About the Companion Website xxi

1 A Philosophical Approach to Establishing a Diagnosis 1

2 Features of Normal Oral Tissues 5

- 2.1 Introduction 5
- 2.2 Oral Mucosa 5
 - 2.2.1 Buccal, Sublingual, and Soft Palate (Lining Mucosa) 6
 - 2.2.2 Gingiva and Hard Palate (Masticatory Mucosa) 6
 - 2.2.3 Tongue 8
- 2.3 Tonsil 9
- 2.4 Diffuse Salivary Gland 11
- 2.5 Lip 12
- 2.6 Incisive Papilla and Ducts 13
- 2.7 Lateral Nasal Gland 13
- 2.8 Teeth and Associated Tissues 14
 - 2.8.1 Dental Anatomy 14
 - 2.8.2 Odontoblasts and Pulp Stroma 16
 - 2.8.3 Enamel 17
 - 2.8.4 Dentin 18
 - 2.8.5 Cementum 21
 - 2.8.6 Periodontal Apparatus 21
- 2.9 Bone 24

3 Tooth Development (Odontogenesis) 29

4 Clinical Approach to Oral Disease and Oral Medicine of Domestic Carnivores 37

- 4.1 Clinical Approach to Oral Disease 37
 - 4.1.1 Diagnostic Strategy for Oromaxillofacial Conditions 37
 - 4.1.1.1 Medical History 37
 - 4.1.1.2 Initial Physical Assessment 37
 - 4.1.1.3 Oromaxillofacial Examination 38
 - 4.1.1.4 Diagnostic Imaging 38
 - 4.1.1.5 Differential Diagnosis 39
 - 4.1.1.6 Biopsy Acquisition 40
 - 4.1.1.7 Reciprocal Communication with the Pathologist 41

4.2	Clinical Approach to Oral Medicine	41
4.2.1	The Comprehensive Oromaxillofacial Examination	41
4.2.2	Recognizing and Describing Lesions	42
5	Equine Oral Diseases	47
5.1	Introduction	47
5.2	Clinical Approach to Oral Diseases of Equids	47
5.2.1	Physical Assessment and Diagnostic Strategy	47
5.2.2	Anatomy and Nomenclature	48
5.2.3	Sample Collection	50
5.3	Lesions Featuring Hypercementosis	51
5.3.1	Nodular Hypercementosis (Cementoma)	51
5.3.2	Equine Odontoclastic Tooth Resorption and Hypercementosis	52
5.3.3	Odontodysplasia	54
5.3.4	Odontogenic Dysplasia	57
5.4	Gingivitis, Periodontitis, and Pulpitis of Incisors and Cheek Teeth	57
5.5	Tooth Fractures	59
5.6	Peripheral and Infundibular Caries	61
5.7	Juvenile Mandibular Ossifying Fibroma	62
5.8	Sialoliths and Sialolithiasis	63
5.9	Diseases of the Equine Tongue	64
6	Conditions and Diseases of Teeth	69
6.1	Odontogenic Developmental Anomalies	69
6.1.1	Primary Enamel Disorders	69
6.1.1.1	Amelogenesis Imperfecta	69
6.1.1.2	Other Enamel Defects	70
6.1.1.3	Clinical Considerations	71
6.1.2	Primary Dentin Disorders	71
6.1.2.1	Dentinogenesis Imperfecta	73
6.1.2.2	Dentin Dysplasia	74
6.1.2.3	Dental-Skeletal-Retinal Anomaly	75
6.1.3	Abnormalities in Tooth Number	77
6.1.4	Abnormalities in Tooth Shape	78
6.1.5	Focal, Segmental, and Traumatic Odontodysplasia	80
6.2	Degenerative and Inflammatory Disorders of Teeth	82
6.2.1	Plaque and Calculus Deposition	82
6.2.2	Dental Attrition, Abrasion, and Erosion	83
6.2.2.1	Clinical Considerations	83
6.2.3	Traumatic Dentoalveolar Injuries	83
6.2.3.1	Fractures	84
6.2.3.2	Luxation Injuries	85
6.2.4	Tooth Discoloration	86
6.2.4.1	Clinical Consideration	86
6.2.5	Hypercementosis	87
6.2.5.1	Clinical Consideration	89
6.2.6	Tooth Resorption	89
6.2.6.1	TR in Cats	90
6.2.6.2	TR in Dogs	92
6.2.6.3	Clinical Considerations	94
6.2.7	Dental Caries	94
6.2.8	Pulpitis and Pulp Necrosis (Endodontic Disease)	95
6.2.9	Pulp Degeneration	98

6.2.10 Periapical Periodontitis 99

6.2.10.1 Clinical Considerations 101

7 Inflammation of the Soft Tissues and Jaw 107

7.1 Inflammation of the Oral Mucosa 107

7.1.1 Mucositis and Stomatitis 107

7.1.2 Gingivitis and Periodontitis 107

7.1.2.1 Clinical Considerations 109

7.1.3 Oronasal Fistula 110

7.2 Oral Inflammation of Dogs 110

7.2.1 Contact Mucositis 110

7.2.2 Canine Chronic Ulcerative Stomatitis 110

7.2.2.1 Clinical Considerations 114

7.2.3 Granulomatous Stomatitis 114

7.2.3.1 Clinical Considerations 118

7.2.4 Eosinophilic Stomatitis 118

7.2.4.1 Clinical Considerations 119

7.3 Oral Inflammation in Cats 119

7.3.1 Chronic Gingivostomatitis 120

7.3.1.1 Clinical and Gross Presentation of FCGS 120

7.3.1.2 Histologic Features of FCGS 121

7.3.1.3 Clinical Management of FCGS 122

7.3.2 Early-onset Gingivitis and Aggressive Periodontitis 123

7.3.2.1 Clinical Considerations 124

7.3.3 Eosinophilic Ulcer and Granuloma 124

7.3.3.1 Clinical Considerations 125

7.4 Inflammation of the Jaw 126

7.4.1 Mandibular/Maxillary Osteomyelitis 126

7.4.2 Periodontal Osteomyelitis 127

7.4.2.1 Clinical Considerations 129

7.4.3 Feline Alveolar Osteomyelitis and Bone Expansion 129

7.4.4 Acquired Dental Disease of Rabbits 130

7.4.4.1 Clinical Features 131

7.4.5 Mandibular/Maxillofacial Abscesses of Rodents 131

7.4.6 Odontogenic Dysplasia 132

7.4.7 Lumpy Jaw (Actinomycosis) 137

8 Virus-associated Oral Disease 143

8.1 Oral Papillomas and Plaques 143

8.1.1 Oral Papillomas in Dogs 143

8.1.2 Oral Papillomas, Plaques, and Sarcoids in Felids 147

8.1.3 Oral Papillomas and Plaques in Equids 148

8.1.4 Upper Alimentary Papillomas and Fibropapillomas in Cattle and Other Species 150

8.2 Virus-associated Inflammatory Disease of the Oral Cavity 151

8.2.1 Feline Calicivirus and Oral Disease 151

8.2.2 Feline Herpesvirus and Oral Disease 153

8.2.3 Feline Retroviruses and Oral Disease 154

8.2.4 Vesicular Stomatitis Virus 155

9 Immune-mediated/Autoimmune Dermatoses with Oral Involvement 159

9.1 Introduction 159

9.2 Pemphigus Vulgaris 159

9.2.1 Gross Features 159

9.2.2	Histological Features	161
9.2.3	Clinical Considerations	161
9.3	Paraneoplastic Pemphigus	161
9.3.1	Gross Features	161
9.3.2	Histological Features	161
9.3.3	Clinical Considerations	162
9.4	Mucous Membrane Pemphigoid	162
9.4.1	Gross Features	162
9.4.2	Histologic Features	163
9.4.3	Clinical Considerations	163
9.5	Bullous Pemphigoid	163
9.5.1	Gross Features	164
9.5.2	Histologic Features	164
9.5.3	Clinical Considerations	164
9.6	Epidermolysis Bullosa Acquisita	164
9.6.1	Gross Features	165
9.6.2	Histologic Features	165
9.6.3	Clinical Considerations	165
9.7	Lupus Erythematosus	165
9.7.1	Gross Features	166
9.7.2	Histologic Features	166
9.7.3	Clinical Considerations	168
9.8	Panepithelial Cytotoxic Stomatitis	168
9.8.1	Gross Features	169
9.8.2	Histologic Features	169
9.8.3	Clinical Considerations	170
9.9	Adverse Drug Reaction	170
9.9.1	Gross Features	170
9.9.2	Histologic Features	170
9.9.3	Clinical Considerations	170
10	Tumor-like Proliferative Lesions and Injury of the Oral Soft Tissues	175
10.1	Introduction	175
10.2	Trauma-associated Lesions	175
10.2.1	Abrasions and Lacerations	176
10.2.2	Pyogenic and Traumatic “Granulomas”	176
10.2.3	Scar Tissue	179
10.2.4	Thermal and Chemical Injury	180
10.3	Ectopic Tissue (Choristoma)	181
10.4	Follicular Lymphoid Hyperplasia	182
10.5	Nasopharyngeal Polyps	183
10.6	Nodular Chondroid Hyperplasia/Degeneration of the Larynx and Epiglottis	183
10.7	Gingival Hyperplasia	184
10.7.1	Generalized Gingival Hyperplasia	185
10.7.2	Focal Gingival Hyperplasia	186
10.7.3	Clinical Considerations	188
10.8	Peripheral Giant Cell Granuloma	189
10.8.1	Clinical Considerations	191
10.9	Fibromatous Hyperplasia of the Gingival Ligament	192
10.9.1	Clinical Presentation and Gross Pathology	196
10.9.2	Histologic Features	197
10.9.3	FHGL in Cats	202
10.9.4	Clinical Considerations	203

11	Non-neoplastic Lesions of the Skull and Jaw	207
11.1	Comments on Proliferative Fibro-osseous Lesions	207
11.2	Conditions Characterized by Osteolysis or Decreased Bone Density	208
11.2.1	Dysplastic Cemento-osseous Remodeling of Alveolar Bone	208
11.2.1.1	Clinical and Radiographic Features	209
11.2.1.2	Histologic Features	209
11.2.1.3	Clinical Considerations	210
11.2.2	Fibrous Dysplasia	210
11.2.2.1	Radiographic and Histologic Features	211
11.2.2.2	Clinical Considerations	212
11.2.3	Fibrous Osteodystrophy	212
11.2.3.1	Clinical Considerations	214
11.2.4	Other Lytic Bone Lesions	215
11.3	Conditions Characterized by Osteoproliferation or Increased Bone Density	217
11.3.1	Alveolar Exostosis	217
11.3.2	Idiopathic Osteosclerosis	219
11.3.3	Cranio-mandibular Osteopathy	220
11.3.4	Hypertrophic Osteopathy	222
11.3.5	Calvarial Hyperostosis	222
11.3.6	Periostitis Ossificans	223
11.3.7	Feline Osteopetrosis (PADS)	224
11.3.7.1	Clinical Features	224
11.3.7.2	Radiographic Features	225
11.3.7.3	Histologic Features	225
11.3.7.4	Clinical Considerations	225
11.4	Osteonecrosis of the Jaw	226
11.4.1	Clinical Considerations	228
11.5	Jaw Fractures	228
11.5.1	Epidemiology and Contributing Factors	229
11.5.2	Maxillofacial Bone Healing	229
11.5.3	Complications of Jaw Fractures	230
11.5.4	Histopathology	230
12	Lesions of Tonsil, Tongue, and Lip	233
12.1	Lesions of the Tonsil	233
12.1.1	Tonsillar Hyperplasia	233
12.1.2	Tonsillitis	234
12.1.3	Tonsillar Polyps	234
12.1.4	Tonsillar Cysts	235
12.1.4.1	Clinical Considerations	235
12.1.5	Neoplasia of the Tonsil	235
12.1.5.1	Squamous Cell Carcinoma	237
12.1.5.2	Lymphoma	239
12.1.5.3	Melanoma	239
12.2	Lesions of the Tongue	239
12.2.1	Lingual Trauma	239
12.2.2	Glossitis	243
12.2.3	Foreign Bodies (Burr Tongue)	246
12.2.4	Lingual Necrosis	247
12.2.5	Uremic Ulcers	248
12.2.6	Calcinosis Circumscripta	249
12.2.7	Histiocytic Foam Cell Nodules (Mucosal Xanthoma)	250
12.2.8	Sublingual Mucinoses	253

12.2.9	Squamous Papilloma	253
12.2.10	Other Solitary Fibrous Nodules and Polyps	256
12.2.11	Neoplasia of the Tongue	259
12.2.11.1	Lingual Melanoma	260
12.2.11.2	Lingual Squamous Cell Carcinoma	260
12.2.11.3	Lingual Lymphoma	261
12.2.11.4	Lingual Hemangiosarcoma	262
12.2.11.5	Lingual Granular Cell Tumor	262
12.2.11.6	Lingual Plasma Cell Tumor	265
12.2.11.7	Clinical Considerations	265
12.3	Lesions of the Lip	265
12.3.1	Mucocutaneous Pyoderma	265
12.3.1.1	Gross Features	265
12.3.1.2	Histologic Features	265
12.3.1.3	Clinical Considerations	266
12.3.2	Lip Fold Pyoderma/Lip Fold Intertrigo	266
12.3.2.1	Gross Features	266
12.3.2.2	Histologic Features	266
12.3.2.3	Clinical Considerations	267
12.3.3	Feline Lip Ulcer	267
12.3.3.1	Gross Features	267
12.3.3.2	Histologic Features	267
12.3.3.3	Clinical Considerations	267
12.3.4	Neoplasia of the Lip	268
12.3.4.1	Epitheliotropic T Cell Lymphoma	268
12.3.4.2	Gross Features	269
12.3.4.3	Histologic Features	269
12.3.4.4	Clinical Considerations	270
13	Lesions of the Salivary Gland	275
13.1	Introduction	275
13.2	Non-neoplastic Salivary Gland Lesions	276
13.2.1	Sialoliths	276
13.2.2	Salivary Duct Cysts	276
13.2.3	Salivary Mucocele	277
13.2.3.1	Clinical Considerations	279
13.2.4	Salivary Gland Infarction (Necrotizing Sialometaplasia)	279
13.2.4.1	Clinical Considerations	279
13.2.5	Sialoadenosis and Lipomatosis	279
13.2.5.1	Clinical Considerations	281
13.2.6	Salivary Gland Inflammation (Sialadenitis)	281
13.2.6.1	Clinical Considerations	283
13.3	Salivary Gland Neoplasia	283
13.3.1	Benign Salivary Gland Tumors	286
13.3.1.1	Pleomorphic Adenoma (Salivary Gland Mixed Tumor)	286
13.3.1.2	Oncocytoma	287
13.3.2	Malignant Salivary Gland Tumors	288
13.3.2.1	Mucoepidermoid Carcinoma	289
13.3.2.2	Acinic Cell Carcinoma	289
13.3.2.3	Basal Cell Adenocarcinoma	291
13.3.2.4	Squamous Cell Carcinoma	291
13.3.2.5	Carcinoma Ex Pleomorphic Adenoma	293

- 13.3.2.6 Adenocarcinoma, Not Otherwise Specified 293
- 13.3.2.7 Extraskelatal Osteosarcoma of the Salivary Gland 294

14 Oral Cysts 297

- 14.1 Odontogenic Cysts 297
 - 14.1.1 Clinical Features of Odontogenic Cysts 298
 - 14.1.2 Radiologic Features of Odontogenic Cysts 298
 - 14.1.3 Histologic Features of Odontogenic Cysts 298
 - 14.1.4 Dentigerous Cysts 300
 - 14.1.5 Periapical (Radicular) Cysts 301
 - 14.1.6 Canine Furcation Cysts 302
 - 14.1.7 Keratinized Odontogenic Cysts 302
 - 14.1.8 Calcifying Odontogenic Cysts 304
 - 14.1.9 Other Rare Cysts 305
 - 14.1.10 Odontogenic Cysts in Cats 307
 - 14.1.11 Treatment and Considerations for Biopsy 308
 - 14.1.12 Pathogenesis of Odontogenic Cysts 308
 - 14.1.12.1 Do Odontogenic Tumors Arise from Odontogenic Cysts? 309
- 14.2 Bone Cysts (Pseudocysts) 309
 - 14.2.1 Bone Cysts in Dogs 310
 - 14.2.2 Bone Cysts in Horses 310

15 Odontogenic Tumors 313

- 15.1 Approach to Odontogenic Neoplasms 313
 - 15.1.1 Odontogenic Epithelium 314
 - 15.1.2 Dental Follicle 315
 - 15.1.3 Dental Matrices 316
 - 15.1.4 Dental Papilla 317
 - 15.1.5 Induction 318
 - 15.1.6 Diagnosing Odontogenic Neoplasms – the Process 319
- 15.2 Tumors Composed of Odontogenic Epithelium 320
 - 15.2.1 Conventional Ameloblastoma 320
 - 15.2.1.1 Gross and Radiologic Features 321
 - 15.2.1.2 Histologic Features 322
 - 15.2.1.3 Clinical Considerations 325
 - 15.2.1.4 Odontogenic Carcinomas and Malignant Ameloblastoma 325
 - 15.2.2 Canine Acanthomatous Ameloblastoma 327
 - 15.2.2.1 Clinical Management 332
 - 15.2.3 Amyloid-producing Ameloblastoma 333
 - 15.2.3.1 Gross and Radiological Features 333
 - 15.2.3.2 Histological Features 334
 - 15.2.3.3 Clinical Considerations 338
 - 15.2.4 Squamous Odontogenic Tumor and Primary Intraosseous Carcinoma 338
- 15.3 Tumors Composed of Odontogenic Epithelium with Induction 339
 - 15.3.1 Ameloblastic Fibroma 339
 - 15.3.1.1 Clinical Considerations 343
 - 15.3.2 Ameloblastic Fibro-odontoma 344
 - 15.3.2.1 Clinical Considerations 346
 - 15.3.3 Odontoma 346
 - 15.3.3.1 Odontoma-like Lesions 351
 - 15.3.3.2 Clinical Considerations 352
 - 15.3.4 Odontoameloblastoma (Ameloblastoma Arising in Association with an Odontoma) 352

- 15.3.4.1 Clinical Considerations 354
- 15.4 Ectopic Odontogenic Tumors 355

16 Neoplasia of the Oral Soft Tissues 361

- 16.1 Melanocytic Tumors 361
 - 16.1.1 Melanosis 362
 - 16.1.2 Canine Oral Melanoma 363
 - 16.1.2.1 Histologic Features 364
 - 16.1.2.2 Diagnostic Tools 368
 - 16.1.2.3 Prognostic Tools 371
 - 16.1.3 Feline Oral Melanoma 372
 - 16.1.3.1 Clinical Considerations 373
- 16.2 Squamous Cell Carcinoma 373
 - 16.2.1 Non-tonsillar Oral SCC in Dogs 374
 - 16.2.1.1 Clinical Presentation 375
 - 16.2.1.2 Diagnostic Imaging 375
 - 16.2.1.3 Histologic Features 375
 - 16.2.1.4 Prognosis and Treatment 378
 - 16.2.2 Canine Oral Papillary SCC 378
 - 16.2.3 Non-tonsillar Oral SCC in Domestic Cats 381
 - 16.2.3.1 Clinical Considerations 386
 - 16.2.4 Oral SCC in Horses and Other Species 386
- 16.3 Oral Lymphoma 388
 - 16.3.1 Canine Oral Lymphoma 390
 - 16.3.1.1 Clinical Features 390
 - 16.3.1.2 Histologic Features 391
 - 16.3.1.3 Clinical Considerations 391
 - 16.3.2 Feline Oral Lymphoma 392
 - 16.3.3 Oral Lymphoma of Ruminants 392
- 16.4 Granular Cell Tumor 393
- 16.5 Mast Cell Tumor 394
 - 16.5.1 Clinical Considerations 397
- 16.6 Plasma Cell Tumor (Plasmacytoma) 397
- 16.7 Vascular Tumors 401
 - 16.7.1 Vascular Malformations 401
 - 16.7.2 Hemangioma 402
 - 16.7.3 Hemangiosarcoma 403
 - 16.7.3.1 Clinical Considerations 403

17 Neoplasia of the Jaw 409

- 17.1 Osteoma 409
- 17.2 Ossifying Fibroma (Cemento-ossifying Fibroma) 413
 - 17.2.1 Gross and Radiological Features 414
 - 17.2.2 Histologic Features 415
 - 17.2.3 Clinical Considerations 416
- 17.3 Maxillofacial Osteosarcoma (OSA) 416
 - 17.3.1 Tumor-associated Osteoid Matrix 418
 - 17.3.2 Central Maxillofacial OSA 419
 - 17.3.2.1 Osteosarcoma subtypes 420
 - 17.3.2.2 Central Low-grade OSA 423
 - 17.3.3 Peripheral OSA 424
 - 17.3.3.1 Parosteal OSA 424

17.3.3.2	Periosteal OSA	426
17.4	Multilobular Sarcoma of Bone	426
17.4.1	Histologic Features	428
17.5	Chondrosarcoma	430
17.6	Fibroma (Gingival Mucoperiosteal Fibroma)	434
17.7	Fibrosarcoma (FSA)	437
17.7.1	Canine Biologically High-grade/Histologically Low-grade FSA	440
17.7.2	Clinical Considerations	442
17.7.3	Oral FSA in Other Species	443
17.8	Sarcomas of Undetermined Origin	444
17.8.1	Myxoid Tumor of the Jaw (Odontogenic Myxoma)	445
17.8.1.1	Clinical Considerations	447
17.8.2	Palatal Sarcomas in Young Dogs	447
17.8.3	Rhabdomyosarcoma and Poorly Differentiated, Desmin-positive Sarcomas in Young Dogs	449
17.8.4	Feline Oral Sarcomas, NOS	451
17.8.4.1	Clinical Considerations	453
 Appendix 457		
A.1	Normal Dentition of Dogs, Cats, and Horses	457
A.2	Interpreting a Pathology Report	457
A.3	Processing Teeth Submitted as Biopsy Specimens	460
A.4	Recommended Best Practices for “Grossing” Mandibulectomy and Maxillectomy Surgical Specimens	461
A.4.1	Specimen Immobilization	465
A.4.2	Cutting Instrumentation	465
A.4.3	Orienting the Specimen	466
A.4.4	Decalcification	467
A.4.4.1	Face Decalcification of Paraffin Blocks	467
 Index 469
