# **Practical Guides in Radiation Oncology**

## **Series Editors**

Nancy Y. Lee, Department of Radiation Oncology, Memorial Sloan-Kettering Cancer Center, New York, NY, USA

Jiade J. Lu, Department of Radiation Oncology, Shanghai Proton and Heavy Ion Center, Shanghai, China

The series Practical Guides in Radiation Oncology is designed to assist radiation oncology residents and practicing radiation oncologists in the application of current techniques in radiation oncology and day-to-day management in clinical practice, i.e., treatment planning. Individual volumes offer clear guidance on contouring in different cancers and present treatment recommendations, including with regard to advanced options such as intensity-modulated radiation therapy (IMRT) and stereotactic body radiation therapy (SBRT). Each volume addresses one particular area of practice and is edited by experts with an outstanding international reputation. Readers will find the series to be an ideal source of up-to-date information on when to apply the various available technologies and how to perform safe treatment planning.
