

1. Signal Transduction Pathways in Endothelial Cells: Implications for Angiogenesis
2. Endothelial Barrier: Factors That Regulate Its Permeability
3. Hemodynamic Forces in the Endothelium: From Mechanotransduction to Implications on Development of Atherosclerosis
4. Endothelium-Dependent Vasodilation: Nitric Oxide and Other Mediators
5. Vasoconstrictor Substances Produced by the Endothelium
6. Redox Cellular Signaling Pathways in Endothelial Dysfunction and Vascular Disease
7. Endothelium and Immune System
8. Progenitor Cells - Origins and Endothelium Regeneration
9. Blood Coagulation and Endothelium
10. Platelets and Endothelium
11. Endothelium and Genetics
12. Regulation of Endothelial Function: With Focus RNAs, MicroRNAs, and LncRNAs
13. Endothelium and Renin-Angiotensin System
14. Methods to Investigate Endothelial Function in Humans
15. Endothelium to Mesenchymal Transition - Contributions to Vascular Diseases
16. Endothelial Products as Plasmatic Biomarker of Vascular Dysfunction
17. Endothelial Alterations in Aging
18. Vascular Function and Cognitive Decline
19. Emotional Stress and Influences on Endothelium
20. Cardiac Arrhythmias and Endothelium
21. Lipids and Lipoprotein Mediators of Endothelial Function and Dysfunction
22. Non-HDL Particles, Triglycerides and Endothelium - NEW CHAPTER
23. Risk Factors for Endothelial Dysfunction and Early Onset of Cardiovascular Diseases in the Young
24. Endothelial Dysfunction and Myocardial Injury in COVID-19
25. Colchicine for the Prevention of Cardiovascular Disease
26. Venous Thromboembolism and Endothelium
27. Artificial Lipoproteins in Endothelial Dysfunction and Atherosclerosis
28. Influences of Diet on Endothelial Dysfunction
29. Endothelium and Microbiota as Regulators of Metabolic Process
30. Effects of Red Wine and Polyphenols on Endothelial Function and Clinical Events
31. Kidney and the Endothelium
32. Endothelial Alterations in Pulmonary Hypertension
33. Endothelial Alterations in Chronic Coronary Disease
34. Molecular Mechanisms of the Arterial Wall in Acute Coronary Syndromes
35. Integrating Multiomic Approaches to Uncover Candidate Gene Networks for Endothelial Dysfunction in Response do CVD Risk Factors
36. Endothelium - Coordinator of Acute and Chronic Inflammation
37. Endothelium in Atherosclerosis: Plaque Formation and Its Complications
38. Endothelial Function and Cardiovascular Risk Factors Interactions
39. Sleep Disorders and Endothelial Dysfunction
40. Smoking and the Endothelium
41. Effects of radiation upon Vascular Endothelium
42. Endothelial Dysfunction and Coronary Microvascular Dysfunction in Women with Angina and Non-

obstructive Coronaries

43. Endothelial Alterations in Heart Failure—Mechanisms and Molecular Basis
44. Endothelium Function in HF with Preserved EF
45. Endothelium in Cardiomyopathies
46. Post percutaneous Interventions: Endothelial Repair
47. Stents and the Endothelium
48. Vascular Disease of the Transplanted Heart: Physiopathology and Therapeutic Options
49. Erectile Dysfunction and the Endothelium
50. Cardiovascular Actions and Therapeutic Implications of Endothelium-Derived Catecholamines
51. Obesity, Endothelium and Metabolic Syndrome
52. Endothelium in Diabetes
53. Endothelial Mechanisms in Preeclampsia
54. Angiogenesis and Tumor Vasculature Function
55. Corneal Endothelium Cell Dysfunction
56. Connective Tissue and Endothelium
57. Physical Exercise and the Endothelium
58. The Translational Concept in Endothelium - From Research to Clinical Practice
59. Advancements in Understanding the Interplay between Endothelial Dysfunction and Arterial Hypertension
