

## **PART 1 INTRODUCTION TO BASIC PRINCIPLES OF NUTRITION SCIENCE**

### **1 Food Nutrition and Health**

Health Promotion

Basic Definitions

Importance of a Balanced Diet

Functions of Nutrients

Energy Sources

Tissue Building

Regulation and Control

States of Nutrition

Optimal Nutrition

Malnutrition

Nutrient and Food Guides for Health

Nutrient Standards

Food Guides and Recommendations

Individual Needs

### **2 Carbohydrates**

Nature of Carbohydrates

Dietary Importance

Structure and Classes of Carbohydrates

Functions of Carbohydrates

Energy Source

Metabolic Regulator

Food Sources of Carbohydrates

Starches

Sugars

Digestion of Carbohydrates

Mouth

Stomach

Small Intestine

Recommendations for Dietary Carbohydrates

Dietary Reference Intakes

Dietary Guidelines for Americans

MyPlate

### **3 Fats**

Nature of Fats

Dietary Importance

Structure and Classes of Fats

Functions of Fat

Fat in Food

Fat in the Body

Food Sources of Fat

Fatty Acid Composition  
Physical Characteristics of Food Fat  
Food Label Information  
Digestion of Fats  
Mouth  
Stomach  
Small Intestine  
Recommendations for Dietary Fat  
Health Problems  
Health Promotion  
Dietary Reference Intakes  
Dietary Guidelines for Americans  
MyPlate

#### **4 Proteins**

Nature of Protein  
Dietary Importance  
Structure and Classes of Protein  
Functions of Protein  
Tissue Building  
Additional Body Functions  
Food Sources of Protein  
Animal Protein  
Plant Protein  
Digestion of Protein  
Mouth  
Stomach  
Small Intestine  
Recommendations for Dietary Protein  
Influential Factors of Protein Needs  
Dietary Deficiency or Excess  
Dietary Guides

#### **5 Digestion Absorption and Metabolism**

Digestion  
Basic Principles  
Mechanical and Chemical Digestion  
Digestion in the Mouth and Esophagus  
Digestion in the Stomach  
Digestion in the Small Intestine  
Absorption and Transport  
Absorption in the Small Intestine  
Absorption in the Large Intestine  
Transport

Metabolism  
Catabolism and Anabolism  
Energy Density  
Storing Extra Energy  
Errors in Digestion and Metabolism  
Inborn Errors of Metabolism  
Intolerances and Allergies

## **6 Energy Balance**

Human Energy System  
Energy Needs  
Measurement of Energy  
Fuel for Energy  
Energy Balance  
Energy Intake  
Energy Output  
Recommendations for Dietary Energy Intake  
Energy Needs Through the Life Cycle  
Dietary Reference Intakes  
Dietary Guidelines for Americans  
MyPlate

## **7 Vitamins**

The Nature of Vitamins  
Definition  
Functions of Vitamins  
Vitamin Metabolism  
Dietary Reference Intakes

### **SECTION 1 FAT-SOLUBLE VITAMINS**

Vitamin A (Retinol)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin D (Calciferol)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin E (Tocopherol)  
Functions

Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin K (Phylloquinone)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability

## **SECTION 2 WATER-SOLUBLE VITAMINS**

Vitamin C (Ascorbic Acid)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B1 (Thiamin)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B2 (Riboflavin)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B3 (Niacin)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B6 (Pyridoxine)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B9 (Folate)  
Functions

Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B12 (Cobalamin)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B5 (Pantothenic Acid)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Vitamin B7 (Biotin)  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability  
Choline  
Functions  
Requirements  
Deficiency  
Toxicity  
Food Sources and Stability

### **SECTION 3 PLANT NUTRIENTS AND DIETARY SUPPLEMENTATION**

Phytochemicals  
Function  
Recommended Intake  
Food Sources  
Nutrient Supplementation  
Recommendations for Nutrient Supplementation  
Supplementation Principles  
Functional Foods

### **8 Minerals**

Nature of Minerals in Human Nutrition  
Definition  
Functions of Minerals  
Mineral Metabolism

## **SECTION 1 MAJOR MINERALS**

Calcium

Functions

Requirements

Deficiency

Toxicity

Food Sources

Phosphorus

Functions

Requirements

Deficiency

Toxicity

Food Sources

Sodium

Functions

Requirements

Deficiency

Toxicity

Food Sources

Potassium

Functions

Requirements

Deficiency

Toxicity

Food Sources

Chloride

Functions

Requirements

Deficiency

Toxicity

Food Sources

Magnesium

Functions

Requirements

Deficiency

Toxicity

Food Sources

Sulfur

Functions

Requirements

Deficiency

Toxicity

Food Sources

## **SECTION 2 TRACE MINERALS**

Iron

Functions

Requirements

Deficiency

Toxicity

Food Sources

Iodine

Functions

Requirements

Deficiency

Toxicity

Food Sources

Zinc

Functions

Requirements

Deficiency

Toxicity

Food Sources

Selenium

Functions

Requirements

Deficiency

Toxicity

Food Sources

Other Essential Trace Minerals

Fluoride

Copper

Manganese

Molybdenum

Chromium

Additional Trace Minerals

## **SECTION 3 MINERAL SUPPLEMENTATION**

Life Cycle Needs

Pregnancy and Lactation

Adolescence

Adulthood

Clinical Needs

## **9 Water and Electrolyte Balance**

Water The Fundamental Nutrient

Functions

Requirements  
Dehydration  
Water Intoxication  
Water Balance  
The Solvent  
Solute Particles  
Separating Membranes  
Forces Moving Water and Solutes Across Membranes  
Capillary Fluid Shift Mechanism  
Organ System Circulation  
Hormonal Controls  
Acid-Base Balance  
Acids and Bases  
Buffer Systems  
Alkalosis and Acidosis

## **PART 2 NUTRITION THROUGHOUT THE LIFE CYCLE**

### **10 Nutrition During Pregnancy and Lactation**

Nutritional Needs During Pregnancy  
Energy Needs  
Macronutrients  
Key Micronutrients  
Gestational Weight Gain  
Meal Planning and Lifestyle Considerations  
General Concerns  
Common Gastrointestinal Discomforts  
High-Risk Pregnancies  
Pregnancy Complications  
Lactation  
Trends  
The Baby-Friendly Hospital Initiative  
Physiologic Process of Lactation  
Nutrition and Lifestyle Needs  
Long-Term Impacts of Feeding Methods  
Additional Resources

### **11 Nutrition During Infancy Childhood and Adolescence**

Growth and Development  
Life Cycle Growth Pattern  
Measuring Childhood Growth  
Nutrition Requirements for Growth  
Nutrition Requirements During Infancy  
Infant Classifications  
Considerations Regarding Feeding Premature Infants

What How and When to Feed the Mature Infant  
Nutrition Requirements During Childhood  
Toddlers (1 to 3 Years Old)  
Preschool-Aged Children (3 to 5 Years Old)  
School-Aged Children (5 to 12 Years Old)  
Nutrition Problems During Childhood  
Nutrition Requirements During Adolescence (12 to 18 Years Old)  
Physical Growth  
Eating Patterns  
Disordered Eating

## **12 Nutrition for Adults The Early Middle and Later Years**

Adulthood Growth and Development  
Coming of Age in America  
Shaping Influences on Adult Growth and Development  
The Aging Process and Nutrition Needs  
Physiologic Changes  
Nutrition Requirements  
Clinical Needs of the Older Adult  
Health Promotion and Disease Prevention  
Chronic Diseases of Aging  
Community Resources  
Government Programs for Older Americans  
Professional Organizations and Resources  
Alternative Living Arrangements  
Congregate Care Arrangements  
Continuing Care Retirement Communities  
Assisted Living Facilities  
Nursing Homes

## **PART 3 COMMUNITY NUTRITION AND HEALTH CARE**

### **13 Community Food Supply and Health**

Food Safety and Health Promotion  
U S Food and Drug Administration  
Food Labels  
Food Technology  
Agricultural Pesticides  
Food Additives  
Foodborne Illness  
Prevalence  
Food Safety  
Food Contamination  
Food Needs and Costs  
Hunger and Malnutrition

Food Assistance Programs  
Food Buying and Handling Practices

#### **14 Weight Management**

Body Weight Spectrum  
Body Weight Versus Body Fat  
Body Composition  
Estimates of Ideal Weight Ranges  
Obesity and Health  
Causes of Obesity  
Individual Differences and Intense Weight Reduction Practices  
A Sound Weight Management Program  
Essential Characteristics  
Behavior Modification  
Dietary Modification  
Food Misinformation and Fads  
Food Fads  
What Is the Answer  
Underweight  
General Causes and Treatment  
Disordered Eating

#### **15 Nutrition and Physical Fitness**

Physical Activity Recommendations and Benefits  
Guidelines and Recommendations  
Health Benefits  
Types of Physical Activity  
Meeting Personal Needs  
Dietary Needs During Exercise  
Muscle Action and Fuel  
General Training Diet  
Athletic Performance  
Carbohydrate Loading  
Pregame Meal  
Nutrition During Exercise  
Nutrition After Exercise Recovery  
Hydration Before During and After Exercise  
Ergogenic Aids and Misinformation

### **PART 4 CLINICAL NUTRITION**

#### **16 Nutrition Support**

Nutrition Care Framework  
Setting and Focus of Care  
Health Care Team

Phases of the Care Process  
Nutrition Assessment  
Nutrition Diagnosis  
Nutrition Intervention  
Nutrition Monitoring and Evaluation  
Diet-Drug Interactions  
Drug-Food Interactions  
Drug-Nutrient Interactions  
Drug-Herb Interactions

### **17 Gastrointestinal and Accessory Organ Problems**

Upper Gastrointestinal Tract  
Mouth  
Esophagus  
Stomach and Duodenum Peptic Ulcer Disease  
Lower Gastrointestinal Tract  
Disorders of the Small Intestine  
Disorders of the Large Intestine  
Food Intolerances and Allergies  
Food Intolerances  
Food Allergies  
Celiac Disease  
Gastrointestinal Accessory Organs  
Liver Disease  
Gallbladder Disease  
Pancreatitis

### **18 Coronary Heart Disease and Hypertension**

Coronary Heart Disease  
Atherosclerosis  
Acute Cardiovascular Disease  
Heart Failure  
Hypertension  
Incidence and Nature  
High Blood Pressure Levels  
Medical Nutrition Therapy for Hypertension  
Additional Lifestyle Modifications  
Education and Prevention  
Nutrition Education  
Principles of Education

### **19 Diabetes Mellitus**

The Nature of Diabetes  
Defining Factors

Classification of Diabetes Mellitus and Glucose Intolerance

Symptoms of Diabetes

The Metabolic Pattern of Diabetes

Energy Supply and Control of Blood Glucose

Abnormal Metabolism in Diabetes With Hyperglycemia

Long-Term Complications

General Management of Diabetes

Early Detection and Monitoring

Goals of Care

Medical Nutrition Therapy for Diabetes

Eating Patterns and Nutrients

Coordinating Nutrient Intake With Medications and Physical Activity

## **20 Kidney Disease**

Structure and Function of the Kidney

Structure

Function

Disease Processes and Dietary Considerations

General Causes of Kidney Disease

Medical Nutrition Therapy in Kidney Disease

Nephron Diseases

Acute Glomerulonephritis or Nephritic Syndrome

Nephrotic Syndrome

Kidney Failure

Acute Kidney Injury

Chronic Kidney Disease

End-Stage Renal Disease

Kidney Stone Disease

Disease Process

Medical Nutrition Therapy for Nephrolithiasis

## **21 Surgery and Nutrition Support**

Nutrition Needs of General Surgery Patients

Preoperative Nutrition Care Nutrient Reserves

Postoperative Nutrition Care Nutrient Needs for Healing

General Dietary Management

Initial Intravenous Fluid and Electrolytes

Methods of Nutrition Support

Special Nutrition Needs After Gastrointestinal Surgery

Mouth Throat and Neck Surgery

Gastric Surgery

Bariatric Surgery

Gallbladder Surgery

Intestinal Surgery

Rectal Surgery  
Special Nutrition Needs for Patients With Burns  
Type and Extent of Burns  
Postburn Metabolic Phases  
Medical Nutrition Therapy for Patients With Major Burns

## **22 Nutrition Support in Cancer and HIV**

### **SECTION 1 CANCER**

Cancer Progression  
Cancer Cell Development  
The Body's Defense System  
Nutrition Complications of Cancer Treatment  
Surgery  
Radiation  
Chemotherapy  
Drug-Nutrient Interactions  
Medical Nutrition Therapy in the Patient With Cancer  
Nutrition-Related Complications of Cancer  
Nutrition Care Plan  
Cancer Prevention  
Guidelines for Cancer Prevention  
Diets and Supplements

### **SECTION 2 HUMAN IMMUNODEFICIENCY VIRUS**

Progression of Human Immunodeficiency Virus  
Evolution of Human Immunodeficiency Virus  
Host-Dependent Replication  
Transmission and Stages of Disease Progression  
Medical Management of Patients With Human Immunodeficiency Virus  
Initial Evaluation and Goals  
Drug Therapy  
Vaccine Development  
Medical Nutrition Therapy in the Patient With Human Immunodeficiency Virus  
Nutrition-Related Complications of Human Immunodeficiency Virus  
Nutrition Care Plan  
Nutrition Counseling Education and Supportive Care
