SECTION I Patient Care and Safety	1
1. Assessment	3
Obtaining Medical History and Consent	3
Verification	4
Medical History	4
Consent: Informed Consent	5
Monitoring Vital Signs	6
Patient Transfers	9
Documentation	12
Intercommunication Within Healthcare Team	13
2. Contrast Media Administration	15
Screening and Preparation	15
Contraindications	16
Necessary Lab Values	18
Premedication	19
Contrast Administration Routes	20
Contrast Administration Methods	21
Classifications	22
Water-Soluble (Iodinated) Properties	23
Barium Properties	26
Adverse Reactions	27
Adverse Reaction Classifications	27
Adverse Reaction Categories	28

Complications 29
Post-Procedure Care 31

3. Radiation Safety Considerations 33

Target Interactions 33
Photon Interactions with Matter 34
General Units of Radiation Measurement 36
CT Radiation Dosimetry (CTDI, DLP, etc.) 36
Scan Geometry 38
Imaging Parameters to Reduce Patient Exposure 39
Technologist Considerations to Reduce Patient
Exposure 43
National Guidelines and Advocacy Campaigns 46
Personnel Protection 47

SECTION II Procedural Protocols 49

4. Neuroanatomy Imaging Procedures 57

General Positioning Considerations for Head 57
Equipment Specifications for Head Protocols 57
CT Head Without (and With) Contrast 58
CT Temporal Bones/Internal Auditory Canals
(IACs) Without (or With) Contrast 61
CT Orbits Without (or With) Contrast 63
CT Sinuses Without (or With) Contrast 65
CT Facial Bones Without (or With) Contrast 67
CTA Circle of Willis (COW) 67
CTV Dural Sinuses 70
CT Brain Perfusion 70
General Positioning Considerations for Spine 74

Equipment Specifications for Spine Protocols 75
 Contrast Administration for Spine Imaging 76
 CT Cervical Spine Without (or With) Contrast 76
 CT Thoracic Spine Without (or With) Contrast 78
 CT Lumbar Spine Without (or With) Contrast 79

5. Musculoskeletal Imaging Procedures 81

General Positioning Considerations for
 Musculoskeletal 81
 Equipment Specifications for Musculoskeletal
 Protocols 82
 Contrast Administration for Musculoskeletal
 Imaging 83
 CT Shoulder and/or Scapula Without (or With)
 Contrast 84
 CT Elbow Without (or With) Contrast 84
 CT Hand/Wrist Without (or With) Contrast 87
 CT Bony Pelvis and/or Hip(s) Without (or With)
 Contrast 89
 CT Knee Without (or With) Contrast 89
 CT Ankle/Foot Without (or With) Contrast 89
 Additional Considerations for CTA/CTV of
 Extremities 93
 CTA/CTV Upper Extremity 94
 CTA/CTV Lower Extremity 94

6. Thoracic Imaging Procedures 101

General Positioning Considerations for Neck
 and Chest 101
 Equipment Specifications for Neck and Chest
 Protocols 101

Contrast Administration for Neck and Chest Imaging 102

CT Soft Tissue Neck With (or Without) Contrast 103

CTA Neck Carotid Arteries 105

CTV Neck Jugular Veins 106

CT Chest With (or Without) Contrast 108

Low-Dose CT (LDCT) Chest 108

High-Resolution CT (HRCT) Chest 111

Additional Considerations for CTA/CTV of the Chest . . . 111

Coronary Artery Calcium Score 114

CT Pulmonary Arteriography (CTPA)/ Pulmonary Embolism (PE) Study 116

CTA Chest Thoracic Aorta 118

CTV Chest Superior Vena Cava (SVC) 120

Coronary CT Angiography (CCTA) 120

CTA Transcatheter Aortic Valve Replacement (TAVR) 123

7. Abdomen and Pelvis Imaging Procedures 125

General Positioning Considerations for the Abdomen and Pelvis. 125

Equipment Specification for Abdomen and Pelvis Protocols. 125

Contrast Administration for Abdomen and Pelvis Imaging 126

CT Abdomen/Pelvis With (and/or Without) Contrast 127

CT Renal Stone Study 130

CT Kidneys (Urogram) 132

Additional Considerations for CT Angiography (CTA)/CT Venography (CTV) of the Abdomen and Pelvis 132

CTA Abdomen/Pelvis 134
 CTA GI Bleed 135
 CT Enterography 137
 CTV Abdomen/Pelvis 139

8. Additional Procedures 141

Interventional CT-Guided Procedures 141
 Coagulation Lab Work 142
 Imaging Acquisition Methods. 142
 Radiation Considerations 144
 Indications 144
 Risks and Complications 146
 Quality Control (QC) Procedures 147
 QC Team Members. 147
 QC Testing Frequency 148
 QC Records. 148
 Action Limits 150
 QC Phantom Tests and Methods 150
 Other QC Tests and Measures 155
 Preventive Maintenance 157

**SECTION III Emerging Trends and Future
 Directions in Clinical Practice 159**

9. Remote Scanning 161

Premise of Remote Scanning 161
 Personnel Roles and Responsibilities in Remote
 Scanning. 162
 Professional Society and Organizational Position
 Statements. 164
 Benefits and Opportunities 166

Safety Considerations	167
Challenges	167
Future of Remote Scanning.	169
10. Photon-Counting CT and Artificial Intelligence (AI).	171
Photon-Counting CT (PCCT)	171
Benefits and Opportunities	171
Challenges	173
Artificial Intelligence (AI).	174
Current Practices	174
Benefits and Opportunities	178
Challenges	180
