

In Memorium

Advance Praise

Foreword for the First Edition

Part I: Basics of Electrodiagnosis

Chapter 1: Anatomic Basis for Localization

Chapter 2: Electrical Properties of Nerve and Muscle

Chapter 3: Electronic Systems

Part II: Nerve Conduction Studies

Chapter 4: Anatomy and Physiology of the Peripheral Nerve and Types of Nerve Pathology

Chapter 5: Principles of Nerve Conduction Studies

Chapter 6: Assessment of Individual Nerves

Chapter 7: Facts, Fallacies and Fancies of Nerve Conduction Techniques

Part III: Late Response, Reflex and Other Method

Chapter 8: Studies of the Facial Nerve and the Blink Reflex

Chapter 9: The F wave and the A wave

Chapter 10: H, T, and Masseter Reflexes and Silent Period

Chapter 11: Other Techniques to Assess the Peripheral Nerve

Part IV: Electromyography

Chapter 12: Anatomy and Physiology of the Skeletal Muscle

Chapter 13: Electromyography and Other Measures of Muscle Function

Chapter 14: Types of Electromyographic Abnormalities

Chapter 15: Examination of Non-Limb Muscles

Chapter 16: Single-Fiber and Macro Electromyography

Part V: Neuromuscular Transmission and Muscle Excitability

Chapter 17: Anatomy and Physiology of the Neuromuscular Junction

Chapter 18: Repetitive Nerve Stimulation and Exercise Tests

Part VI: Somatosensory and Motor Evoked Potential and Monitoring Procedures

Chapter 19: Somatosensory Evoked Potential

Chapter 20: Motor Evoked Potentials

Chapter 21: Intraoperative Monitoring

Part VII: Disorders of the Spinal Cord and Peripheral Nervous System

Chapter 22: Diseases of the Spinal Cord

Chapter 23: Radiculopathies and Plexopathies

Chapter 24: Polyneuropathies and Mononeuropathies Multiplex

Chapter 25: Mononeuropathies and Entrapment Syndromes

Part VIII: Disorders of Neuromuscular Junction, Muscle Diseases, and Abnormal Muscle Activity

Chapter 26: Myasthenia Gravis, Myasthenic Syndrome and Related Disorders

Chapter 27: Myopathies

Chapter 28: Neuromuscular Diseases Characterized by Abnormal Muscle Activities

Part IX: Interpretation of Study Results

Chapter 29: Studies for the Pediatric and Geriatric Population

Chapter 30: Data Analysis and Reporting

Part X: Appendices

Appendix 1: Ethical Consideration in Clinical Practice

Appendix 2: Fundamentals of Electronics

Appendix 3: Electrical Safety

Appendix 4: Historical Review

Appendix 5: Upper and Lower Limb Nerve Conduction Studies Videos
