

## **SECTION 1 PITUITARY AND HYPOTHALAMUS**

- 1.1 Development of the Pituitary Gland
- 1.2 Divisions of the Pituitary Gland and Relationship to the Hypothalamus
- 1.3 Blood Supply of the Pituitary Gland
- 1.4 Anatomy and Relationships of the Pituitary Gland
- 1.5 Relationship of the Pituitary Gland to the Cavernous Sinus
- 1.6 Relationships of the Sella Turcica
- 1.7 Anterior Pituitary Hormones and Feedback Control
- 1.8 Posterior Pituitary Gland
- 1.9 Manifestations of Suprasellar Disease
- 1.10 Craniopharyngioma
- 1.11 Effects of Pituitary Tumors on the Visual Apparatus
- 1.12 Nontumorous Lesions of the Pituitary Gland
- 1.13 Pituitary Anterior Lobe Deficiency in Childhood and Adolescence in Boys
- 1.14 Pituitary Anterior Lobe Deficiency in Adults
- 1.15 Selective and Partial Hypopituitarism
- 1.16 Severe Anterior Pituitary Deficiency or Panhypopituitarism
- 1.17 Postpartum Pituitary Infarction (Sheehan Syndrome)
- 1.18 Pituitary Apoplexy
- 1.19 Pituitary Gigantism
- 1.20 Acromegaly
- 1.21 Prolactin-Secreting Pituitary Tumor
- 1.22 Corticotropin-Secreting Pituitary Tumor
- 1.23 Nelson Syndrome
- 1.24 Clinically Nonfunctioning Pituitary Tumor
- 1.25 Secretion and Action of Oxytocin
- 1.26 Secretion and Action of Vasopressin
- 1.27 Central Diabetes Insipidus (Arginine Vasopressin Deficiency)
- 1.28 Langerhans Cell Histiocytosis in Children
- 1.29 Langerhans Cell Histiocytosis in Adults
- 1.30 Pituitary Stalk Lesions
- 1.31 Empty Sella
- 1.32 Tumors Metastatic to the Pituitary
- 1.33 Surgical Approaches to the Pituitary

## **SECTION 2 THYROID**

- 2.1 Anatomy of the Thyroid and Parathyroid Glands
- 2.2 Anatomy of the Thyroid and Parathyroid Glands (Continued)
- 2.3 Development of the Thyroid and Parathyroid Glands
- 2.4 Development of the Thyroid and Parathyroid Glands (Continued)
- 2.5 Congenital Anomalies of the Thyroid Gland
- 2.6 Effects of Thyrotropin on the Thyroid Gland
- 2.7 Physiology of Thyroid Hormones
- 2.8 Graves Disease
- 2.9 Graves Disease (Continued)

- 2.10 Graves Ophthalmopathy
- 2.11 Thyroid Pathology in Graves Disease
- 2.12 Clinical Manifestations of Toxic Adenoma and Toxic Multinodular Goiter
- 2.13 Pathophysiology of Toxic Adenoma and Toxic Multinodular Goiter
- 2.14 Clinical Manifestations of Hypothyroidism in Adults
- 2.15 Clinical Manifestations of Hypothyroidism in Adults (Continued)
- 2.16 Clinical Manifestations of Hypothyroidism in Adults (Continued)
- 2.17 Congenital Hypothyroidism
- 2.18 Euthyroid Goiter
- 2.19 Gross Pathology of Goiter
- 2.20 Etiology of Nontoxic Goiter
- 2.21 Chronic Lymphocytic Thyroiditis and Fibrous Thyroiditis
- 2.22 Subacute Thyroiditis
- 2.23 Papillary Thyroid Carcinoma
- 2.24 Follicular Thyroid Carcinoma
- 2.25 Medullary Thyroid Carcinoma
- 2.26 Oncocytic (Hürthle Cell) Thyroid Carcinoma
- 2.27 Anaplastic Thyroid Carcinoma
- 2.28 Thyroid Biopsy
- 2.29 Tumors Metastatic to the Thyroid

### **SECTION 3 ADRENAL**

- 3.1 Development of the Adrenal Glands
- 3.2 Anatomy and Blood Supply of the Adrenal Glands
- 3.3 Anatomy and Blood Supply of the Adrenal Glands (Continued)
- 3.4 Innervation of the Adrenal Glands
- 3.5 Histology of the Adrenal Glands
- 3.6 Biosynthesis and Metabolism of Adrenal Cortical Hormones
- 3.7 Biosynthesis and Metabolism of Adrenal Cortical Hormones (Continued)
- 3.8 Biologic Actions of Cortisol
- 3.9 Cushing Syndrome: Clinical Findings
- 3.10 Tests Used in the Diagnosis of Cushing Syndrome
- 3.11 Cushing Syndrome: Pathophysiology
- 3.12 Carney Complex: Cushing Syndrome Caused by Primary Pigmented Nodular Adrenocortical Disease
- 3.13 Major Blocks in Abnormal Steroidogenesis
- 3.14 Classic Congenital Adrenal Hyperplasia
- 3.15 Biologic Actions of Adrenal Androgens
- 3.16 Adult Androgenital Syndromes
- 3.17 Biologic Actions of Aldosterone
- 3.18 Primary Aldosteronism
- 3.19 Adrenal Venous Sampling for Primary Aldosteronism
- 3.20 Renin-Angiotensin-Aldosterone System and Renovascular Hypertension
- 3.21 Acute Adrenal Failure: Adrenal Crisis
- 3.22 Chronic Primary Adrenal Failure: Addison Disease
- 3.23 Laboratory Findings and Treatment of Primary Adrenal Insufficiency

- 3.24 Laboratory Findings and Treatment of Secondary Adrenal Insufficiency
- 3.25 Adrenal Medulla and Catecholamines
- 3.26 Catecholamine Synthesis, Storage, Secretion, Metabolism, and Inactivation
- 3.27 Pheochromocytoma and Paraganglioma
- 3.28 Pheochromocytoma and Paraganglioma (Continued)
- 3.29 Metastatic Pheochromocytoma and Paraganglioma
- 3.30 Adrenocortical Carcinoma
- 3.31 Tumors Metastatic to the Adrenal Glands

#### **SECTION 4 REPRODUCTION**

- 4.1 Differentiation of Gonads
- 4.2 Differentiation of Genital Ducts
- 4.3 Differentiation of External Genitalia
- 4.4 Testosterone and Estrogen Synthesis
- 4.5 Normal Puberty
- 4.6 Normal Puberty (Continued)
- 4.7 Normal Puberty (Continued)
- 4.8 Normal Puberty (Continued)
- 4.9 Precocious Puberty
- 4.10 Precocious Puberty (Continued)
- 4.11 Precocious Puberty (Continued)
- 4.12 Disorders of Sex Development
- 4.13 Disorders of Sex Development (Continued)
- 4.14 Disorders of Sex Development (Continued)
- 4.15 Disorders of Sex Development (Continued)
- 4.16 Errors in Chromosomal Sex
- 4.17 Klinefelter Syndrome
- 4.18 Turner Syndrome (Gonadal Dysgenesis)
- 4.19 Turner Syndrome (Gonadal Dysgenesis) (Continued)
- 4.20 Turner Syndrome (Gonadal Dysgenesis) (Continued)
- 4.21 Hirsutism and Virilization
- 4.22 Hirsutism and Virilization (Continued)
- 4.23 Influence of Gonadal Hormones on the Female Reproductive Cycle From Birth to Old Age
- 4.24 Functional and Pathologic Causes of Uterine Bleeding
- 4.25 Gynecomastia
- 4.26 Galactorrhea

#### **SECTION 5 PANCREAS**

- 5.1 Pancreas Anatomy and Histology
- 5.2 Exocrine Functions of the Pancreas
- 5.3 Normal Histology of Pancreatic Islets
- 5.4 Insulin Secretion
- 5.5 Actions of Insulin
- 5.6 Glycolysis
- 5.7 Tricarboxylic Acid Cycle
- 5.8 Glycogen Metabolism

- 5.9 Consequences of Insulin Deprivation
- 5.10 Diabetic Ketoacidosis
- 5.11 Type 1 Diabetes Mellitus
- 5.12 Type 2 Diabetes Mellitus
- 5.13 Diabetic Retinopathy
- 5.14 Complications of Proliferative Diabetic Retinopathy
- 5.15 Diabetic Nephropathy
- 5.16 Diabetic Neuropathy
- 5.17 Atherosclerosis in Diabetes
- 5.18 Diabetes-Related Dermatologic Manifestations
- 5.19 Vascular Insufficiency in Diabetes: The Diabetic Foot
- 5.20 Diabetes Mellitus in Pregnancy
- 5.21 Treatment of Type 2 Diabetes Mellitus
- 5.22 Intensive Diabetes Therapy of Type 1 Diabetes Mellitus
- 5.23 Insulinoma
- 5.24 Primary Pancreatic b-Cell Hyperplasia

## **SECTION 6 BONE AND CALCIUM**

- 6.1 Histology of the Normal Parathyroid Glands
- 6.2 Physiology of the Parathyroid Glands
- 6.3 Bone Remodeling Unit
- 6.4 Pathophysiology of Primary Hyperparathyroidism
- 6.5 Pathology and Clinical Manifestations of Primary Hyperparathyroidism
- 6.6 Tests for the Differential Diagnosis of the Causes of Hypercalcemia
- 6.7 Renal Osteodystrophy
- 6.8 Renal Osteodystrophy (Continued)
- 6.9 Histology of the Parathyroid Glands in Hyperparathyroidism
- 6.10 Pathophysiology of Hypoparathyroidism
- 6.11 Clinical Manifestations of Acute Hypocalcemia
- 6.12 Pathophysiology of Pseudohypoparathyroidism
- 6.13 Clinical Manifestations of Pseudohypoparathyroidism Type 1a
- 6.14 Pathogenesis of Osteoporosis
- 6.15 Osteoporosis in Postmenopausal Females
- 6.16 Osteoporosis in Males
- 6.17 Clinical Manifestations of Osteoporotic Vertebral Compression Fractures
- 6.18 Nutritional-Deficiency Rickets and Osteomalacia
- 6.19 Pseudovitamin D–Deficient Rickets and Osteomalacia
- 6.20 Hypophosphatemic Rickets
- 6.21 Clinical Manifestations of Rickets in Childhood
- 6.22 Clinical Manifestations of Osteomalacia in Adults
- 6.23 Paget Disease of the Bone
- 6.24 Pathogenesis and Treatment of Paget Disease of the Bone
- 6.25 Osteogenesis Imperfecta
- 6.26 Osteogenesis Imperfecta (Continued)
- 6.27 Hypophosphatasia

## **SECTION 7 LIPIDS AND NUTRITION**

- 7.1 Cholesterol Synthesis and Metabolism
- 7.2 Gastrointestinal Absorption of Cholesterol and Triglycerides
- 7.3 Regulation of Low-Density Lipoprotein Receptor and Cholesterol Content
- 7.4 High-Density Lipoprotein Metabolism and Reverse Cholesterol Transport
- 7.5 Hypercholesterolemia
- 7.6 Hypercholesterolemic Xanthomatosis
- 7.7 Hypercholesterolemic Xanthomatosis (Continued)
- 7.8 Abetalipoproteinemia and Tangier Disease
- 7.9 Hypertriglyceridemia
- 7.10 Clinical Manifestations of Hypertriglyceridemia
- 7.11 Clinical Manifestations of Hypertriglyceridemia (Continued)
- 7.12 Atherosclerosis
- 7.13 Atherosclerosis (Continued)
- 7.14 Atherosclerosis Risk Factors
- 7.15 Metabolic Syndrome
- 7.16 Mechanisms of Action of Lipid-Lowering Agents
- 7.17 Treatment of Hyperlipidemia
- 7.18 Absorption of Essential Vitamins
- 7.19 Vitamin B1 Deficiency: Beriberi
- 7.20 Vitamin B3 Deficiency: Pellagra
- 7.21 Vitamin C Deficiency: Scurvy
- 7.22 Vitamin A Deficiency
- 7.23 Celiac Disease and Malabsorption
- 7.24 Lysosomal Storage Disorders: Sphingolipidoses
- 7.24 Lysosomal Storage Disorders: Sphingolipidoses (Continued)
- 7.25 Anorexia Nervosa
- 7.26 Obesity
- 7.27 Surgical Treatment Options for Obesity

## **SECTION 8 GENETICS AND ENDOCRINE NEOPLASIA**

- 8.1 Multiple Endocrine Neoplasia Type 1
- 8.2 Multiple Endocrine Neoplasia Type 2
- 8.3 Multiple Endocrine Neoplasia Type 2 (Continued)
- 8.4 Von Hippel-Lindau Syndrome
- 8.5 Neurofibromatosis Type 1 (von Recklinghausen Disease)
- 8.6 Clinical Manifestations of Autoimmune Polyglandular Syndrome Type 1
- 8.7 Carcinoid Syndrome
- 8.8 McCune-Albright Syndrome
- 8.9 Carney Triad
