

Section 1: Rare tumors of the esophagus

1. Case 1. 60 y.o. M presents with dysphagia, odynophagia and 30 pounds weight
2. Case 2. 60 y.o. M presents with a gastroesophageal junction mass
3. Case 3. 72 y.o. F presents with dysphagia and found to have a submucosal esophageal mass
4. Case 4. 70 y.o. M presents with dysphagia
5. Case 5. 40 y.o. M presents with melena
6. Case 6. 21 y.o. M presents with fatigue and progressive dysphagia
7. Case 7. 76 y.o. F presents with dysphagia, anorexia, and weight loss

Section 2: Rare tumors of the stomach

8. Case 1. 59 y.o. F presents with chronic anemia, bloating and early satiety
9. Case 2. 26 y.o. M with longstanding abdominal pain found a pedunculated gastric mass on endoscopy
10. Case 3. 74 y.o. M presents with anemia
11. Case 4. 69 y.o. M presents with hematemesis
12. Case 5. 84 y.o. M presents with a small nodule on the body of stomach
13. Case 6. 51 y.o. F presents with a 2-cm gastric polyp
14. Case 7. 60 y.o. F presents with a distal gastric mass
15. Case 8. 77 y.o. F with a history of stage IA breast carcinoma presents with new gastric mass
16. Case 9. 57 y.o. F presents with nausea and multiple episodes of hematemesis
17. Case 10. 37 y.o. F presents with a 10-cm gastric body mass
18. Case 11. 64 y.o. F presents with dyspepsia and a gastric nodule
19. Case 12. 17 y.o. M presents with a large gastric mass
20. Case 13. 59 y.o. M presents with an asymptomatic slow growing stomach mass

Section 3: Rare tumors of the small intestine (duodenum to ileum)

21. Case 1. 76 y.o. M presents with abdominal discomfort
22. Case 2. 79 y.o. F presents with abdominal pain, jaundice, and weight loss
23. Case 3. 46 y.o. M presents with abdominal pain
24. Case 4. 60 y.o. F presents with abdominal pain
25. Case 5. 29 y.o. M presents with cough and abdominal cramping
26. Case 6. 66 y.o. F presents with severe abdominal pain and found small bowel perforation
27. Case 7. 78 y.o. F presents with abdominal pain, swelling, and night sweat
28. Case 8. 56 y.o. M presents with abdominal discomfort and found to have innumerable polypoid lesions in terminal ileum and colon
29. Case 9. 78 y.o. F presents with abdominal pain and night sweat
30. Case 10. 50 y.o. M presents with a large mass of the small intestine

Section 4: Rare tumors of the appendix

31. Case 1. 83 y.o. M presents with indigestion
32. Case 2. 55 y.o. F presents with abdominal pain and loose stool

Section 5: Rare tumors of the large intestine

33. Case 1. 46 y.o. M found numerous polyps through the entire colon in colonoscopy
34. Case 2. 60 y.o. F presents with gastrointestinal polyps involving the stomach and colon

35. Case 3. 52 y.o. M presents with near obstructing ascending colon mass
36. Case 4. 59 y.o. F presented with surveillance colonoscopy found to have a 3.5 cm mass in ascending colon
37. Case 5. 68 y.o. F presents with diarrhea and GI bleeding
38. Case 6. 70 y.o. M presents with abdominal pain and bowel obstruction
39. Case 7. 60 y.o. M with history of ulcerative colitis on Ozanimod
40. Case 8. 63 y.o. F presents with abdominal pain and bloody stool
41. Case 9. 58 y.o. F presents with abdominal mass
42. Case 10. 25 y.o. M presents with ascending colon polyp
43. Case 11. 15 y.o. F presents with abdominal pain, weight loss and constipation
44. Case 12. 68 y.o. F presents with 8 cm rectal mass
45. Case 13. 35 y.o. F presents with a retroperitoneal cyst
46. Case 14. 71 y.o. F presents with a cecal mass
47. Case 15. 15 y.o. F presents with a cecal mass
48. Case 16. 56 y.o. M presents with fatigue and abdominal discomfort
49. Case 17. 94 y.o. M presents with GI bleeding
50. Case 18. 6 m.o. F presents with bloody stool
51. Case 19. 58 y.o. F presents with congested colonic mucosa during surveillance colonoscopy
52. Case 20. 27 y.o. M presents with lower abdominal pain
53. Case 21. 65 y.o. M with history of inflammatory bowel disease presenting a colon polyp
54. Case 22. 62 y.o. F presents with abdominal distension and diarrhea
55. Case 23. 51 y.o. HIV+ M presents with several colonic lesions

Section 6: Rare tumors of the anus

56. Case 1. 46 y.o. M presents with draining perianal mass
57. Case 2. 70 y.o. F presents with perianal lesion
58. Case 3. 70 y.o. F presents with an anterior rectal lesion
59. Case 4. 42 y.o. M presents with a presacral mass
60. Case 5. 78 y.o. F presents with rectal polyp
61. Case 6. 39 y.o. F presents with anal mass
62. Case 7. 44 y.o. M presents with a 2.0 cm anal mass
63. Case 8. 61 y.o. M presents with a perianal lesion
64. Case 9. 45 y.o. female presents with a perianal mass

Section 7: Rare tumors of the liver

65. Case 1. 61 y.o. M with a history of cirrhosis presents with a liver mass
66. Case 2. 21 y.o. M presents with a 10 cm liver mass
67. Case 3. 56 y.o. M presents with history of HBV and RUQ pain
68. Case 4. 44 y.o. M presents with an incidentally found complex hepatic cyst causing right upper back pain and cough
69. Case 5. 2 y.o. M presents with 7.7 cm mass in left lobe of liver
70. Case 6. 70 y.o. male with presents with multiple hepatic cysts noted to be increasing in size
71. Case 7. 15 y.o. F presents with RLQ pain
72. Case 8. 26 y.o. F presents with abdominal pain and large mass in liver

- 73. Case 9. 5 y.o. F presents with abdominal pain and fever
- 74. Case 10. 55. y.o. M presents with liver lesion
- 75. Case 11. 66. y.o M presents with end-stage liver disease
- 76. Case 12. 69 y.o. M presents with a 5 cm liver mass
- 77. Case 13. 50 y.o. F presents with a liver lesion
- 78. Case 14. 27 y.o. M presents with multiple liver lesions
- 79. Case 15. 73 y.o. M with history of lymphoplasmacytic lymphoma in remission presents with liver and spleen mass
- 80. Case 16. 31 y.o M presents with acute liver failure
- 81. Case 17. 52 y.o M presents with abnormal liver function test

Section 8: Rare tumors of the gallbladder and extrahepatic biliary tree

- 82. Case 1. 40 y.o. F presents with acute cholecystitis
- 83. Case 2. 64 y.o. F presents with acute cholecystitis
- 84. Case 3. 60 y.o. F presents with a gall bladder polyp
- 85. Case 4. 37 y.o. F presents with a common bile duct mass
- 86. Case 5. 45 y.o. M found to have a large mass in the pancreas
- 87. Case 6. 78 y.o. M presents with worsening epigastric pain
- 88. Case 7. 64 y.o. M presents with gallstones

Section 9: Rare tumors of the pancreas

- 89. Case 1. 62 y.o. F presents with a pancreatic mass
- 90. Case 2. 70 y.o. M presents with unintentional weight loss and a pancreatic head mass with elevated CA19-9 serum levels
- 91. Case 3. 35 y.o. F presents with a pancreatic cyst
- 92. Case 4. 48 y.o. F presents with a cystic pancreatic mass
- 93. Case 5. 55 y.o. M presents with an incidentally discovered pancreatic cyst
- 94. Case 6. 32 y.o. M presents with abdominal pain and bloody stools
- 95. Case 7. 48 y.o. F presents with a 14 cm pancreatic mass
- 96. Case 8. 77 y.o. M presents with a melena, shortness of breath, weight loss, and fatigue
- 97. Case 9. 46 y.o. M presents with abdominal and back pain found to have a 3.8 cm pancreatic mass
- 98. Case 10. 80 y.o. M presents with a pancreatic mass and portal vein thrombus
- 99. Case 11. 30 y.o. F presents with nausea and abdominal pain and was to have a pancreatic head mass
- 100. Case 12. 48 y.o. M presents with jaundice and a 5.0 cm pancreatic mass

Section 10: Bonus List

- 101. Case 1. 60 y.o. F presents with acute appendicitis
- 102. Case 2. 62 y.o. M presents with a colon mass
- 103. Case 3. 68 y.o. M presents with acute perianal pain
- 104. Case 4. 45 y.o. F presents with progression of liver lesions
- 105. Case 5. 78 y.o. M presents with abdominal pain and a 2.9 cm pancreatic mass
- 106. Case 6. 65 y.o. F with 2.1 cm pancreatic lesion
- 107. Case 7. 73 y.o. F presents with vague upper abdominal pain
