

Features:

- Covers everything from basic science, immunology, anatomy, and physiology to diagnostic tests, procedures, physical examination, and disease pathogenesis, manifestations and treatment?including **key data on outcomes** to better inform clinical decision making.
- Includes **new or significantly revised chapters** on Pre-Clinical Autoimmunity; The Microbiome in Health and Disease; Physical Therapy and Rehabilitation; Nutrition and Rheumatic Disease; Classification and Epidemiology of Spondyloarthritis; Etiology and Pathogenesis of Osteoarthritis; COVID and Rheumatic Disease; Vaccination in Rheumatic Disease; Autoimmune Complications of Immune Checkpoint Inhibitors for Cancer; and many more.
- Features **1,200 high-quality illustrations**, including superb line art, quick-reference tables, and full-color clinical photographs; many new illustrations highlight diseases among racially diverse patients.
- Shares the knowledge and expertise of **internationally renowned scientists and clinicians**, including new editors Drs. Ted Mikuls and Tuhina Neogi.
- Demonstrates the complete musculoskeletal exam in **online videos**, including abnormal findings and the arthroscopic presentation of diseased joints.
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud. Additional digital ancillary content may publish up to 6 weeks following the publication date.

Περιεχόμενα:

VOLUME I

Part 1: Structure and Function of Bone, Joints, and Connective Tissue

1 Developmental Biology, Organization, and Function of the Synovial Joints

2 Synovium

3 Cartilage and Chondrocytes

Development and Biology of Bone

5 Muscle Anatomy, Physiology, and Biochemistry

6 Biomechanics

7 Regenerative Medicine and Tissue Engineering

8 Proteinases and Matrix Degradation

Part 2: Cells Involved in Autoimmune Diseases and Inflammation

9 Dendritic Cells

10 Mononuclear Phagocytes

11 Neutrophils

12 T Lymphocytes

13 B Cells

- 14 Fibroblasts and Fibroblast-like Synoviocytes
- 15 Mast Cells and Basophils
- 16 Innate Lymphoid Cells and Natural Killer Cells
- 17 Platelets and Megakaryocytes

Part 3: Effector Mechanisms in Autoimmunity and Inflammation

- 18 Principles of Signaling
- 19 Innate Immunity
- 20 Adaptive Immunity
- 21 Immune Tolerance and Autoimmunity
- 22 Pre-clinical Autoimmunity
- 23 The Microbiome in Rheumatic Diseases
- 24 Genetics of Rheumatic Diseases
- 25 Epigenetics of Rheumatic Diseases
- 26 Complement System
- 27 Prostaglandins, Leukotrienes, and Related Compounds
- 28 Angiogenesis
- 29 Cytokines and Chemokines
- 30 Neuronal Mechanisms of Pain and Inflammation

Part 4: Broad Issues in the Approach to Rheumatic Disease

- 31 Clinical Research Methods in the Rheumatic Diseases
- 32 Epidemiology and Impact of Rheumatic Diseases
- 33 Assessment of Health Outcomes
- 34 Biomarkers in Rheumatology
- 35 Occupational, Environmental, and Recreational Musculoskeletal Disorders
- 36 Cardiovascular Risk in Inflammatory Rheumatic Disease
- 37 Cancer Risk in Rheumatic Diseases
- 38 Occupational Therapy, Physical Therapy, and Rehabilitation
- 39 General Principles of Pregnancy and Rheumatic Disease: Pre-pregnancy Assessment

Part 5: Evaluation of Generalized and Localized Symptoms

- 40 History and Physical Examination of the Musculoskeletal System
- 41 Ultrasound in Rheumatology
- 42 Evaluation of Monoarticular and Polyarticular Arthritis
- 43 Skin and Rheumatic Diseases
- 44 The Eye and Rheumatic Diseases

Part 6: Differential Diagnosis of Regional and Diffuse Musculoskeletal Pain

- 45 Neck Pain
- 46 Shoulder Pain
- 47 Low Back Pain
- 48 Hip and Knee Pain
- 49 Foot and Ankle Pain
- 50 Hand and Wrist Pain
- 51 Temporomandibular Joint Disorders
- 52 Fibromyalgia

Part 7: Diagnostic Tests and Procedures in Rheumatic Diseases

53 Synovial Fluid Analyses, Synovial Biopsy, and Synovial Pathology

54 Arthrocentesis and Injection of Joints and Soft
Tissues

55 Anti-nuclear Antibodies

56 Autoantibodies in Rheumatoid Arthritis

57 Acute Phase Reactants

58 Imaging in Rheumatic Diseases

VOLUME II

Part 8: Pharmacology of Anti-rheumatic

59 Therapeutic Targeting of Prostanoids

60 Glucocorticoid Therapy

61 Traditional DMARDs: Methotrexate, Leflunomide, Sulfasalazine, Hydroxychloroquine,
and Combination Therapies

62 Immunosuppressive Drugs

63 Anti-cytokine Biologics

64 Cell-Targeted Biologics and Emerging
Targets: Rituximab, Abatacept, and Other Biologics

65 Janus Kinase and Other Intra-cellular Targets

66 Urate-Lowering Therapy

67 Bisphosphonates

68 Analgesic Agents in Rheumatic Disease

69 Nutrition and Rheumatic Diseases

Part 9: Rheumatoid Arthritis and Sjögren's Syndrome

70 Etiology of Rheumatoid Arthritis

71 Pathogenesis of Rheumatoid Arthritis

72 Clinical Features of Rheumatoid Arthritis

73 Treatment of Rheumatoid Arthritis

74 Sjögren's Syndrome

Part 10: Spondyloarthritis

75 Classification and Epidemiology of Spondyloarthritis

76 Axial Spondyloarthritis

77 Reactive Arthritis

78 Psoriatic Arthritis

79 Inflammatory Bowel Disease–Associated Arthritis and Other Enteropathic Arthropathies

Part 11: Systemic Lupus Erythematosus and Related Syndromes

80 Etiology and Pathogenesis of Systemic Lupus Erythematosus

81 Clinical Features of Systemic Lupus Erythematosus

82 Treatment of Systemic Lupus Erythematosus

83 Antiphospholipid Syndrome

Part 12: Systemic Sclerosis, Inflammatory Myopathies, and Overlap Syndromes

84 Etiology and Pathogenesis of Systemic Sclerosis

85 Clinical Features and Treatment of Scleroderma

86 Inflammatory Diseases of Muscle and Other Myopathies

87 Overlap Syndromes

Part 13: Vasculitis

- 88 Classification and Epidemiology of Systemic Vasculitis
- 89 Giant Cell Arteritis, Polymyalgia Rheumatica, and Takayasu's Arteritis
- 90 Anti-neutrophil Cytoplasmic Antibody-Associated Vasculitis
- 91 Polyarteritis Nodosa
- 92 Immune Complex-Mediated Small Vessel Vasculitis
- 93 Primary Central Nervous System Vasculitis
- 94 Behçet's Disease

Part 14: Crystal-Induced and Inflammasome-Mediated Inflammation

- 95 Pathogenesis of Inflammasome-Mediated Diseases
- 96 Etiology and Pathogenesis of Hyperuricemia and Gout
- 97 Clinical Features and Treatment of Gout
- 98 Calcium Crystal Disease: Calcium Pyrophosphate Deposition Disease and Basic Calcium Phosphate-Associated Syndromes
- 99 Familial and Nonfamilial Autoinflammatory Syndromes

Part 15: Cartilage, Bone, and Heritable Connective Tissue Disorders

- 100 Etiology and Pathogenesis of Osteoarthritis
- 101 Clinical Features of Osteoarthritis
- 102 Treatment of Osteoarthritis
- 103 Metabolic Bone Disease
- 104 Proliferative Bone Diseases
- 105 Osteonecrosis
- 106 Relapsing Polychondritis
- 107 Heritable Diseases of Connective Tissues

Part 16: Rheumatic Diseases of Childhood

- 108 Etiology and Pathogenesis of Juvenile Idiopathic Arthritis
- 109 Clinical Features and Treatment of Juvenile Idiopathic Arthritis
- 110 Childhood-Onset Systemic Lupus Erythematosus, Drug-Induced Lupus in Children, and Neonatal Lupus
- 111 Juvenile Dermatomyositis, Scleroderma, and Vasculitis

Part 17: Infections and Rheumatic Disease

- 112 Bacterial Arthritis
- 113 Lyme Disease
- 114 Mycobacterial Infections of Bones and Joints
- 115 Fungal Infections of Bones and Joints
- 116 Rheumatic Manifestations of Human Immunodeficiency Virus Infection
- 117 Viral Arthritis
- 118 Rheumatic Fever and Post-streptococcal Arthritis
- 119 COVID-19 and Rheumatic Disease
- 120 Vaccination in Rheumatic Disease

Part 18: Arthritis Accompanying Systemic Disease

- 121 Amyloidosis
- 122 Sarcoidosis
- 123 Hemochromatosis

- 124 Hemophilic Arthropathy
- 125 Rheumatic Manifestations of Hemoglobinopathies
- 126 IgG4-Related Disease
- 127 Arthritis Accompanying Endocrine and
- 128 Rheumatic Paraneoplastic Syndromes and Malignancies With Rheumatic Manifestations
- 129 Tumors and Tumor-like Lesions of Joints and Related Structures
- 130 Autoimmune Complications of Immune Checkpoint Inhibitors for Cancer
