

## **Χαρακτηριστικά:**

- Fully updated for its seventh edition – provides the latest evidence and detailed information
- Covers topics not typically covered in other surgical textbooks including managing soft tissue and orthopaedic trauma, plus sections on plastic surgery, neurosurgery, blood transfusion and applied microbiology
- Incorporates a problem-solving approach wherever possible – explains how diagnoses are made and why particular treatments are used
- Emphasis on the principles of surgery and perioperative care – provides a real understanding of the field
- Clear, logical layout and hundreds of illustrations – easy to read and understand
- Written by experts in their field, and closely edited for easy comprehension
- Covers the syllabus of the MRCS examination and is also suitable as a refresher for higher surgical trainees preparing for the FRCS and other higher surgical exams
- Text boxes and tables reinforce important contents and support revision
- An enhanced eBook version is included with purchase. The eBook allows you to access all the text, figures and references, with the ability to search, customise your content, make notes and highlights, and have content read aloud

## **Περιεχόμενα:**

Forewords

Preface

List of Contributors

Acknowledgements

### **Section A: Principles of Surgical Care**

1 Mechanisms of surgical disease and surgery in practice

Disease processes

2 Managing physiological change in the surgical patient

3 Immunity, inflammation and infection

4 Shock and resuscitation

Diagnostic techniques

5 Imaging and interventional techniques in radiology and surgery

6 Screening for adult disease

### **Section B: Perioperative Care**

7 Preoperative assessment and postoperative management

8 Medical problems

9 Blood transfusion

- 10 Principles and techniques of operative surgery including principles of neurosurgery
- 11 Elective orthopaedics
- 12 Complications of surgery
- 13 Principles of cancer management
- 14 Principles of transplantation surgery

### **Section C: Principles of Accident Surgery**

- 15 Major trauma
- 16 Head and maxillofacial injuries
- 17 Soft tissue injuries and burns

### **Section D: Symptoms, Diagnosis and Management**

#### **Abdomen, general principles**

- 18 Nonacute abdominal pain and other abdominal symptoms and signs
- 19 The acute abdomen and acute gastrointestinal haemorrhage
- Upper gastrointestinal and hepatobiliary
- 20 Gallstone diseases and related disorders
- 21 Peptic ulceration and related disorders
- 22 Disorders of the oesophagus
- 23 Tumours of the stomach and small intestine
- 24 Tumours of the pancreas and hepatobiliary system; the spleen
- 25 Pancreatitis

#### **Coloproctology**

- 26 Appendicitis
- 27 Colorectal polyps and carcinoma
- 28 Chronic inflammatory disorders of the bowel
- 29 Disorders of large bowel motility, structure and perfusion
- 30 Anal and perianal disorders

#### **Thoracic surgery excluding cardiac**

- 31 Thoracic surgery

#### **Groin and male genitalia**

- 32 Hernias and other groin problems
- 33 Disorders of the male genitalia

#### **Urology**

- 34 Symptoms, signs and investigation of urinary tract disorders
- 35 Disorders of the prostate
- 36 Disorders of the kidney, ureter and bladder
- 37 Stone disease of the urinary tract
- 38 Urinary tract infections

#### **Cardiovascular disorders**

- 39 Pathophysiology, clinical features and diagnosis of vascular disease affecting the limbs
- 40 Managing lower limb arterial insufficiency, the diabetic foot and major amputations
- 41 Aneurysms and other peripheral arterial disorders
- 42 Venous disorders of the lower limb

43 Cardiac surgery

**Disorders of the breast and skin**

44 Disorders of the breast

45 Disorders of the skin

**Disorders of the head and neck**

46 Lumps in the head and neck and salivary calculi

47 Disorders of the mouth

48 Disorders of the thyroid, parathyroid and adrenal glands

**Neonatal and paediatric surgery**

49 Acute surgical problems in children

50 Nonacute abdominal and urological problems in children
