

1. Introduction to Diabetes Mellitus

1.1 Introduction

1.2 Pathophysiology and Types of Diabetes

1.3 Symptoms, Causes and Diagnosis of Diabetes

1.4 Treatment of Diabetes

1.5 Different Target Enzymes involved in Diabetes

2. Dipeptidyl Peptidase-4 (DPP-4) Enzyme in Diabetes Mellitus

2.1 Introduction

2.2 DPP-4 enzyme function

2.3 DPP-4 enzyme mode of action

2.4 DPP-4 inhibitory drugs for management of diabetes

2.4 Adverse effect of DPP-4 inhibitor

2.5 Conclusion

3. PPAR- γ (Peroxisome proliferator-activated receptor) receptor in Diabetes Mellitus

3.1 Introduction

3.2 Types of PPAR

3.3 Mechanism of action of PPAR- γ

3.4 PPAR- γ agonists for management of diabetes

3.5 Adverse effect of PPAR- γ agonists

3.6 Conclusion

4. α -glucosidase in Diabetes Mellitus

4.1 Introduction

4.2 Mechanism of action of α -glucosidase

4.3 α -glucosidase inhibitors for management of diabetes

4.4 Adverse effect of α -glucosidase

4.5 Conclusion

5. Sodium-glucose cotransporter-2 (SGLT2) in Diabetes Mellitus

5.1 Introduction

5.2 Mechanism of action of SGLT2

5.3 SGLT2 inhibitors for management of diabetes

5.4 Adverse effect of SGLT2

5.5 Conclusion

6. Insulin in Diabetes Mellitus

6.1 Introduction

6.2 Mechanism of action of insulin

6.3 Insulin agonists for management of diabetes

6.4 Adverse effect of Insuline agonists

6.5 Conclusion

7. Glucagon-like peptide-1 receptor in Diabetes Mellitus

7.1 Introduction

7.2 Mechanism of action of Glucagon-like peptide-1 receptor

7.3 Glucagon-like peptide-1 receptor agonists for management of diabetes

7.4 Adverse effect of Glucagon-like peptide-1 receptor

7.5 Conclusion

8. Amylin in Diabetes Mellitus

8.1 Introduction

8.2 Mechanism of action of Amylin

8.3 Amylin agonists for management of diabetes

8.4 Adverse effect of Amylin

8.5 Conclusion

9. Miscellaneous drug combinations in Diabetes Mellitus

9.1 Introduction

9.2 Antidiabetic drug combinations

9.3 Adverse effect of Drug combinations

9.4 Conclusion

10. Antidiabetic drugs from Natural Sources

10.1 Introduction

10.2 Natural plants

10.3 Side effects

10.4 Conclusion

11. Future challenges in targeted drug for Diabetes Mellitus
