### 1 Cytology 1

*Ji-Ming Feng*

General Overview 1

Cell Membrane 3

Nucleus 4

    Nuclear Envelope 4

    Chromatin and Chromosome 5

    Nucleolus 6

    Nucleoplasm and Nuclear Matrix 6

Cytosol 7

Organelles 7

    Rough and Smooth Endoplasmic Reticulum and Ribosomes 7

    Golgi Complex and Vesicular Transport 9

    Mitochondria 11

    Peroxisomes 12

Cytoskeleton 12

    Microtubules 12

    Microfilaments 14

    Intermediate Filaments 14

Inclusions 15

Cell-Surface Modifications 15

Cell Cycle, Cell Division, and Apoptosis 16

From Cells to Tissues 18

    Intercellular Junctions 19

    Cell Communication 20

Clinical Correlations 21

Essentials 21

Suggested Readings 21

### 2 Epithelium 23

*John J. Turek and Marxa L. Figueiredo*

Introduction 23

    Cells, Tissues, and Organs 23

    Characteristics of Epithelium 24

Surface Epithelium 25

    Classification 25

|  |    |
|--|----|
| Microscopic Structure                    | 25 |
| Simple Squamous Epithelium               | 25 |
| Simple Cuboidal Epithelium               | 26 |
| Simple Columnar Epithelium               | 26 |
| Pseudostratified Epithelium              | 27 |
| Stratified Squamous Epithelium           | 28 |
| Stratified Cuboidal Epithelium           | 30 |
| Stratified Columnar Epithelium           | 30 |
| Sensory Epithelium                       | 30 |
| Glandular Epithelium and Glands          | 30 |
| Classification of Glands                 | 30 |
| Morphologic Characteristics              | 30 |
| Nature of the Secretory Product          | 35 |
| Mode of Release of the Secretory Product | 35 |
| Myoepithelial Cells                      | 36 |
| Clinical Correlations                    | 36 |
| Essentials                               | 37 |
| Suggested Readings                       | 37 |

### 3 Connective and Supportive Tissues 39

*Marxa L. Figueiredo and John J. Turek*

|  |    |
|--|----|
| Connective Tissue Cells                | 40 |
| Mesenchymal Cells                      | 40 |
| Fibrocytes and Fibroblasts             | 40 |
| Reticular Cells                        | 41 |
| Adipocytes                             | 41 |
| Pericytes                              | 43 |
| Mast Cells                             | 43 |
| Macrophages                            | 44 |
| Plasma Cells                           | 45 |
| Pigment Cells                          | 46 |
| Other Cells of Loose Connective Tissue | 46 |
| Connective Tissue Fibers               | 46 |
| Collagen Fibers                        | 46 |
| Reticular Fibers                       | 48 |
| Elastic Fibers                         | 48 |
| Fibrous Adhesive Proteins              | 49 |
| Ground Substance                       | 50 |
| Embryonic Connective Tissues           | 50 |
| Mesenchyme                             | 50 |
| Mucous Connective Tissue               | 51 |
| Adult Connective Tissues               | 51 |
| Loose Connective Tissue                | 51 |
| Dense Connective Tissue                | 52 |
| Dense Irregular Connective Tissue      | 52 |
| Dense Regular Connective Tissue        | 52 |
| Reticular Connective Tissue            | 53 |
| Adipose Tissue                         | 53 |
| White Adipose Tissue                   | 53 |
| Brown Adipose Tissue                   | 53 |
| Adult Supportive Tissues               | 54 |
| Cartilage                              | 54 |
| Cartilage Cells                        | 54 |
| Cartilage Matrix                       | 54 |

|   |           |
|---|-----------|
| Classification of Cartilage               | 55        |
| Development of Cartilage                  | 57        |
| Nutrition of Cartilage                    | 57        |
| Bone                                      | 57        |
| Bone Cells                                | 57        |
