

Part I: The presentation of rheumatic disease

- 1:Evaluating rheumatological and musculoskeletal symptoms
- 2:Musculoskeletal assessment and patterns of disease: making a working diagnosis
- 3:Regional musculoskeletal symptoms: making a working diagnosis
- 4:The spectrum of disorders associated with adult rheumatic and musculoskeletal diseases

Part II: The clinical features and management of rheumatic diseases

- 5:Rheumatoid arthritis
- 6:Osteoarthritis
- 7:Crystal-induced musculoskeletal disease
- 8:The spondyloarthritides including psoriatic arthritis
- 9:Juvenile idiopathic arthritis
- 10:Systemic lupus erythematosus
- 11:Antiphospholipid syndrome
- 12:Sjögren's syndrome
- 13:Systemic sclerosis and related disorders
- 14:Idiopathic inflammatory myopathies including polymyositis and dermatomyositis
- 15:Primary vasculitides
- 16:Metabolic bone diseases
- 17:Infection and rheumatic disease
- 18:Rare autoinflammatory and miscellaneous diseases
- 19:Hereditary disorders of connective tissue
- 20:Common upper limb musculoskeletal lesions
- 21:Spinal disorders and back pain
- 22:Chronic pain syndromes

Part III: Medicine management and emergencies

- 23:Drugs used in rheumatology practice
- 24:Glucocorticoid injection therapy
- 25:Rheumatological emergencies
