

SECTION 1 ANATOMY AND EMBRYOLOGY

- 1.1 Respiratory System
- 1.2 Bony Thorax
- 1.3 Rib Characteristics and Costovertebral Articulations
- 1.4 Anterior Thoracic Wall
- 1.5 Anterior Thoracic Wall (Continued)
- 1.6 Anterior Thoracic Wall: Internal View
- 1.7 Dorsal Aspect of the Thorax
- 1.8 Dorsal Aspect of the Thorax: Posterior and Lateral Views
- 1.9 Intercostal Nerves and Arteries
- 1.10 Diaphragm (Viewed From Above)
- 1.11 Topography of the Lungs (Anterior View)
- 1.12 Topography of the Lungs (Posterior View)
- 1.13 Medial Surface of the Lungs
- 1.14 Bronchopulmonary Segments
- 1.15 Bronchopulmonary Segments in Relationship to Ribs
- 1.16 Relationships of the Trachea and Main Bronchi
- 1.17 Bronchial Arteries
- 1.18 Mediastinum: Right Lateral View
- 1.19 Mediastinum: Left Lateral View
- 1.20 Innervation of the Lungs and Tracheobronchial Tree
- 1.21 Structure of the Trachea and Major Bronchi
- 1.22 Intrapulmonary Airways
- 1.23 Structure of Bronchi and Bronchioles: Light Microscopy
- 1.24 Ultrastructure of the Tracheal, Bronchial, and Bronchiolar Epithelium
- 1.25 Bronchial Submucosal Glands
- 1.26 Intrapulmonary Blood Circulation
- 1.27 Fine Structure of Alveolar Capillary Unit: Ultrastructure of Pulmonary Alveoli and Capillaries
- 1.28 Fine Structure of Alveolar Capillary Unit: Type II Alveolar Cell and Surface-Active Layer
- 1.29 Fine Structure of Alveolar Capillary Unit: Pulmonary Vascular Endothelium
- 1.30 Lymphatic Drainage of the Lungs and Pleura
- 1.31 Lymphatic Drainage of the Lungs and Pleura: Distribution of Lymphatics in Lungs and Pleura
- 1.32 Pulmonary Immunology: Lymphocytes, Mast Cells, Eosinophils, and Neutrophils
- 1.33 Pulmonary Stem Cells
- 1.34 Pulmonary Microbiome

Development of the Lower Respiratory System

- 1.35 Developing Respiratory Tract and Pharynx
- 1.36 Respiratory System at 5 to 6 Weeks
- 1.37 Respiratory System at 6 to 7 Weeks
- 1.38 Larynx, Tracheobronchial Tree, and Lungs at 7 to 10 Weeks
- 1.39 Sagittal Section at 6 to 7 Weeks
- 1.40 Transverse Section at 5 to 8 Weeks
- 1.41 Diaphragm at 5 to 6 Weeks
- 1.42 Terminal Air Tube
- 1.43 Alveolar-Capillary Relationships at Age 8 Years
- 1.44 Surfactant Effects
- 1.45 Physiology of the Perinatal Pulmonary Circulation

SECTION 2 PHYSIOLOGY

Pulmonary Mechanics and Gas Exchange

- 2.1 Muscles of Respiration
- 2.2 Spirometry: Lung Volume and Measurement
- 2.3 Determination of Functional Residual Capacity
- 2.4 Forces During Quiet Breathing
- 2.5 Measurement of Elastic Properties of the Lung
- 2.6 Surface Forces in the Lung
- 2.7 Elastic Properties of the Respiratory System: Lung and Chest Wall

- 2.8 Distribution of Airway Resistance
- 2.9 Trumpet Model and Resistance Versus Airway Generation
- 2.10 Patterns of Airflow
- 2.11 Expiratory Flow
- 2.12 Forced Expiratory Vital Capacity Maneuver
- 2.13 Work of Breathing
- 2.14 Pleural Pressure Gradient and Closing Volume
- 2.15 Distribution of Pulmonary Blood Flow
- 2.16 Pulmonary Vascular Resistance
- 2.17 Pathways and Transfers of O₂ and CO₂
- 2.18 Blood Gas Relationships During Normal Ventilation and Alveolar Hypoventilation
- 2.19 Ventilation-Perfusion Relationships
- 2.20 Shunts
- 2.21 Oxygen Transport
- 2.22 Role of Lungs and Kidneys in Regulation of Acid-Base Balance
- 2.23 Anion Gap
- 2.24 Response to Oxidant Signals and Injury

Lung Metabolism

- 2.25 Lung Metabolism
- 2.26 Inactivation of Circulating Vasoactive Substances

Control and Disorders of Respiration

- 2.27 Chemical Control of Respiration (Feedback Mechanism)
- 2.28 Neural Control of Breathing
- 2.29 Respiratory Response to Exercise
- 2.30 Effects of High Altitude on Respiratory Mechanism
- 2.31 Hyperventilation and Hypoventilation
- 2.32 Periodic Breathing (Cheyne-Stokes)
- 2.33 Sites of Pathologic Disturbances in Control of Breathing

SECTION 3 DIAGNOSTIC PROCEDURES

- 3.1 Tests of Pulmonary Function
- 3.2 Tests of Pulmonary Function (Continued)
- 3.3 Tests of Pulmonary Function (Continued)

Radiologic Examination of the Lungs

- 3.4 Radiologic Examination of the Lungs: Normal Posteroanterior and Lateral Views of Chest
- 3.5 Radiologic Examination of the Lungs: Lateral Decubitus View
- 3.6 Radiologic Examination of the Lungs: Technique of Helical Computed Tomography
- 3.7 Radiologic Examination of the Lungs: Right Bronchial Tree as Revealed by Bronchograms
- 3.8 Radiologic Examination of the Lungs: Left Bronchial Tree as Revealed by Bronchograms
- 3.9 Radiologic Examination of the Lungs: Pulmonary Angiography
- 3.10 Radiologic Examination of the Lungs: Images From a PET-CT Scanner
- 3.11 Radiologic Examination of the Lungs: Patterns of Lobar Collapse - Right Lung
- 3.12 Radiologic Examination of the Lungs: Patterns of Lobar Collapse - Left Lung
- 3.13 Radiologic Examination of the Lungs: Alveolar Versus Interstitial Disease
- 3.14 Radiologic Examination of the Lungs: Distribution of Pulmonary Nodules
- 3.15 Radiologic Examination of the Lungs: Alveolar Disease
- 3.16 Radiologic Examination of the Lungs: Radiographic Consolidation Patterns of Each Segment of Lungs (AP Views)
- 3.17 Radiologic Examination of the Lungs: Solitary Pulmonary Nodule
- 3.18 Radiologic Examination of the Lungs: Airway and Pleural Diseases
- 3.19 Abnormalities of the Chest Wall and Mediastinum
- 3.20 Thoracic Ultrasound Equipment and Examination Zones
- 3.21 Thoracic Ultrasound: A lines, B lines, Seashore Sign, Barcode Sign
- 3.22 Thoracic Ultrasound: Lung Point
- 3.23 Exhaled Breath Analysis

Endoscopic Procedures

- 3.24 Flexible Bronchoscopy
- 3.25 Bronchoscopic Views

- 3.26 Nomenclature for Peripheral Bronchi
- 3.27 Rigid Bronchoscopy
- 3.28 Endobronchial Ultrasonography
- 3.29 Mediastinotomy and Mediastinoscopy

SECTION 4 DISEASES AND PATHOLOGY

Congenital Lung Disease

- 4.1 Congenital Deformities of the Thoracic Cage
- 4.2 Kyphoscoliosis: Pathology
- 4.3 Kyphoscoliosis: Pulmonary Function
- 4.4 Congenital Diaphragmatic Hernia
- 4.5 Tracheoesophageal Fistulas and Tracheal Anomalies
- 4.6 Pulmonary Agenesis, Aplasia, and Hypoplasia
- 4.7 Congenital Thoracic Malformations
- 4.8 Bronchopulmonary Sequestration
- 4.9 Congenital Lobar Overdistension
- 4.10 Chronic Cough

Laryngeal Disorders

- 4.11 Common Laryngeal Lesions
- 4.12 Laryngeal and Tracheal Stenosis
- 4.13 Vocal Cord Dysfunction

Bronchial Asthma

- 4.14 Allergic Asthma: Clinical Features
- 4.15 Nonallergic Asthma: Clinical Features
- 4.16 Common Precipitating Factors in Etiology of Bronchial Asthma
- 4.17 Variable Airflow Obstruction and Airway Hyperresponsiveness
- 4.18 Sputum in Bronchial Asthma
- 4.19 Skin Testing for Allergy
- 4.20 Representative Differential Diagnosis of Bronchial Asthma
- 4.21 Blood Gas and pH Relationships
- 4.22 Airway Pathophysiology in Asthma
- 4.23 Mechanism of Type 1 (Immediate) Hypersensitivity
- 4.24 Pathology of Severe Asthma
- 4.25 General Management Principles for Allergic Asthma
- 4.26 Mechanisms of Asthma Medications
- 4.27 Emergency Department Management of Asthma

Chronic Obstructive Pulmonary Disease

- 4.28 Interrelationships of Chronic Bronchitis and Emphysema
- 4.29 Interrelationships of Chronic Bronchitis and Emphysema (Continued)
- 4.30 Emphysema
- 4.31 Chronic Bronchitis
- 4.32 Mixed Chronic Bronchitis and Emphysema
- 4.33 Cor Pulmonale Caused by COPD
- 4.34 Chronic Obstructive Pulmonary Disease
- 4.35 Anatomic Distribution of Emphysema
- 4.36 Centriacinar (Centrilobular) Emphysema
- 4.37 Panacinar (Panlobular) Emphysema
- 4.38 Role of Inflammation and Protease-Antiprotease Imbalance
- 4.39 Pulmonary Function in Obstructive Disease
- 4.40 Pathophysiology of Emphysema: Loss of Elastic Recoil and Hyperinflation
- 4.41 CT Scan of Lungs in COPD
- 4.42 Treatment Algorithm for COPD

Bronchiectasis

- 4.43 Bilateral Severe Bronchiectasis
- 4.44 Localized Bronchiectasis

Cystic Fibrosis

- 4.45 Pathophysiology and Clinical Manifestations of Cystic Fibrosis
- 4.46 Radiographic and Gross Anatomic Findings of the Lung in Cystic Fibrosis
- 4.47 Cystic Fibrosis: Clinical Aspects

Lung Cancer Overview

- 4.48 Low-Dose Computed Tomography Screening for Lung Cancer
- 4.49 Classification of Bronchogenic Carcinoma
- 4.50 Trends in Death Rates, 1930–2019
- 4.51 Lung Cancer Staging
- 4.52 Squamous Cell Carcinoma of the Lung
- 4.53 Adenocarcinoma of the Lung
- 4.54 Large Cell Carcinomas of the Lung
- 4.55 Small Cell Carcinomas of the Lung
- 4.56 Superior Vena Cava Syndrome
- 4.57 Pancoast Tumor and Syndrome
- Paraneoplastic Manifestations of Lung Cancer**
- 4.58 Endocrine Manifestations of Lung Cancer
- 4.59 Neuromuscular and Connective Tissue Manifestations
- 4.60 Other Neoplasms of the Lung
- 4.61 Benign Tumors of the Lung
- 4.62 Malignant Pleural Mesothelioma
- 4.63 Mediastinal Tumors: Anterior Mediastinum
- 4.64 Mediastinal Tumors: Middle Mediastinum and Posterior Mediastinum
- 4.65 Pulmonary Metastases
- Pneumonia**
- 4.66 Overview of Pneumonia
- 4.67 Pneumococcal Pneumonia
- 4.68 Pneumococcal Pneumonia (Continued)
- Atypical Pathogen Pneumonia**
- 4.69 Mycoplasma Pneumonia
- 4.70 Chlamydophila Psittaci Pneumonia
- 4.71 Legionella Pneumonia
- 4.72 Staphylococcus Aureus Pneumonia
- 4.73 Haemophilus Influenzae Pneumonia
- 4.74 Gram-Negative Bacterial Pneumonia
- Viral Community-Acquired Pneumonia**
- 4.75 Influenza Virus and Its Epidemiology
- 4.76 Influenza Pneumonia
- 4.77 Varicella Pneumonia
- 4.78 Cytomegalovirus Pneumonia
- 4.79 Severe Acute Respiratory Syndrome
- 4.80 COVID-19
- 4.81 Lung Abscess
- 4.82 Lung Abscess (Continued)
- 4.83 Overview of Healthcare-Associated Pneumonia: Risk Factors
- 4.84 Overview of Healthcare-Associated Pneumonia: Testing
- 4.85 Pneumonia in the Compromised Host
- 4.86 Pneumonia in the Compromised Host (Continued)
- 4.87 Actinomycosis
- 4.88 Nocardiosis
- 4.89 Histoplasmosis
- 4.90 Histoplasmosis (Continued)
- 4.91 Coccidioidomycosis
- 4.92 Blastomycosis
- 4.93 Paracoccidioidomycosis
- 4.94 Cryptococcosis
- 4.95 Aspergillosis
- Tuberculosis**
- 4.96 Dissemination of Tuberculosis
- 4.97 Evolution of Tubercle
- 4.98 Initial (Primary) Tuberculous Complex
- 4.99 Progressive Pathology
- 4.100 Extensive Cavitory Disease
- 4.101 Miliary Tuberculosis

- 4.102 Tuberculin Testing
- 4.103 Sputum Examination
- 4.104 Sputum Culture
- 4.105 Nontuberculous Mycobacterial Lung Disease
- Lung Diseases Caused by the Inhalation of Particles and Fumes**
- 4.106 Overview of Inhalation Diseases
- 4.107 Silicosis
- 4.108 Silicosis (Continued)
- 4.109 Coal Worker's Pneumoconiosis
- 4.110 Asbestosis and Asbestos-Related Diseases
- 4.111 Asbestosis and Asbestos-Related Diseases (Continued)
- 4.112 Beryllium
- 4.113 Pneumoconiosis Caused by Various Minerals and Mixed Dusts
- 4.114 Pneumoconiosis Caused by Various Minerals and Mixed Dusts (Continued)
- 4.115 Hypersensitivity Pneumonitis
- 4.116 Hypersensitivity Pneumonitis (Continued)
- Pulmonary Embolism and Venous Thromboembolism**
- 4.117 Predisposing Factors for Pulmonary Embolism,
- 4.118 Sources of Pulmonary Emboli
- 4.119 Clinical Manifestations of Leg Vein Thrombosis
- 4.120 Ultrasound and CT in Diagnosis of Acute Venous Thromboembolism
- 4.121 Embolism of Lesser Degree Without Infarction
- 4.122 Pulmonary Infarction
- 4.123 Massive Embolization
- 4.124 Mechanical Defenses Against and Chronic Effects of Pulmonary Embolism
- 4.125 Special Situations and Extravascular Sources of Pulmonary Emboli
- Pulmonary Hypertension**
- 4.126 WHO Classification System of Pulmonary Hypertension
- 4.127 Pathology of Pulmonary Hypertension
- 4.128 Diagnosis of Pulmonary Hypertension
- 4.129 Therapy for Pulmonary Hypertension
- Pulmonary Edema**
- 4.130 Pulmonary Edema: Pathway of Normal Pulmonary Fluid Resorption
- 4.131 Pulmonary Edema: Some Etiologies and Hypotheses of Mechanisms
- Pleural Effusion**
- 4.132 Pathophysiology of Pleural Fluid Accumulation
- 4.133 Pleural Effusion in Heart Disease
- 4.134 Unexpandable Lung
- 4.135 Parapneumonic Effusion
- 4.136 Pleural Effusion in Malignancy
- 4.137 Chylothorax
- Thoracic Injuries**
- 4.138 Rib and Sternal Fractures
- 4.139 Flail Chest and Pulmonary Contusion
- Pneumothorax**
- 4.140 Tension Pneumothorax
- 4.141 Open (Sucking) Pneumothorax
- 4.142 Hemothorax
- 4.143 Pulmonary Laceration
- 4.144 Tracheobronchial Rupture
- 4.145 Traumatic Asphyxia
- 4.146 Diaphragmatic Injuries
- Respiratory Distress Syndrome**
- 4.147 Respiratory Distress Syndrome
- 4.148 Respiratory Distress Syndrome (Continued)
- 4.149 Respiratory Distress Syndrome (Continued)
- Interstitial Lung Diseases**
- 4.150 Diffuse Parenchymal Lung Diseases: Classifications and Clinical Manifestations
- 4.151 Diffuse Parenchymal Lung Diseases: HRCT and Pathologic Evaluation

- 4.152 Idiopathic Interstitial Pneumonias: Pulmonary Fibrosis
- 4.153 Idiopathic Interstitial Pneumonias: Nonspecific
- 4.154 Idiopathic Interstitial Pneumonias (Continued)
- 4.155 Idiopathic Interstitial Pneumonias (Continued)
- 4.156 Lymphoid Interstitial Pneumonia
- 4.157 Alveolar Filling Disorders
- 4.158 Alveolar Filling Disorders (Continued)
- 4.159 Idiopathic Pulmonary Hemosiderosis
- 4.160 Diffuse Cystic Lung Diseases
- 4.161 Diffuse Cystic Lung Diseases (Continued)
- 4.162 Sarcoidosis
- 4.163 Sarcoidosis (Continued)
- 4.164 Rheumatoid Arthritis
- 4.165 Systemic Sclerosis (Scleroderma)
- 4.166 Systemic Lupus Erythematosus
- 4.167 Dermatomyositis and Polymyositis
- 4.168 Pulmonary Vasculitis
- 4.169 Eosinophilic Pneumonia
- 4.170 Pulmonary Manifestations of Other Diseases
- 4.171 Pulmonary Manifestations of Other Diseases (Continued)
- 4.172 Sleep Medicine
- 4.173 Sleep-Disordered Breathing
- 4.174 Sleep-Disordered Breathing (Continued)

SECTION 5 THERAPIES AND THERAPEUTIC PROCEDURES

Pulmonary Pharmacology

- 5.1 Bronchodilators
- 5.2 Methylxanthines
- 5.3 Anticholinergics
- 5.4 Mode of Action of Corticosteroids
- 5.5 Using a Spacer for Inhaling Aerosolized Corticosteroids
- 5.6 Adverse Effects of Corticosteroids
- 5.7 Antileukotrienes
- 5.8 Inhaled Exposures
- 5.9 Cough Suppressants (Antitussive Agents)
- 5.10 Pulmonary Rehabilitation

Oxygen Therapy

- 5.11 Oxygen Therapy in Acute Respiratory Failure
- 5.12 Methods of Oxygen Administration
- 5.13 Oxygen Therapy in Chronic Respiratory Failure (Ambulatory and Home Use)

Airway Management

- 5.14 Introduction of Chest Drainage Tubes
- 5.15 Chest Draining Methods
- 5.16 Postural Drainage and Breathing Exercises
- 5.17 Upper Airway Obstruction and the Heimlich Maneuver
- 5.18 Opening and Securing the Airway Emergently
- 5.19 Endotracheal Intubation
- 5.20 Tracheostomy
- 5.21 Morbidity of Endotracheal Intubation, Cricothyroidotomy, and Tracheostomy
- 5.22 Endotracheal Suction
- 5.23 Mechanical Ventilation

Lung Surgery

- 5.24 Interventional Pulmonology
- 5.25 Tracheal Resection and Anastomosis
- 5.26 Removal of Mediastinal Tumors
- 5.27 Sublobar Resection
- 5.28 Lobectomy
- 5.29 Pneumonectomy
- 5.30 Pneumonectomy (Continued)
- 5.31 Video-Assisted Thoracoscopic Surgery

- 5.32 Lung Volume Reduction Surgery
- 5.33 Lung Transplantation
- 5.34 Extracorporeal Membrane Oxygenation
