

Features:

- Information on more than 1000 conditions commonly seen in general practice
- Bullet points for action give the GP an immediate summary of the issues that must be covered in the consultation
- All recommendations are highly specific – provides a firm guide for GPs rather than a list of possibilities to consider
- Recommendations all based on the latest evidence and guidelines
- Uses bullet points, tables and flow charts to help the reader access information quickly
- Useful appendices include treatment algorithms and tables

New To This Edition:

- New section on the management of obesity
- New section on the management of acute kidney injuries
- Updated in line with new NICE guidelines
