

Section I: Physics, Biophysics, and Technology, Angel V. Peterchev

- 1: Physics and biophysics fundamentals of transcranial stimulation, *Boshuo Wang, Aman S. Aberra, Warren M. Grill, and Angel V. Peterchev*
- 2: Transcranial electrical stimulation devices, *Dennis Q. Truong, Niranjana Khadka, Angel V. Peterchev, and Marom Bikson*
- 3: Transcranial magnetic stimulators, *Angel V. Peterchev and Mark E. Riehl*
- 4: Transcranial magnetic stimulation coils, *Risto J. Ilmoniemi, Zhi-De Deng, Luis Gomez, Lari M. Koponen, Jaakko O. Nieminen, Angel V. Peterchev, and Charles M. Epstein*
- 5: TMS pulse waveform and direction, *Martin Sommer, Ricci Hannah, Angel V. Peterchev, and Walter Paulus*
- 6: Computational methods for dosimetry, *Axel Thielscher, Kristoffer H. Madsen, Gary E. Strangman, and Bradley E. Treeby*
- 7: Neuronavigation, *Stefan M. Goetz and Thomas Kammer*
- 8: Transcranial static magnetic field stimulation, *Guglielmo Foffani and Antonio Oliviero*
- 9: Transcranial ultrasound modulation, *Kim Butts Pauly, Zhihai Qiu, and Wynn Legon*
- 10: Transcranial infrared laser stimulation, *Xinlong Wang, Francisco Gonzalez-Lima, and Hanli Liu*

Section II: TMS measures of motor cortical and corticospinal excitability: Physiology, function and plasticity, Ulf Ziemann

- 11: Motor threshold, motor evoked potential, central motor conduction time, *Sein H. Schmidt and Stephan A. Brandt*
- 12: Cortical silent period, *Markus Kofler and Vasilios Kimiskidis*
- 13: Paired-pulse measures [SICI, SICF, ICF, LICI, LCD], *Robin Cash and Ulf Ziemann*
- 14: Paired-coil measures, *Ritsuko Hanajima, Vincenzo di Lazzaro, Yoshikazu Ugawa*
- 15: Pharmacology of TMS measures, *Ulf Ziemann*
- 16: Clinical Utility of TMS-EMG measures, *Robert Chen and Kai-Hsiang Stanley Chen*
- 17: TMS measures explored by EEG recordings, *Risto Ilmoniemi, Nigel Rogasch, and Silvia Casarotto*
- 18: TMS measures and voluntary motor function, *John Rothwell and Ricci Hannah*
- 19: Changes in TMS measures induced by repetitive TMS, *Joseph Cla?en, Christoph Zrenner, and Ying-Zu Huang*
- 20: Changes in TMS measures induced by transcranial direct and alternating current stimulation, *Michael Nitsche, Walter Paulus, and Gregor Thut*

Section III: Combining transcranial brain stimulation with brain mapping, Hartwig R. Siebner

- 21: Brain mapping and brain stimulation - a framework, *Anke N. Karabanov and Hartwig R. Siebner*
- 22: Transcranial brain stimulation and structural MRI, *Raffaele Dubbioso and Axel Thielscher*
- 23: Transcranial brain stimulation and functional MRI, *Christian Windischberger, Martin Tik, Axel Thielscher, and Hartwig R. Siebner*
- 24: Transcranial brain stimulation and magnetic resonance spectroscopy, *Charlotte J. Stagg*
- 25: Transcranial brain stimulation and PET, *Sang Soo Cho and Antonio Strafella*
- 26: Transcranial brain stimulation and EEG/MEG, *Til Ole Bergmann, Leo Tomasevic, and Hartwig R. Siebner*

Section IV: Transcranial Magnetic Stimulation in Perception and Cognition, Vincent Walsh

- 27: Higher level vision, *David Pitcher*
- 28: Attention and spatial cognition, *Amanda Ellison*
- 29: Decision Making, *Gábor Csifcsák, Matthias Mittner, and Birte U. Forstmann*

30:Numerical Cognition, *Marinella Cappelletti and Maria Silvia Saccani*

31:State-dependent studies on perception and cognition, *Juha Silvanto*

Section V: Noninvasive brain stimulation in learning and memory, *Eric Wasserman*

32:rTMS and implicit learning, *Michael V. Freedberg and Eric Wassermann*

33:Effects of electrical brain stimulation on motor learning, *Anke Ninija Karabanov, Elinor Tzvi-Minker*

34:Transcranial stimulation of episodic memory networks, *Melissa Habscher and Joel L. Voss*

35:Working memory, *Bradley R. Postle, Eva Feredoes, and Jeffrey S. Johnson*

36:Computational Neurostimulation, *Ainslie Johnstone, James J. Bonaiuto, and Sven Bestmann*

37:Ethical Issues in Transcranial Stimulation for Enhancement, *Anita S. Jwa*

Section VI: Therapeutic Applications of Transcranial Stimulation, *Sarah Lisanby*

38:New developments in the treatment of depression with tDCS, *Colleen Loo, Donel Martin, and Adriano Moffa*

39:Stratified precision medicine for transcranial magnetic stimulation treatment of Major Depressive Disorder, *Leanne Williams*

40:TMS in the treatment of posttraumatic stress disorder, *Noah S. Philip, Nick Petrosino, McKenna Brennan*

41:Cognitive enhancement using Noninvasive Brain Stimulation (NIBS), with application to normal and pathological cognitive decline in aging, *Bruce Luber and Lysianne Beynel*

42:Transcranial Stimulation and the Pain Experience, *Bernadette Fitzgibbon and Siobhan Schabrun*

43:Non-Invasive Brain Stimulation in Schizophrenia, *Flavio Frohlich and Fred Jarskog*

44:Experimental and Therapeutic use of Transcranial Stimulation techniques in Autism Spectrum Disorder, *Lindsay Oberman, Peter Enticott, and Melissa Kirkovski*

45:Next Generation Seizure Therapy, *Zhi-De Deng and Sarah H. Lisanby*
