

PREFACE

DEDICATION

ACKNOWLEDGMENTS

SECTION 1 - EVOLVING CONCEPTS

1. The Paroxysmal Depolarizing Shift (PDS): The First Cellular Marker of Focal Epileptogenesis

David Prince and Massimo Avoli

2. Hippocampal Sclerosis in Temporal Lobe Epilepsy: New Views and Challenges

Carolyn Houser

3. Cerebral Cortical Dysplasia or Dysgenesis: Keratan Sulfate Proteoglycan for Fetal Axonal Guidance and Excitatory/Inhibitory Synaptic Targets that Influence Epileptogenesis

Harvey Sarnat and Laura Flores-Sarnat

4. mTOR in Acquired and Genetic Models of Epilepsy

Michael Wong, Angelique Bordey, and Steve C. Danzer

5. Epilepsy Genomics: Disease Causing Sequence Variants

Antonio Delgado-Escueta

SECTION 2 - SEIZURES, NETWORKS & SYSTEMS

Editor: Massimo Avoli; Associate Editors: Christophe Bernard and Marco de Curtis

Introduction

Massimo Avoli, Marco de Curtis, Christophe Bernard, and Ivan Soltesz

6. GABA_A-Receptor Signaling and Ionic Plasticity in the Generation and Spread of Seizures

Kai Kaila, Andrew Trevelyan, Joseph Raimondo, Tommi Ala-Kurikka, Gilles Huberfeld, Massimo Avoli, and Marco de Curtis

7. Connexins, Pannexins and Epilepsy

Liang Zhang, Georg R. Zoidl, and Peter L. Carlen

8. Mechanisms Leading to Initiation, Development and Termination of Focal Seizures

Marco de Curtis, Piotr Suffczynski, Maxime Lévesque, Laura Librizzi, Laura Uva, Paolo Scalmani, Vadym Gnatkovsky, and Massimo Avoli

9. Transition to Seizure from Cellular, Network, and Dynamical Perspectives

Wei-Chih Chang, Jan Kudlacek, Premysl Jiruska, and John G.R. Jefferys

10. Role of the Subiculum in Focal Epilepsy

Alesya Evstratova, Belén Diaz-Fernandez, Maxime Lévesque, Massimo Avoli, and Gand illes Huberfeld

11. Optogenetic Modulation of Focal Seizures

Maxime Lévesque, Massimo Avoli, and Merab Kokaia

12. Balancing Seizure Control with Cognitive Side-Effects

Sheela Tropani, Gene G Gurkoff, Kiarash Shahlaie, Fady Girgis, Ignacio Saez, Jeffrey Kennedy, and Karen A Moxon

13. High Frequency Oscillations

Liset Menendes de la Prida and Jean Gotman

14. Seizures and Sleep

Birgit Frauscher and Igor Timofeev

15. Cycles in epilepsy

Maxime Baud, Vikram Rao, Christophe Bernard, and Philippa Karoly

16. Human Single Unit Recordings in Epilepsy

Edward Merricks and Catherine Schevon

17. Role of Ion Concentration Dynamics in Epileptic Seizures

Oscar C González, Igor Timofeev, and Maxim Bazhenov

18. A Classification of Seizures Based on Dynamics

Hiba Sheheitli, Huifang Wang, Jean-Didier Lemarechal, Christophe Bernard, and Viktor K. Jirsa

19. Seizures, Networks & Systems - Computational EEG Analysis of Human Epileptogenic Networks

Vadim Gnatkovsky and Kaspar Schindler

20. Excitation-Inhibition Balance in Absence Seizure Ictogenesis

Magor L. Lőrincz, Vincenzo Crunelli, and Francois David

21. Cortical and Thalamic PV+ Interneuron Dysfunction in the Pathogenesis of Absence Epilepsy

Jochen Meyer and Atul Maheshwari

22. Convergence of Thalamic Mechanisms in Genetic Epilepsies

Frances Cho and Jeanne Paz

Section 3 - EPILEPTOGENESIS: MOLECULAR MECHANISMS & TREATMENTS

Editor: Annamaria Vezzani; Associate Editors: Helen Scharfman and David Henshall

Introduction

Annamaria Vezzani and Helen Scharfman

23. The Diverse Roles of Mossy Cells in the Normal Brain, Epileptogenesis, and Chronic Epilepsy

Helen Scharfman

24. Temporal Lobe Epileptogenesis; A Focus on Etiology, Neuron Loss, The Latent Period, and Dentate Granule Cell Disinhibition

Robert Sloviter

25. Adult Neurogenesis in Epileptogenesis and Comorbidities

Kyung-Ok Cho and Jenny Hsieh

26. A Crucial Role for Astrocytes in Epileptogenesis: Gap Junctions and Glutamate Receptors

Peter Bedner, Allison R. Peterson, Devin K. Binder, Christian Steinhäuser

27. Adenosine Kinase: Cytoplasmic and Nuclear Isoforms

Madhuvika Murugan and Detlev Boison

28. Inflammatory Astrocytic TGF β - Signaling Induced by Blood-Brain Barrier Dysfunction Drives Epileptogenesis

Lynn T. Yang, Giovanni Anthony, and Daniela Kaufer

29. Pericytes and Microglia: Neurovascular and Immune Regulatory Cells in Seizure Disorders

Nicola Marchi and Amy Brewster

30. Neuroinflammation in Epilepsy: Cellular and Molecular Mechanisms

Ray Dingledine, Nicholas Varvel, Teresa Ravizza, and Annamaria Vezzani

31. Role of Reactive Oxygen Species in Epilepsy

Ashwini Sri Hari, Matthew C. Walker, and Manisha Patel

32. BDNF/TrkB Signaling and Epileptogenesis

Stephen Harward, Yang Huang, and James McNamara

33. Clinical Features and Molecular Mechanisms Underlying Autoantibody-Mediated Seizures

Alexander Mathy and Sarosh Irani

34. Transcriptomic Alterations in Epileptogenesis: Transcription Factors in the Spotlight

Gary Brennan and Karen van Loo

35. Epigenetics

Katja Kobow and Nadia Khan

SECTION 4 - BIOMARKERS OF EPILEPTOGENESIS

Editor: Annamaria Vezzani; Associate Editors: Helen Scharfman and David Henshall

Introduction

Annamaria Vezzani and David Henshall

36. EEG Biomarkers of Epileptogenesis

Lyna Kamintsky, Dan Z Milikovsky, and Alon Friedman

37. Blood Biomarkers: Noncoding RNAs and Proteins

David Henshall and Michele Simonato

38. Behavioural Biomarkers of Epileptogenesis and Epilepsy Severity

Idrish Ali, Pablo Casillas-Espinosa, Nigel Jones, and Terence O'Brien

39. Genetic and Imaging Biomarkers of Epileptogenesis

Matthias Koepp, Simona Balestrini, Stefanie Dedurwaerdere, and William Theodore

40. Machine-Learning Approach to Discover Novel Biomarkers for Post-Traumatic Epilepsy

Robert Cizsek, Eppu Manninen, Olli Gröhn, Jussi Tohka, and Asla Pitkänen

SECTION 5 - GENES AND NETWORK DEVELOPMENT

Editors: Antonio Delgado Escueta and Jeffrey Noebels; Associate Editor: Elsa Rossignol

Introduction

Jeffrey Noebels

41. Human Epilepsy Gene Discovery: The Next Decade

Emily Bonkowski and Heather Mefford

42. Functional Exploration of Epilepsy Genes in Patient-Derived Cells

Maria 'Carmen' Varela, Ranmal Samarasinghe, and Jack Parent

43. Brain mosaicism in Epileptogenic Cortical Malformations

Théo Ribierre and Stéphanie Baulac

44. Sodium Channelopathies in Human and Animal Models of Epilepsy and Neurodevelopmental Disorders

Kazuhiro Yamakawa, Miriam Meisler, and Lori Isom

45. Potassium Channels in Genetic Epilepsy: a Functional Perspective

Matthew Weston and Anastasios Tzingounis

46. High Voltage Activated Calcium Channels in Epilepsy: Lessons from Humans and Rodents

Elsa Rossignol

47. Transcription Factors Regulating Interneuron Development

Emily Ling-Lin Pai, Daniel Vogt, Jia Sheng Hu, and John Rubenstein

48. GABAA Receptors, Seizures and Epilepsy

Richard Olsen, Martin Wallner, and Michael A. Rogawski

49. Gene-gene interactions - Understanding complex molecular traits in epilepsy

Katja Kobow and John Mahoney

SECTION - 6 PROGRESSIVE MYOCLONUS EPILEPSIES

Editor: Antonio Delgado-Escueta; Associate Editor: Berge Minassian

Introduction

A.V. Delgado-Escueta, Berge Minassian, Jose M Seratossa

50. The Neuronal Ceroid Lipofuscinoses

Sara Mole

51. Progressive Myoclonus Epilepsy: Unverricht-Lundborg Disease

Saara Tegelberg, Tarja Joensuu, and Anna-Elina Lehesjoki

52. Strategies on Gene Therapy in Progressive Myoclonus Epilepsies

Saima Kayani, Emrah Gumusgoz, Berge Minassian, and Alison Dolce

53. Therapeutic Window for the Treatment of Lafora Disease

Olga Varea, Joan Guinovart, and Jordi Duran

54. Progressive Myoclonus Epilepsy of Lafora- Treatment with Metformin

Jose M. Seratossa, Daniel F. Burgos, Luis Zafra-Puerta, Nerea Iglesias-Cabeza, Pascual Sanz, and Marina P. Sánchez

55. Treating Lafora Disease with an Antibody-Enzyme Fusion

Matthew Gentry, Kia H. Markussen, Ramon Sun, and Craig W. Vander Kooi

56. Antisense Oligonucleotide Therapy for Progressive Myoclonus Epilepsies

Silvia Nitschke and Berge Minassian

SECTION 7 - COMORBIDITIES OF EPILEPTIC NETWORKS

Editor: Jeffrey Noebels; Associate Editor: Peyman Golshani

Introduction

Jeffrey Noebels

57. Dissecting Epileptic and Cognitive Network Dysfunction in Epilepsy

Pierre-Pascal Lenck-Santini and Greg Holmes

58. Attention Deficit Disorders and Epilepsy

Atul Maheshwari

59. What Rodent Models Teach Us About the Association of Autism and Epilepsy

Peyman Golshani

60. Artificial Intelligence-Guided Behavioral Phenotyping in Epilepsy

Tilo Gschwind and Ivan Soltesz

61. Mechanisms of Depression in the Epileptic Brain

Nigel Jones and Jamie Maguire

62. Heterogeneous Mechanisms of Spreading Depolarization and Seizures

Isamu Aiba

63. Genetic and Cellular Mechanisms Underlying SUDEP Risk

Jeffrey Noebels

SECTION 8- EPILEPSY THERAPEUTICS

Editor: Michael Rogawski; Associate Editors: Wolfgang Löscher & Steve White

Introduction

Michael Rogawski

64. New Models for Assessment of Antiseizure Activity

Cameron Metcalf, Peter West, Sharon Edwards, and Karen Wilcox

65. Disease Biology Factors Accounting for Epilepsy Severity: An Updated Conceptual Framework for New Drug Discovery

Stefanie Dedeurwaerdere, Vincenzo Marra, and Michael R Johnson

66. Animal Models of Pharmacoresistant Epilepsy

Michelle Guignet and H. Steve White

67. Drug Combinations for Antiepileptogenesis

Wolfgang Löscher

68. Prophylaxis of Epileptogenesis in Injury and Genetic Epilepsy Models

David Prince and Feng Gu

69. Management of Febrile Status Epilepticus: Past, Present and Future

Megan M. Garcia-Curran and Tallie Z. Baram

70. Excitatory Transmission in Status Epilepticus

Suchitra Joshi and Jaideep Kapur

71. Ionic Mechanisms of Ictogenic Disinhibition: All GABA Signaling is Local

Kevin Staley

72. Epileptogenic Channelopathies Guide Design of NBI-921352, a Highly Isoform-Selective Inhibitor of NaV1.6

J.P. Johnson, Jr, Alison J Cutts, James R. Empfield, and Charles J. Cohen

73. Purinergic Signaling in Epilepsy

Tobias Engel and Nicholas Dale

74. Anti-Inflammatory Strategies for Disease Modification: Focus on Therapies Close to Clinical Translation

Annamaria Vezzani, Silvia Balosso, Nicholas H. Varvel, and Ray Dingledine

75. Targeted Augmentation of Nuclear Gene Output (TANGO)

Lori Isom and Kelly G. Knupp

76. Gene Therapy for Epilepsy

Kimberly Goodspeed, Dallas Armstrong, Andrea Boitnott, Alison Dolce, Qinglan Ling, and Steve Gray

77. Gene Therapy for Refractory Epilepsy

Dimitri Kullmann

78. Cell Therapy for Treatment of Epilepsy

Sonja Bröer and Daniel Vogt

79. Mechanisms of Ketogenic Diet Action

Robin Williams, Detlev Boison, Susan Masino, and Jong Rho
