Preface	xi
About the Authors	xv

SECTION 1

Taxonomic Classification of Medically Important Microorganisms **1**

General Comments	2
Taxonomic Classification of Bacteria	2
Table 1.1 Reclassification of the Former Family <i>Enterobacteriaceae</i>	10
Table 1.2 Newly Assigned Genera for Former <i>Mycobacterium</i>	11
Table 1.3 <i>Enterobacter cloacae</i> Complex Organisms	12
Table 1.4 <i>Klebsiella oxytoca</i> Complex Organisms	12
Table 1.5 Taxonomy of <i>Citrobacter freundii</i> Complex	12
Table 1.6 Taxonomy of <i>Pseudomonas fluorescens</i> Group Organisms	12
Table 1.7 Taxonomy of <i>Pseudomonas putida</i> Group Organisms	13
Table 1.8 Taxonomy of <i>Pseudomonas aeruginosa</i> Group Organisms	13
Table 1.9 Taxonomy of <i>Acinetobacter calcoaceticus-baumannii</i> Complex	13
Table 1.10 Taxonomy of <i>Burkholderia cepacia</i> Complex	13
Table 1.11 Taxonomy of Mycobacteria	14
Table 1.12 Taxonomy of the <i>Staphylococcus aureus</i> Complex	16
Table 1.13 Taxonomy of the <i>Staphylococcus intermedius</i> Group	16
Table 1.14 Taxonomy of the Viridans Group Streptococci	16
Taxonomic Classification of Human Viruses	17
Taxonomic Classification of Fungi	21
Table 1.15 Revised Species Names of Selected Clinically Relevant Fungi	22
Taxonomic Classification of Parasites	25

SECTION 2***Indigenous and Pathogenic Microbes of Humans*** **31**

General Comments	32
Table 2.1 Human Indigenous Flora	32
Table 2.2 Summary of Notifiable Infectious Diseases: United States, 2016 and 2020	43
Table 2.3 Arthropod Vectors of Medically Important Diseases	48
Table 2.4 Fungal Pathogens and Geographic Distribution	51
Table 2.5 Parasitic Pathogens and Geographic Distribution	62
Microbes Responsible for Human Disease	70

SECTION 3***Specimen Collection and Transport*** **93**

General Comments	94
Table 3.1 Bacteriology: Collection and Transport Guidelines	96
Table 3.2 Specimen Collection and Transport Guidelines for Infrequently Encountered Bacteria	114
Table 3.3 Guidelines for Collection of Specimens for Anaerobic Culture	115
Table 3.4 Possible Rejection Criteria for Specimens Submitted for Bacterial Culture	116
Virology: General Specimen Guidelines	117
Virology: Specific Specimen Guidelines	118
Table 3.5 Recommended Blood Volumes to Collect for Blood Cultures	121
Table 3.6 Mycology: Collection and Transport Guidelines	122
Table 3.7 Parasitology: Specimen Guidelines	127
Table 3.8 Guidelines for Processing Stool Specimens for Parasites	132

SECTION 4***Bacterial Diagnosis*** **135**

General Comments	136
Table 4.1 Detection Methods from Clinical Specimens for Clinically Relevant Bacteria	136
Table 4.2 Recommendations for Gram Stain from Primary Specimen and Plating Media	139
Table 4.3 Screening Specimens for Routine Bacterial Culture	143
Table 4.4 Processing Specimens for Mycobacterial Identification	144

Microscopy	144
Primary Plating Media: Bacteria	146
Primary Plating Media: Mycobacteria	159
Specific Diagnostic Tests for Pathogen Detection	161
Aerobic Gram-Positive Cocci	161
Aerobic Gram-Positive Rods	162
Acid-Fast and Partially Acid-Fast Gram-Positive Rods	164
Aerobic Gram-Negative Cocci	164
Aerobic Gram-Negative Rods	165
Anaerobic Bacteria	172
Curved and Spiral-Shaped Bacteria	173
<i>Mycoplasma</i> spp. and Obligate Intracellular Bacteria	176
Identification Tables	178

SECTION 5

***Viral Diagnosis* 217**

General Comments	218
Table 5.1 Detection Methods for Viruses	218
Table 5.2 Cells Used for Viral Isolation	220
RNA Viruses	221
DNA Viruses	229
Table 5.3 EBV Serologic Profiles Under Different Conditions	231
Table 5.4 Clinical Diseases of Parvovirus B19 and Method of Diagnosis	232
Table 5.5 Hepatitis B Virus Markers in Different Stages of Infection and Convalescence	233
Transmissible Spongiform Encephalopathies	235

SECTION 6

***Fungal Diagnosis* 237**

Mycology: Specimen Collection and Transport Guidelines	238
Table 6.1 Methods for the Identification of Fungi	240
Microscopy	240
Table 6.2 Characteristic Fungal Elements Seen by Direct Examination of Clinical Specimens	243

Primary Plating Media	246
Table 6.3 Mycology Plating Guide	249
Specific Diagnostic Tests	251
<i>Aspergillus</i> Species	251
<i>Blastomyces dermatitidis</i>	251
<i>Candida</i> Species	252
<i>Coccidioides</i> Species (Coccidioidomycosis)	252
<i>Cryptococcus neoformans</i> and <i>gattii</i> (Cryptococcosis)	253
<i>Histoplasma</i> Species	253
<i>Malassezia</i> Species	254
<i>Paracoccidioides brasiliensis</i>	254
<i>Talaromyces (Penicillium) marneffeii</i>	255
<i>Pneumocystis jirovecii</i>	255
<i>Sporothrix schenckii</i>	255
Mucormycetes (Zygomycetes)	255
Identification Tables	257

SECTION 7

Parasitic Diagnosis **271**

General Comments	272
Microscopy	272
Table 7.1 Detection Methods for Parasites	273
Specific Diagnostic Tests	277
Free-Living Amebae	277
Intestinal and Urogenital Protozoa	277
Blood and Tissue Protozoa	280
Microsporidia	282
Helminths: Nematodes	283
Helminths: Trematodes	285
Helminths: Cestodes	286
Identification Tables and Figures	287
Table 7.2 Trophozoites of Common Intestinal Amebae	287
Table 7.3 Cysts of Common Intestinal Amebae	290
Figure 7.1 Intestinal Amebae of Humans	293
Table 7.4 Trophozoites of Flagellates	294
Table 7.5 Cysts of Flagellates	296

Figure 7.2	Intestinal and Urogenital Flagellates of Humans	297
Table 7.6	Morphological Characteristics of Ciliates, Coccidia, Microsporidia, and Tissue Protozoa	298
Table 7.7	Morphological Characteristics of Protozoa Found in Blood	300
Table 7.8	Morphological Characteristics of Blood and Tissue Nematodes	302
Table 7.9	Morphological Characteristics of Helminths	303
Figure 7.3	Relative Sizes of Helminth Eggs	305

SECTION 8

Susceptibility Testing and Methods of Organism Identification 307

General Comments	308	
Susceptibility Testing Methods	308	
Table 8.1	Clinical and Laboratory Standards Institute (CLSI) Documents Related to Antimicrobial Susceptibility Testing from Humans	308
Table 8.2	Summary of CLSI Antimicrobial Susceptibility Test Methods for Select Bacteria, Mycobacteria, and Fungi	311
Antimicrobial Treatment Information	315	
Table 8.3	Organisms Included in CLSI and EUCAST Breakpoint Tables	315
Table 8.4	Guide to Interpretive Criteria for Select Organisms for Commonly Tested Antimicrobials	317
Table 8.5	Surrogate Antibiotic Susceptibility Prediction	330
Table 8.6	Routes of Administration and Drug Class for Select Antimicrobial Agents	334
Table 8.7	Routes of Administration and Drug Class for Select Antifungal Agents	337
Table 8.8	Routes of Administration and Drug Class for Select Antiparasitic Agents	338
Table 8.9	Antibacterial Agents for Specific Bacteria	339
Antimicrobial Resistance Mechanisms	345	
Table 8.10	Intrinsic Resistance of Selected Gram-Negative Bacteria	345
Table 8.11	Intrinsic Resistance of Selected Gram-Positive Bacteria	346
Table 8.12	Important Mechanisms of Multidrug Resistance in Bacteria	346

Table 8.13	Activity Profiles of Select Beta-Lactam Antibiotics Against Commonly Encountered Gram-Negative Beta-Lactamases	350
	MALDI-TOF MS and Sequencing	351
Table 8.14	Summary of MALDI-TOF MS Identification of Bacteria, Mycobacteria, and Fungi	351
Table 8.15	Gene Sequencing Targets for Organism Identification	356
	<i>Index</i>	359
