Preface	xi	Synonyms and Eponyms of the Spinal Cord	74
Acknowledgments	xiii	Follow-up to Clinical Case	74
About the Companion Website	xv	Questions to Ponder	74
Part I General Principles of the Nervous System	1	Chapter 6 Gross Anatomy of the Brain	75
Chapter 1 Introduction to the Nervous System	3	Clinical Case	75
Cells of the Central Nervous System	5	Cerebrum	76
Central Nervous System	6	Diencephalon	84
Peripheral Nervous System	9	Cerebellum	85
Questions to Ponder	10	Brainstem	87
Chapter 2 Development of the Nervous System	11	Clinical Considerations	88
Clinical Case	11	Synonyms and Eponyms of the Brain	90
Early Development	12	Follow-up to Clinical Case	90
Neurulation	14	Questions to Ponder	90
Early Development of the Spinal Cord and Brain	19	Chapter 7 Brainstem	91
Development of the Spinal Cord	21	Clinical Case	91
Development of the Brain	23	Internal Organization of the Brainstem	91
Clinical Considerations	30	Medulla Oblongata	96
Synonyms and Eponyms of the Nervous System	31	Pons	102
Follow-up to Clinical Case	31	Midbrain	107
Questions to Ponder	31	Clinical Considerations	111
Chapter 3 Histophysiology of the Nervous System	32	Synonyms and Eponyms of the Brainstem	116
Clinical Case	32	Follow-up to Clinical Case	116
Neurons	33	Questions to Ponder	116
Neuroglia	40	Chapter 8 Meninges and Cerebrospinal Fluid	117
Generation and Conduction of Nerve Impulses	44	Clinical Case	117
Clinical Considerations	47	Cranial Meninges	118
Synonyms and Eponyms of Nervous System		Spinal Meninges	126
Histophysiology	48	Venous Sinuses of the Cranial Dura Mater	127
Follow-up to Clinical Case	48	Cerebrospinal Fluid	130
Questions to Ponder	48	Ventricles of the Brain	130
Chapter 4 Neurotransmitter Substances	49	Clinical Considerations	131
Clinical Case	49	Synonyms and Eponyms of the Cranial Meninges	132
Classification of Neurotransmitter Substances	52	Follow-up to Clinical Case	132
Clinical Considerations	58	Questions to Ponder	132
Follow-up to Clinical Case	59	Chapter 9 Vascular Supply of the Central Nervous System	133
Questions to Ponder	59	Clinical Case	133
Chapter 5 Spinal Cord	60	Vascular Supply of the Spinal Cord	134
Clinical Case	60	Arterial Supply of the Brain	135
Morphology of the Spinal Cord	61	Venous Drainage of the Brain	149
Internal Morphology of the Spinal Cord	67	Clinical Considerations	152
Vascular Supply of the Spinal Cord	70	Synonyms and Eponyms of the Vascular Supply of the Central Nervous System	153
Clinical Considerations	73	Follow-up to Clinical Case	153
		Questions to Ponder	153

VIII ●●● CONTENTS

Chapter 10 Autonomic Nervous System	154	Chapter 14 Basal Nuclei	255
Clinical Case	154	Clinical Case	255
Sympathetic Nervous System	157	Components of the Basal Nuclei	256
Parasympathetic Nervous System	164	Nuclei Associated with the Basal Nuclei	260
Enteric Nervous System	167	Input, Intrinsic, and Output Nuclei of the Basal Nuclei	261
Neurotransmitters and Receptors of the Autonomic Nervous System	168	Connections of the Basal Nuclei	263
Pelvic Autonomic Functions	169	Circuits Connecting the Basal Nuclei, Thalamus, and Cerebral Cortex	270
Clinical Considerations	171	Other Circuits of the Basal Nuclei	273
Synonyms and Eponyms of the Autonomic Nervous System	172	Neurotransmitters of the Basal Nuclei	274
Follow-up to Clinical Case	172	“Direct,” “Indirect,” and “Hyperdirect” Loops (Pathways) of the Basal Nuclei	275
Questions to Ponder	172	Circuits that Modulate Activity of the Basal Nuclei	277
Chapter 11 Spinal Reflexes	173	Clinical Considerations	278
Clinical Case	173	Synonyms and Eponyms of the Basal Nuclei	283
Components of Reflexes	173	Follow-up to Clinical Case	284
Lower Motor Neurons	174	Questions to Ponder	284
Skeletal Muscle Innervation	175	Chapter 15 Cerebellum	285
Skeletal Muscle Receptors	176	Clinical Case	285
Muscle Stretch Reflex	176	Morphology of the Cerebellum	287
Reciprocal Inhibition	177	Cerebellar Peduncles	296
Autogenic Inhibition (Inverse Myotatic Reflex)	178	Deep Cerebellar Nuclei	298
Flexor Reflex (Withdrawal Reflex, Nociceptive Reflex)	178	Afferents (Input) to the Cerebellum	299
Crossed Extension Reflex	179	Efferents (Output) from the Cerebellum	304
Maintenance of Muscle Tone Via the Gamma Loop	180	Functional Organization of the Cerebellum: Intrinsic Circuitry	305
Alpha-Gamma Coactivation	180	Clinical Considerations	307
Synonyms and Eponyms of the Spinal Reflexes	182	Synonyms and Eponyms of the Cerebellum	309
Follow-up to Clinical Case	182	Follow-up to Clinical Case	309
Questions to Ponder	182	Questions to Ponder	309
Part II Integrative Components of the Nervous System	183	Chapter 16 Reticular Formation	310
Chapter 12 Ascending Sensory Pathways	185	Clinical Case	310
Clinical Case	185	Morphology of the Reticular Formation	311
Sensory Receptors	187	Zones of the Reticular Formation	312
Anterolateral System	197	Nuclei Associated with the Reticular Formation	314
Tactile Sensation and Proprioception	207	Input to and Output from the Reticular Formation	314
Sensory Pathways to the Cerebellum	214	Functions of the Reticular Formation	315
Clinical Considerations	218	Clinical Considerations	321
Modulation of Nociception	226	Synonyms and Eponyms of the Reticular Formation	322
Neuroplasticity	229	Follow-up to Clinical Case	322
Synonyms and Eponyms of the Ascending Sensory Pathways	229	Questions to Ponder	322
Follow-up to Clinical Case	230	Chapter 17 Cranial Nerves	323
Questions to Ponder	230	Clinical Case	323
Chapter 13 Motor Cortex and Descending Motor Pathways	231	Olfactory Nerve (CN I)	329
Clinical Case	231	Optic Nerve (CN II)	329
Cortical Areas Controlling Motor Activity	232	Oculomotor Nerve (CN III)	329
Descending Motor Pathways	235	Clinical Considerations	331
Clinical Considerations	249	Trochlear Nerve (CN IV)	331
Synonyms and Eponyms of the Motor Cortex and Descending Motor Pathways	253	Trigeminal Nerve (CN V)	334
Follow-up to Clinical Case	254	Clinical Considerations	340
Questions to Ponder	254	Abducens Nerve (CN VI)	341
		Clinical Considerations	342
		Facial Nerve (CN VII)	346

Vestibulocochlear Nerve (CN VIII)	348	Chapter 22 Limbic System	434
Glossopharyngeal Nerve (CN IX)	349	Clinical Case	434
Clinical Considerations	349	Limbic Lobe	435
Clinical Considerations	353	Brainstem Centers Associated with Limbic System	
Vagus Nerve (CN X)	353	Function	446
Clinical Considerations	354	Pathways of the Limbic System	446
Accessory Nerve (CN XI)	354	Limbic Association Cortex	449
Clinical Considerations	357	Limbic System Input to the Endocrine, Autonomic,	
Hypoglossal Nerve (CN XII)	357	and Somatic Motor Systems	449
Clinical Considerations	358	Clinical Considerations	450
Synonyms and Eponyms of the Cranial Nerves	359	Synonyms and Eponyms of the Limbic System	451
Follow-up to Clinical Case	360	Follow-up to Clinical Case	451
Questions to Ponder	360	Questions to Ponder	452
Chapter 18 Visual System	361	Chapter 23 Hypothalamus	453
Clinical Case	361	Clinical Case	453
Eyeball	361	Borders	454
Central Visual Pathways	367	Hypothalamic Zones and Component Nuclei	455
Visual Reflexes	377	Hypothalamic Regions (Areas) and Component	
Clinical Considerations	384	Nuclei	457
Synonyms and Eponyms of the Visual System	387	Connections of the Hypothalamus	462
Follow-up to Clinical Case	387	Pathways of the Hypothalamus	463
Questions to Ponder	387	Functions of the Hypothalamus	466
		Hypothalamohypophyseal Connections	469
Chapter 19 Auditory System	388	Clinical Considerations	475
Clinical Case	388	Synonyms and Eponyms of the Hypothalamus	477
Ear	389	Follow-up to Clinical Case	478
Auditory Transmission	393	Questions to Ponder	478
Central Auditory Pathways	394		
Clinical Considerations	403	Chapter 24 Thalamus	480
Synonyms and Eponyms of the Auditory System	404	Clinical Case	480
Follow-up to Clinical Case	404	Borders	480
Questions to Ponder	404	Anatomy	482
		Internal and External Medullary Laminae	483
Chapter 20 Vestibular System	405	Thalamic Nuclei	484
Clinical Case	405	Clinical Considerations	491
Vestibular Apparatus	406	Synonyms and Eponyms of the Thalamus	492
Vestibular Nerve (CN VIII)	411	Follow-up to Clinical Case	492
Central Pathways of the Vestibular System	413	Questions to Ponder	493
Control of Ocular Movements	417		
Vestibular Nystagmus	421	Chapter 25 Cerebral Cortex	494
Caloric Nystagmus	421	Clinical Case	494
Synonyms and Eponyms of the Vestibular System	423	Cells of the Cerebral Cortex	496
Follow-up to Clinical Case	423	Types of Cortex	498
Questions to Ponder	423	Cell Layers of the Neocortex	499
		Vertical Columnar Organization of the	
Chapter 21 Olfactory System	424	Cerebral Cortex	500
Clinical Case	424	Afferents (Input) to the Cerebral Cortex	500
Olfactory Receptor Neurons	425	Efferents (Output) from the Cerebral Cortex	501
Olfactory Transduction	427	Internal Capsule and Corona Radiata	504
Olfactory Nerve (CN I)	428	Lobes of the Cerebral Cortex	504
Central Connections of the Olfactory System	429	Functional Organization of the Cerebral Cortex	505
Blood Supply and Drainage	431	Cerebral Dominance	512
Clinical Considerations	432	Clinical Considerations	515
Synonyms and Eponyms of the Olfactory System	433	Synonyms and Eponyms of the Cerebral Cortex	519
Follow-up to Clinical Case	433	Follow-up to Clinical Case	520
Questions to Ponder	433	Questions to Ponder	521

X ●●● CONTENTS

Chapter 26 Evolution of the Human Brain	522		
Evolutionary Biology Fundamentals	522	Questions to ponder: answers to odd questions	524
Early Hominins	522	Questions to ponder: answers to even questions	533
Non-Human Primates	522		
Modern Human Brains	523	Answers to clinical case margin questions	541
Prenatal and Postnatal Development	523	Index	545
