

**Section 1: Genetic Control, Frequencies and Epidemiology of Bone Cancer** 1. Epidemiology of Primary Bone Tumors and Economical Aspects of Bone Metastases *Esther I. Hauben and Pancras C.W. Hogendoorn*

**Section 2: Bone Microenvironment and Bone Cancer** 2. Tumor-Bone Cell Interactions in Bone Metastases *Pierrick G.J. Fournier, Lauren K. Dunn, Gregory A. Clines, Theresa A. Guise* 3. Early Bone Metastasis-Associated Molecular and Cellular Events *Philippe Clezardin* 4. Regulation of Osteoblast Differentiation and Bone Cancers by Wnt and Parathyroid Hormone Signaling Pathways *Julia Billiard, John A. Robinson, Ramesh A. Bhat, Bheem M. Bhat, Richard Murrills and Peter V.N. Bodine* 5. Osteoclast Differentiation and Function *Luis Filgueira* 6. Immunoregulation of Osteoclast Differentiation in Multiple Myeloma Bone Diseases *Maria Grano, Giacomina Brunetti and Silvia Colucci* 7. Facts and Hypothesis on Osteolytic Lesions Related to Normal and Tumoral Epithelial Dental Cell Differentiation *Blandine Ruhin, Frederic Lezot, Aymann Bouattour, Sonia Ghoul-Mazghar, Ariane Berdal, Vianney Descroix* 8. The Role of the Interleukin-6 Family of Cytokines in Bone Remodeling and Bone Cancer *Frederic Blanchard, Emmanuelle David, Bénédicte Brounais* 9. Proteases and Therapeutic Approaches of Bone Tumors *Velasco C. Ruiz, Y. Fortun, Dominique Heymann, Marc Padrines*

**Section 3: and Bone Markers of Cancer (genes and proteins)** 10. Bone Remodelling Markers and Bone Cancer *Markus J. Seibel* 11. Cytogenetic and Molecular Genetic Alterations in Bone Tumors *Suvi Savola, Tom Böhling, Sakari Knuutila* 12. Cytogenetic of Bone Tumors *Jiyun Lee, Mallory Martin, Shibo Li* 13. Genetic Aspects of Bone Tumors *Shamini Selvarajah, Maria Zielenska, Jeremy A. Squire, Paul Park* 14. Proteomic of Bone Cancers *Stephanie Byrum, Eric Siegel, Sudeepa Bhattacharyya, Larry J Suva* 15. Gene and proteomic profiling of osteosarcoma *Tsz-Kwong Man, Pulivarthi H. Rao, Ching C. Lau* 16. Molecular Pathology of Osteosarcoma *Walter C. Bell, Gene P. Siegal*

**Section 4: Histopathology of Primary Bone Tumors and Bone Metastases** 17. Technical Aspects: How Do We Best Prepare Bone Samples for Proper Histological Analysis? *Daniel Chappard* 18. Osteoclast-Rich Lesions of Bone: A Clinical and Molecular Overview *Adrienne Flanagan, Roberto Tirabosco, Panagiotis D. Gikas* 19. Recent Advances in Biology of Bone Tumors and New Diagnostic Tools *Gonzague de Pinieux, Corinne Bouvier* 20. Ewing Sarcoma Family of Tumors *Joseph D. Khoury* 21. The Histopathology of Skeletal Metastases *David G. Hicks, Ping Tang*

**Section 5: Imaging of Bone Cancer** 22. Interventional Radiologic Techniques and their Contribution of the Management of Bone Tumors *Robert G. Jones, Eric J. Heffernan, Faisal Rashid, Peter L. Munk* 23. Imaging of Bone Metastases *Nieroshan Rajaubendra, Nathan Lawrentschuk* 24. Diagnosis of Skeletal Metastases in Malignant Extraskkeletal Cancers *Holger Schirrmeyer, Coskun Arslan demir*

**Section 6: Pain Control in Bone Cancer** 25. Pain Control with Palliative Radiotherapy in Bone Metastases *Alysa Fairchild, Amanda Hird, Edward Chow* 26. Mechanisms and Management of Bone Cancer Pain *Mary Ann C. Sabino, Denis R. Clohisy* 27. Malignant Skeletal Pain: Mechanisms and Potential Therapeutic Opportunities *Monica Herrera, Juan Miguel Jimenez-Andrade, Marina Vardanyan, Patrick Mantyh*

**Section 7: New Therapeutic Advance in Primary Bone Cancers and Bone Metastases** 28. Animal Models of Malignant Primary Bone Tumors and Novel Therapeutic Approaches *Julie Rousseau, François Lamoureux, Gaele Picarda, François Gouin, Valérie Trichet, Françoise Rédini* 29. In Vivo Models Used in Studies of Bone Metastases *Ingunn Holen, Michele A. Lawson* 30. Cytokine Gene Therapy in Bone

Remodeling *Carl Richards, David Smyth* 31. Non-Surgical Treatment of Chondrosarcoma: Current Concepts and Future Perspectives *Eric L. Staats, Emanuela Palmerini, Stefano Ferrari, and Mario Mercuri* 32. Mechanistic Role of RANKL in Cancer Induced Bone Diseases and Development of Targeted Therapy to Inhibit this Pathway *William C. Dougall* 33. Chondrosarcoma of Bone: Diagnosis and Therapy *Arne Steitbueger, Jendrik Harges, Georg Gosheger* 34. Current Status of Immunotherapy for Osteosarcoma and its Future Trends *Kanji Mori, Kosei Ando, Yoshitaka Matsusue, Dominique Heymann* 35. Bisphosphonates, Bone Health and the Clinical Biology of Bone Metastases from Breast Cancer *Alexander Paterson* 36. A Multi-Targeted Approach to Treating Bone Metastases *Robert D. Loberg, Kenneth J. Pienta* 37. Bone Metastases of Prostatic Cancer: Pathophysiology, Clinical Complications, Actual Treatment and Future Directions *Sara De Dosso, Fernanda G. Herrera, Dominik R. Berthold* 38. Apoptosis and Drug Resistance in Malignant Bone Tumors *Udo Kontny*
