephropathy: Pathophysiology and Clinical Findings
- 4.54 Myeloma Nephropathy: Histopathologic Findings
- 4.55 HIV-Associated Nephropathy: Light Microscopy Findings
- 4.56 HIV-Associated Nephropathy: Electron Microscopy Findings
- 4.57 HIV-Associated Nephropathy: Mechanisms of Infection and Antiretroviral Therapy
- 4.58 Preeclampsia: Clinical Definition and Potential Mechanism of Pathogenesis
- 4.59 Preeclampsia: Renal Pathology
- 4.60 Preeclampsia: HELLP Syndrome and Eclampsia
- 4.61 Immunoglobulin A Vasculitis: Diagnostic Criteria
- 4.62 Immunoglobulin A Vasculitis: Additional Clinical Features
- 4.63 Fabry Disease
- 4.64 Cystinosis: Pathophysiology and Renal Fanconi Syndrome
- 4.65 Cystinosis: Extrarenal Manifestations
- 4.66 Overview of Chronic Kidney Disease: Staging System and Major Causes
- 4.67 Overview of Chronic Kidney Disease: Normal Calcium and Phosphate Metabolism
- 4.68 Overview of Chronic Kidney Disease: Calcium and Phosphate Metabolism
- 4.69 Overview of Chronic Kidney Disease: Mechanism of Progression and Complications
- 4.70 Overview of Chronic Kidney Disease: Uremia

SECTION 5 URINARY TRACT INFECTIONS

- 5.1 Acute Bacterial Cystitis: Risk Factors
- 5.2 Acute Bacterial Cystitis: Common Symptoms and Tests
- 5.3 Acute Bacterial Cystitis: Evaluation
- 5.4 Acute Bacterial Cystitis: Treatment
- 5.5 Pyelonephritis: Risk Factors and Major Findings

- 5.6 Pyelonephritis: Pathology
- 5.7 Bacteriuria: Management of Asymptomatic Bacteriuria
- 5.8 Urinary Microbiome: Overview and Risk Factors
- 5.9 Urinary Microbiome: Specimen Collection and Sequencing
- 5.10 Intrarenal and Perinephric Abscesses
- 5.11 Tuberculosis: Infection and Extrapulmonary Spread
- 5.12 Tuberculosis: Urinary Tract
- 5.13 Schistosomiasis: Life Cycle of *Schistosoma haematobium*
- 5.14 Schistosomiasis: Effects of Chronic *Schistosoma haematobium* Infection

SECTION 6 URINARY TRACT OBSTRUCTIONS

- 6.1 Obstructive Uropathy: Etiology
- 6.2 Obstructive Uropathy: Sequelae
- 6.3 Urolithiasis: Formation of Kidney Stones
- 6.4 Urolithiasis: Major Sites of Kidney Stone Impaction
- 6.5 Urolithiasis: Appearance of Kidney Stones
- 6.6 Ureteropelvic Junction Obstruction
- 6.7 Ureteral Strictures

SECTION 7 TRAUMATIC INJURIES

- 7.1 Renal Injuries: Grading System and Renal Parenchymal Injuries
- 7.2 Renal Injuries: Renal Hilar Injuries
- 7.3 Ureteral Injuries
- 7.4 Bladder Injuries: Extraperitoneal Bladder Ruptures
- 7.5 Bladder Injuries: Intraperitoneal Bladder Ruptures

SECTION 8 VOIDING DYSFUNCTION

- 8.1 Normal Lower Urinary Tract Function
- 8.2 Lower Urinary Tract Dysfunction
- 8.3 Stress Urinary Incontinence
- 8.4 Urodynamics: Equipment and Setup for Urodynamic Studies
- 8.5 Urodynamics: Sample Urodynamic Recordings

SECTION 9 NEOPLASMS

- 9.1 Benign Renal Tumors: Angiomyolipoma
- 9.2 Benign Renal Tumors: Papillary Adenoma and Oncocytoma
- 9.3 Malignant Renal Tumors: Risk Factors and Radiographic Findings
- 9.4 Malignant Renal Tumors: Staging System and Sites of Metastasis
- 9.5 Malignant Renal Tumors: Gross Pathologic Findings
- 9.6 Malignant Renal Tumors: Histopathologic Findings
- 9.7 Wilms Tumor: Genetics, Presentation, and Radiographic Findings
- 9.8 Wilms Tumor: Gross Appearance and Histopathologic Findings
- 9.9 Tumors of the Renal Pelvis and Ureter: Risk Factors and Radiographic Appearance
- 9.10 Tumors of the Renal Pelvis and Ureter: Appearance (Ureteroscopic, Gross, and Microscopic) and Staging System
- 9.11 Tumors of the Bladder: Risk Factors, Symptoms, and Physical Examination
- 9.12 Tumors of the Bladder: Cystoscopic and Radiographic Appearance
- 9.13 Tumors of the Bladder: Histopathologic Findings and Staging System

SECTION 10 THERAPEUTICS

- 10.1 Osmotic Diuretics
- 10.2 Carbonic Anhydrase Inhibitors
- 10.3 Loop Diuretics
- 10.4 Thiazide Diuretics
- 10.5 Potassium-Sparing Diuretics
- 10.6 Inhibitors of the Renin-Angiotensin System
- 10.7 Renal Biopsy: Indications and Structure of Typical Spring-Loaded Needle
- 10.8 Renal Biopsy: Procedure
- 10.9 Hemodialysis, Peritoneal Dialysis, and Continuous Therapies: Hemodialysis
- 10.10 Hemodialysis, Peritoneal Dialysis, and Continuous Therapies: Vascular Access for Hemodialysis
- 10.11 Hemodialysis, Peritoneal Dialysis, and Continuous Therapies: Peritoneal Dialysis
- 10.12 Extracorporeal Shock Wave Lithotripsy

- 10.13 Percutaneous Nephrolithotomy: Creation of Access Tract
- 10.14 Percutaneous Nephrolithotomy: Nephroscope and Sonotrode
- 10.15 Percutaneous Nephrolithotomy: Ultrasonic Lithotripsy of Large Stones
- 10.16 Pyeloplasty and Endopyelotomy
- 10.17 Renal Revascularization: Endovascular Therapies
- 10.18 Renal Revascularization: Surgical Therapies
- 10.19 Simple and Radical Nephrectomy: Open Nephrectomy
- 10.20 Simple and Radical Nephrectomy: Open Simple Nephrectomy
- 10.21 Simple and Radical Nephrectomy: Laparoscopic Radical Nephrectomy
- 10.22 Partial Nephrectomy: Open Partial Nephrectomy
- 10.23 Partial Nephrectomy: Laparoscopic Partial Nephrectomy
- 10.24 Renal Ablation: Laparoscopic Cryoablation (Retroperitoneal Approach)
- 10.25 Renal Ablation: Percutaneous Cryoablation
- 10.26 Kidney Transplantation: Recipient Operation
- 10.27 Kidney Transplantation: Kidney Paired Donation
- 10.28 Kidney Transplantation: Mechanism of Action of Immunosuppressive Medications
- 10.29 Kidney Transplantation: Causes of Graft Dysfunction in Immediate Posttransplant Period
- 10.30 Kidney Transplantation: Causes of Graft Dysfunction in Early Posttransplant Period
- 10.31 Kidney Transplantation: Acute Rejection (Pathologic Findings)
- 10.32 Kidney Transplantation: Calcineurin Inhibitor Nephrotoxicity (Histopathologic Findings)
- 10.33 Kidney Transplantation: Causes of Graft Dysfunction in Late Posttransplant Period
- 10.34 Ureteroscopy: Device Design and Deployment
- 10.35 Ureteroscopy: Stone Fragmentation and Extraction
- 10.36 Ureteral Reimplantation: Boari Flap
- 10.37 Ureteral Reconstruction: Robotic Buccal Ureteroplasty
- 10.38 Cystoscopy: Cystoscope Design
- 10.39 Cystoscopy: Cystoscopic Views
- 10.40 Transurethral Resection of Bladder Tumor: Equipment and Procedure
- 10.41 Transurethral Resection of Bladder Tumor: Procedure

SECTION 11 PROSTATE

- 11.1 Benign Prostatic Hyperplasia: Histology
- 11.2 Benign Prostatic Hyperplasia: Sites of Hyperplasia and Etiology
- 11.3 Benign Prostatic Hyperplasia: Complications and Medical Treatment
- 11.4 Carcinoma of Prostate: Epidemiology, Prostate-Specific Antigen, Staging, and Grading
- 11.5 Carcinoma of Prostate: Metastasis
- 11.6 Carcinoma of Prostate: Diagnosis, Treatment, and Palliation
- 11.7 Sarcoma of Prostate
- 11.8 Benign Prostate Surgery: Suprapubic
- 11.9 Benign Prostate Surgery: Retropubic
- 11.10 Benign Prostate Surgery: Perineal
- 11.11 Benign Prostate Surgery: Transurethral Resection
- 11.12 Enucleation of Prostate
- 11.13 Robotic Simple Prostatectomy
- 11.14 Interventional Prostate Artery Embolization
- 11.15 Malignant Prostate Surgery: Retropubic
- 11.16 Malignant Prostate Surgery: Perineal
- 11.17 Malignant Prostate Surgery: Laparoscopic and Robotic
