

Part I. Introduction to Hematology

1. An Overview of Clinical Laboratory Hematology
2. Patient Safety in Hematology and Hemostasis
3. Quality Assurance in Hematology and Hemostasis Testing

Part II. Blood Cell Production, Structure, and Function

4. Cell Structure and Function
5. Hematopoiesis
6. Erythrocyte Production and Destruction
7. Erythrocyte Metabolism and Membrane Structure and Function
8. Hemoglobin Metabolism
9. Iron Kinetics and Laboratory Assessment
10. Leukocyte Development, Kinetics, and Functions
11. Platelet Production, Structure, and Function

Part III. Laboratory Evaluation of Blood Cells

12. Manual, Semiautomated, and Point-of-Care Testing in Hematology
13. Automated Blood Cell Analysis
14. Examination of the Peripheral Blood Film and Correlation With the Complete Blood Count
15. Bone Marrow Examination

Part IV. Erythrocyte Disorders

16. Anemias: Red Blood Cell Morphology and Approach to Diagnosis
17. Disorders of Iron Kinetics and Heme Metabolism
18. Anemias Caused by Defects of DNA Metabolism
19. Bone Marrow Failure
20. Introduction to Increased Destruction of Erythrocytes
21. Intrinsic Defects Leading to Increased Erythrocyte Destruction
22. Extrinsic Defects Leading to Increased Erythrocyte Destruction - Nonimmune Causes
23. Extrinsic Defects Leading to Increased Erythrocyte Destruction - Immune Causes
24. Hemoglobinopathies (Structural Defects in Hemoglobin)
25. Thalassemias

Part V. Leukocyte Disorders

26. Nonmalignant Leukocyte Disorders
27. Introduction to Hematologic Neoplasms
28. Flow Cytometric Analysis in Hematologic Disorders
29. Molecular Diagnostics in Hematopathology
30. Cytogenetics
31. Acute Leukemias
32. Myeloproliferative Neoplasms
33. Myelodysplastic Neoplasms
34. Mature Lymphoid Neoplasms

Part VI. Hemostasis and Thrombosis

35. Normal Hemostasis
36. Hemorrhagic Disorders and Laboratory Assessment
37. Qualitative Disorders of Platelets and Vasculature
38. Quantitative Disorders of Platelets: Thrombocytopenia and Thrombocytosis
39. Thrombotic Disorders and Laboratory Assessment
40. Antithrombotic Therapies and Laboratory Assessment
41. Laboratory Evaluation of Hemostasis
42. Hemostasis and Coagulation Instrumentation

Part VII. Hematology and Hemostasis in Selected Populations

43. Hematology and Hemostasis in the Pediatric, Pregnant, Geriatric, and Transgender Populations

Appendix A. Abbreviations

Appendix B. List of Formulas

Appendix C. Answers

Appendix D. Glossary
