<b>1 Bioceramics in Dentistry</b>	<b>1</b>
<i>Vineeta Nikhil, Sachin Gupta, Shikha Jaiswal, and Padmanabh Jha</i>	
1.1	Introduction 2
1.2	History and Evolution of Bioceramics 3
1.3	Classification of Bioceramics 4
1.3.1	Based on Generations 4
1.3.2	Based on Tissue Interaction 5
1.3.3	Based on Structure 5
1.3.4	Based on Composition 6
1.3.5	Based on Resorbability 6
1.3.6	Based on Their Location-Specific Use in Endodontology 7
1.4	Forms of Bioceramics 7
1.4.1	Alumina 7
1.4.2	Zirconia 7
1.4.3	Hydroxyapatite (HA) 8
1.4.4	Calcium Phosphate 8
1.4.5	Mineral Trioxide Aggregate 8
1.4.6	Biodentine 9
1.5	Physicochemical Properties of Bioceramics 9
1.5.1	Portland Cement 9
1.5.2	ProRoot MTA 10
1.5.3	MTA Angelus 12
1.5.4	Biodentine 12
1.5.5	BioAggregate 14

1.5.6	Ceramicrete	14
1.5.7	Calcium-Enriched Mixture Cement	15
1.5.7.1	Physical Properties	15
1.5.7.2	Antibacterial Activity	16
1.5.7.3	Sealing Ability	16
1.5.8	EndoSequence Root Repair Material	16
1.5.8.1	Setting and Working Time	16
1.5.8.2	pH Value	16
1.5.8.3	Microhardness	17
1.5.8.4	Bioactivity	17
1.5.8.5	Sealing Ability	17
1.5.8.6	Antibacterial Activity	17
1.5.9	iROOT	17
1.5.9.1	Physical Properties	18
1.5.10	Endo-CPM	18
1.5.10.1	Physical Properties	18
1.6	Physicochemical Properties of Some Bioinert Bioceramics	20
1.6.1	Alumina (High Purity Dense Alumina/ $Al_2O_3$ )	20
1.6.2	Zirconia	20
1.7	Biological Properties of Bioceramics	21
1.7.1	Cytological Investigation of Biocompatibility	21
1.7.2	Subcutaneous and Intraosseous Implantation	23
1.7.3	Periradicular Tissue Reactions	23
1.7.4	Pulpal Reactions	24
1.7.5	Antibacterial Properties	26
1.8	Application of Bioceramics in Dentistry	26
1.9	Advantages of Bioceramics	28
1.9.1	Regenerative Endodontic Therapy	29
1.9.2	Advantages of BCs When Used as a Sealer/Obturing Material	29
1.10	Limitations	30
1.11	Future Trends	30
1.12	Conclusion	32
	References	32

## 2 Calcium Silicate-Based Dental Bioceramics: History, Status, and Future 43

*Abubaker Qutieshat, Shahab Javanmardi, and Gurdeep Singh*

2.1	Introduction	44
2.2	Bioceramics: The What and the Why	45
2.3	Endodontic Repair Materials with Ideal Properties	45
2.4	Calcium Silicate-based Materials: A Look Back in History	45
2.5	Chemical Properties	48

2.5.1	Heavy Metal Contamination	52
2.5.2	Setting Reaction	53
2.6	Synthetic Calcium Silicates	55
2.6.1	Biodentine	55
2.6.2	BioAggregate	55
2.6.3	EndoSequence	56
2.6.4	iRoot BP Plus	56
2.6.5	NeoMTA Plus	57
2.6.6	BioRoot RCS	57
2.7	Technical Report	57
2.7.1	Methods	57
2.7.1.1	Flame Emission Spectroscopy	58
2.7.1.2	X-ray Diffraction	59
2.7.2	Results	60
2.8	Recommendations for Implementation	61
2.9	Conclusion	64
	References	64

### **3 Bioceramics in Clinical Endodontics** 71

*Ayfer Atav, Burçin Arıcan, and Keziban Olcay*

3.1	Introduction	72
3.2	Classification of Hydraulic Cements in Endodontics	73
3.2.1	Type 1 Hydraulic Cements	73
3.2.1.1	ProRoot MTA	73
3.2.2	Type 2 Hydraulic Cements	75
3.2.2.1	MTA Angelus	76
3.2.2.2	MTA Bio	77
3.2.2.3	MM-MTA™	77
3.2.3	Type 3 Hydraulic Cements	78
3.2.3.1	EndoSeal MTA	78
3.2.3.2	MTA Fillapex	78
3.2.3.3	TheraCal LC	79
3.2.3.4	TheraCal PT	80
3.2.4	Type 4 Hydraulic Cements	80
3.2.4.1	BioAggregate	81
3.2.4.2	Biodentine™	82
3.2.4.3	BioRoot RCS	83
3.2.4.4	MTA BIOREP	84
3.2.4.5	Bio-C Pulpo	84
3.2.4.6	MTA Repair HP	85
3.2.5	Type 5 Hydraulic Cements	85
3.2.5.1	iRoot SP, EndoSequence® BC, TotalFill®	85

- 3.2.5.2 EndoSequence® BC Sealer HiFlow and TotalFill® BC Sealer HiFlow™ 88
- 3.2.5.3 TotalFill® BC RRM Root Repair Material (RRM) Paste, iRoot BP, EndoSequence® BC Root Repair Material (ERRM) or Bioceramic Root Repair Material (BC RRM) (Brasseler USA, Savannah, GA, USA) 88
- 3.2.5.4 TotalFill® BC RRM™ Putty, iRoot BP Plus, EndoSequence® BC RRM Putty 88
- 3.2.5.5 TotalFill® BC RRM™ Fast Set Putty, iRoot FS, EndoSequence® BC RRM Fast Set Putty 88
- 3.2.5.6 Well-Root™ ST 89
- 3.2.5.7 CeraSeal 90
- 3.2.5.8 MTA Bioseal 90
- 3.2.5.9 Bio-C Repair 91
- 3.2.5.10 Bio-C Sealer 91
- 3.2.5.11 Bio-C Temp 91
- 3.2.5.12 Bio-C Pulpecto 92
- 3.2.5.13 Bio-C Sealer ION+ 92
- 3.2.5.14 AH Plus Bioceramic Sealer 93
- 3.3 Conclusion 93
- References 93

## 4 **Bioceramics: Root-End Filling Material** 105

*Sanjay Miglani, Swadheena Patro, Ankita Mohanty, and Antarikshya Das*

- 4.1 Introduction 106
- 4.2 Microsurgical Endodontics 106
- 4.3 History 107
- 4.4 Properties of Root-End Filling Material 108
- 4.5 Bioceramic Materials 108
  - 4.5.1 Mineral Trioxide Aggregate 108
  - 4.5.2 Bioaggregate 111
  - 4.5.3 Biodentine 112
  - 4.5.4 iRoot BP Plus Bioceramic Putty 112
  - 4.5.5 Capasio 112
  - 4.5.6 Calcium-Enriched Material 113
  - 4.5.7 EndoSequence 114
  - 4.5.8 EndoBinder 115
  - 4.5.9 Generex A 116
  - 4.5.10 Quick-Set 117
  - 4.5.11 Ceramicrete-D 118
  - 4.5.12 Bioglass 119
- 4.6 Conclusion 121
- References 121

- 5 Bioceramics as an Apical Plug 129**  
*Riccardo Tonini and Marilu' Garo*
- 5.1 Apical Plug 129
  - 5.2 MTA Apical Plug Outcome 131
  - 5.3 Other Apical Plug Materials 132
  - 5.4 Apical Plug Technique 133
    - 5.4.1 In the First Session 133
    - 5.4.2 In the Second Session 133
    - 5.4.3 Extra-Apical Resorbable Barriers 135
    - 5.4.4 Apical Sounding Technique Procedure 137
  - 5.5 Complex Clinical Cases 141
    - References 147
- 6 Regeneration in Endodontics with Clinical Cases 153**  
*Abhishek Parolia, Maya Feghali, and Catherine Ricci*
- 6.1 Introduction 153
  - 6.2 Factors Affecting the Clinical Outcome of REP 155
    - 6.2.1 Etiology 155
    - 6.2.2 Type of the Tooth 155
    - 6.2.3 Induction of Bleeding and Blood Clot 156
    - 6.2.4 Disinfection of the Root Canal System 156
    - 6.2.5 Coronal Barrier 157
  - 6.3 Materials used for REP 157
  - 6.4 Key Points to Remember While Performing REPs 159
    - References 164
- 7 Management of Deep Caries with Bioceramics 169**  
*Antonis Chaniotis and Viresh Chopra*
- 7.1 Introduction 169
  - 7.2 Patient Information 170
    - 7.2.1 Tooth 170
  - 7.3 Treatment Plan 170
  - 7.4 Learning Objectives 172
    - References 172
- 8 Regenerative Management of an Infected Pulp of a Permanent Tooth Using Bioceramics 173**  
*Antonis Chaniotis and Viresh Chopra*
- 8.1 Introduction 173
  - 8.2 Patient Information 174
    - 8.2.1 Tooth 174
  - 8.3 Treatment Plan 174

- 8.3.1 First Visit 175
- 8.3.2 Second Visit 176
- 8.3.3 Recall 177
- 8.4 Learning Objectives 177
- References 177

## **9 Endodontic Management of a Necrosed Pulp with Wide Open Apex 179**

*Antonis Chaniotis and Viresh Chopra*

- 9.1 Introduction 179
- 9.2 Patient Information 180
  - 9.2.1 Tooth 180
- 9.3 Treatment Plan 180
- 9.4 Technical Aspects 181
  - 9.4.1 First Visit 181
  - 9.4.2 Second Visit 182
- 9.5 Learning Objectives 183
- References 184

## **10 Clinical Application of Bioceramics as Direct Pulp Capping Material 185**

*Antonis Chaniotis and Viresh Chopra*

- 10.1 Introduction 185
- 10.2 Patient Information 186
  - 10.2.1 Tooth 186
- 10.3 Treatment Plan 187
- 10.4 Technical Aspects 188
- 10.5 Learning Objectives 188
- References 188

## **11 Sealer-Based Obturations Using Bioceramics in Nonsurgical Root Canal Treatments 189**

*Garima Poddar, Ajay Bajaj, and Viresh Chopra*

- 11.1 Introduction 190
- 11.2 Case 1 192
  - 11.2.1 Patient Information 192
  - 11.2.2 Details of the Tooth 192
  - 11.2.3 Radiographic Evaluation of Tooth Number 35 Revealed the Following 193
  - 11.2.4 Diagnosis 193
- 11.3 Treatment Plan 193
- 11.4 Treatment Done 194

11.4.1	Instrumentation Protocol	194
11.4.2	Irrigation Protocol	194
11.4.3	Obturation Protocol	195
11.4.4	Post Endodontic Restoration	196
11.4.5	Rationale on the Treatment Protocol and the Material Used	196
11.5	Learning Objectives for the Readers	196
11.6	Case 2	196
11.6.1	Patient Information	196
11.6.2	Details of the Tooth	197
11.6.2.1	Clinical Examination Findings	197
11.6.2.2	Preoperative Radiological Assessment	197
11.6.3	Diagnosis	198
11.7	Treatment Plan	200
11.8	Treatment Done	202
11.8.1	Instrumentation Protocol	202
11.8.2	Irrigation Protocol	203
11.8.3	Obturation Protocol	204
11.8.4	Post Endodontic Phase	205
11.8.5	Rationale on the Treatment Protocol and the Material Used	206
11.9	Learning Objectives for the Readers	206
11.10	Case 3	206
11.10.1	Patient Information	206
11.10.2	Details of the Tooth	206
11.10.3	Preoperative Radiological Assessment	207
11.10.4	Diagnosis	207
11.11	Treatment plan	207
11.12	Treatment Done	207
11.12.1	Instrumentation Protocol	207
11.12.2	Irrigation Protocol	208
11.12.3	Obturation Protocol	209
11.12.4	Post Endo Restorative Phase	211
11.12.5	Rationale on the Treatment Protocol and the Material Used	211
11.13	Learning Objectives for the Readers	211
11.14	Discussion	211
	References	212

## **12 BioConeless Obturation** 215

*Francesca Cerutti and Calogero Bugea*

12.1	Introduction	215
12.2	Why BioConeless?	217
12.2.1	BioConeless: Indications	221
12.2.2	BioConeless: How to Do It?	224

- 12.2.3 Concerns Regarding the Complete Filling of the Root Canal with the Coneless and BioConeless Techniques 231
- 12.2.4 Concerns Regarding the Consistency of the Obturation 234
- 12.2.4.1 Time Required to Complete the Obturation 234
- 12.3 Final Remarks 234
- 12.4 Learning Objectives 235
- References 235

## **13 Primary Endodontic Treatment using ProTaper Ultimate and AH Plus Bioceramic Sealer 239**

*Viresh Chopra and Harneet Chopra*

- 13.1 Introduction of the Case 239
- 13.1.1 Patient Information 239
- 13.1.2 Tooth 240
- 13.2 Treatment Procedure for the First Appointment 241
- 13.3 Treatment Procedure for the Second Appointment 242
- 13.3.1 Irrigation Protocol 244
- 13.4 Technical Aspects 244
- 13.4.1 Follow up 244
- 13.5 Learning Objectives 244

## **14 Management of Failed Root Canal Treatment in an Anterior Tooth Using Calcium Silicate Cement 247**

*Viresh Chopra and Ajinkya Pawar*

- 14.1 Introduction of the Case 247
- 14.1.1 Patient Information 248
- 14.1.2 Diagnosis (Pulpal and Periapical) 249
- 14.1.2.1 Advice 249
- 14.2 Treatment Plan 249
- 14.2.1 Treatment Procedure for the First Appointment 249
- 14.2.2 Treatment Procedure for the Second Appointment 250
- 14.2.3 Irrigation Protocol 252
- 14.2.3.1 Materials Used for Obturation 252
- 14.3 Technical Aspects 252
- 14.3.1 Follow-up 253
- 14.4 Learning Objectives 253

## **15 Apexification of a Traumatic Central Incisor with an Apical Plug Technique using Calcium Silicate Cement 255**

*Viresh Chopra, Harneet Chopra, and Aylin Baysan*

- 15.1 Introduction of the Case 256

15.1.1	Patient Information	256
15.1.2	Tooth Information	256
15.1.2.1	Identification	256
15.1.2.2	Dental History	256
15.1.2.3	Clinical Examination Findings	256
15.1.2.4	Diagnosis (Pulpal and Periapical)	256
15.1.2.5	Advice	256
15.2	Treatment Plan	256
15.2.1	Treatment Procedure for the First Appointment	257
15.2.2	Treatment Procedure for the Second Appointment	258
15.2.3	Treatment Procedure for the Third Appointment	258
15.2.3.1	Irrigation Protocol	259
15.3	Technical Aspects	259
15.3.1	Follow-up	261
15.4	Learning Objectives	261
15.5	Conclusion	261
<b>16</b>	<b>Coneless Obturations: Bioceramics as Obturating Materials</b>	<b>263</b>
	<i>Viresh Chopra and Maryam Hasnain</i>	
16.1	Introduction	264
16.2	Introduction of the Case	264
16.2.1	Patient Information	264
16.2.2	Tooth Information	265
16.2.2.1	Identification	265
16.2.2.2	Dental History	265
16.2.2.3	Diagnosis (Pulpal and Periapical)	266
16.2.2.4	Advice	266
16.3	Treatment Plan	266
16.3.1	Treatment Procedure for the First Appointment	266
16.3.2	Treatment Procedure for the Second Appointment	268
16.3.2.1	Irrigation Protocol	269
16.4	Technical Aspects	269
16.5	Learning Objectives	270
16.6	Conclusion	271
	References	271
<b>17</b>	<b>Selective Management of a Case With Complicated Internal Morphology</b>	<b>273</b>
	<i>Gergely Benyőcs and Viresh Chopra</i>	
17.1	Introduction of the Case	273

17.1.1	Patient Information	274
17.1.2	Tooth Information	274
17.1.2.1	Identification	274
17.1.2.2	Dental History	274
17.1.2.3	Investigations	274
17.1.2.4	Diagnosis (Pulpal and Periapical)	276
17.1.2.5	Advice	276
17.2	Treatment Plan	276
17.2.1	Treatment Procedure for the First Appointment	276
17.2.2	Treatment Procedure for the Second Appointment	277
17.2.2.1	Irrigation Protocol	277
17.3	Technical Aspects	279
17.4	Learning Objectives	279
17.5	Conclusion	280

## **18     Retreatment of a Maxillary Molar With Complex Internal Morphology** 281

*Gergely Benyőcs and Viresh Chopra*

18.1	Introduction of the Case	282
18.2	Patient Information	282
18.2.1	Tooth Information	282
18.2.1.1	Identification	282
18.2.1.2	Dental History	282
18.2.1.3	Investigations	282
18.2.1.4	Diagnosis (Pulpal and Periapical)	282
18.2.1.5	Advice	282
18.3	Treatment Plan	282
18.3.1	Treatment Procedure for the First Appointment	283
18.3.2	Treatment Procedure for the Second Appointment	284
18.3.2.1	Irrigation Protocol	285
18.4	Technical Aspects	287
18.5	Learning Objectives	288
18.6	Conclusion	288
