

# Contents

Preface xi

Acknowledgments: First Edition (A.L.G.) xv

Acknowledgments: Second Edition (A.L.G.) xvii

Acknowledgments: Third Edition (A.L.G. and P.K.W.) xix

- 1** The Past as Prologue 1
  - Further Reading 11
- 2** Setting the Scene 13
  - Shared Resource Laboratories 15
  - Data 16
  - Personnel 16
  - Training 17
  - Finances 19
  - Additional Thoughts 21
- 3** Instrumentation: Into the Black Box 23
  - Illumination of the Stream 24
  - Centering Cells in the Illuminating Beam:  
Hydrodynamic and Acoustic Focusing 26
  - Detection of Signals from Cells 33
  - Electronics 40
  - Further Reading 44
- 4** Information: Harnessing the Data 45
  - Data Storage 45
  - Software 48
  - Displaying Data 49

*vii*

- Analyzing Data 51
- Further Reading 60
- 5** Seeing the Light: Lasers, Fluorochromes, Mirrors, Prisms, and Filters 61
  - General Theory 61
  - Lasers 63
  - Fluorochromes 66
  - Partitioning the Signal With Lenses, Filters, Mirrors, Prisms, and Gratings 77
  - Correcting for Spectral Overlap Between Fluorochromes 82
  - Further Reading 85
- 6** Cells from Without: Leukocytes, Surface Proteins, and the Strategy of Gating 87
  - Cells from Blood 88
  - Staining for Surface Proteins 93
  - Controls 96
  - Quantification of Fluorescence Intensity 101
  - Quantification of Volume and of Cell Number 104
  - Resolution 106
  - The Strategy of Gating 107
  - Gating On Fluorescence 114
  - Further Reading 117
- 7** Cells from Within: Intracellular Proteins 119
  - Methods for Permeabilizing Cells 121
  - Examples of Intracellular Staining 123
- 8** Cells from Within: DNA in Life and Death 127
  - Fluorochromes for DNA Analysis 127
  - Ploidy 130
  - Cell Cycle Analysis 136
  - Multicolor Analysis for DNA and Another Parameter 144
  - Chromosomes 151
  - Apoptosis and Necrosis 152
  - Autophagy 159
  - Further Reading 161

- 9** Assays of Function 163
- Calcium Flux 164
  - Activation 166
  - Proliferation and Precursor Frequencies 168
  - Secretion of Soluble Analytes 171
  - Phagocytosis 173
  - Other Assays of Function 177
  - Comments 178
  - Further Reading 179
- 10** The Sorting of Cells 181
- Flow Sorting: Theory and Practice 182
  - The Purity of Sorted Cells 188
  - Efficiency and Time 190
  - The Condition of Cells After Sorting 191
  - Small Sorters, “Simple” Sorters, Do-It-Yourself  
Sorting 193
  - Other Methods for Flow Sorting 195
  - Methods for Batch Sorting 196
  - Further Reading 198
- 11** Disease and Diagnosis: The Clinical  
Laboratory 199
- Major Applications 201
  - Malaria and Flow Cytometry in the Wild 219
  - Sexing by Flow: Sorting Sperm for Good Reasons, for  
Bad Reasons, and for Profit 226
  - Comments 228
  - Further Reading 230
- 12** Out of the Mainstream: Biological Frontiers 231
- Plants and Algae 232
  - Extracellular Vesicles 239
  - Fluorescent Proteins 240
  - Molecular Biology 242
  - Comments 245
  - Further Reading 245

<b>13</b>	<b>Out of the Mainstream: Technological Frontiers</b>	<b>247</b>
	Mass Cytometers	247
	Microfluidic Cytometers	249
	Imaging Cytometers	251
	In Summary	253
	Further Reading	254
<b>14</b>	<b>Flowing On: The Future</b>	<b>255</b>
	Artificial Intelligence and Robotics?	256
	Individual or Shared?	257
	Sophisticated Cytometers or Simple Cytometers?	258
	How Many Fluorescence Parameters?	259
	The Spirit of Flow Cytometry	259
	Further Reading	260
	Selected General Resources	263
	Glossary	269
	Figure Credits	297
	Index	301
