Preface	xxv
Acknowledgments	xxvii
List of Abbreviations.....	xxviii
1 General Features and Classification of Viruses of Medical Importance	1
1.1 Introduction	1
1.2 Basic Virus Structure.....	4
1.2.1 Viral Nucleic Acids.....	4
1.2.1.1 RNA Viruses.....	4
1.2.1.2 DNA Viruses	4
1.2.2 Virus Capsids and Capsomere Proteins	6
1.2.2.1 Helical Symmetry.....	6
1.2.2.2 Icosahedral Symmetry	6
1.2.2.3 Complex Symmetry	7
1.2.3 Virus Envelope (Membrane) Protein	8
1.2.3.1 Virus Membrane Glycoprotein.....	8
1.2.3.2 Broad Functions of Viral Membrane Glycoproteins.....	9
1.2.4 Matrix Proteins (in Enveloped Viruses)	10
1.2.5 Tegument.....	10
1.3 Classification of Viruses of Medical Importance	10
1.3.1 Traditional Classification	11
1.3.1.1 Classification Based on Physicochemical Properties.....	11
1.3.1.2 Classification Based on Viral Pathogenesis.....	12
1.3.1.3 Classification Based on Serological Properties	16
1.3.1.4 Classification Based on Vector Relationship.....	16
1.3.2 Baltimore Classification.....	18
1.3.3 Classification Based on Genomic Organization and Molecular Processes	19
1.3.4 International Committee on Taxonomy of Viruses (ICTV) Classification of Viruses	19

1.4 How Will Newly Identified Viruses Be Named?	27
1.5 Study Questions.....	28
Case Study Questions.....	28
Objectives.....	30
References	31
2 Molecular Mechanisms of Virus Replication	35
2.1 Virus Attachment.....	35
2.1.1 Tissue Tropism.....	35
2.2 Entry and Uncoating.....	42
2.3 Transcription of the Viral Genome	45
2.3.1 Transcription of the Viral RNA Genome in the Cytoplasm.....	45
2.3.2 Transcription of Viral DNA in the Cytoplasm	46
2.3.3 Transcription of Some RNA Viruses (Non-retrovirus) in the Nucleus.....	47
2.3.4 Transcription of Some DNA Viruses in the Nucleus	48
2.3.5 Transcription of Retrovirus RNA.....	53
2.4 Translation and Posttranslational Modifications.....	54
2.4.1 Viral RNA Translation	54
2.4.2 Posttranslational Modifications (PTMs) of Viral Proteins.....	54
2.5 Assembly.....	58
2.5.1 Packaging of Genetic Material	58
2.5.2 Synthesis of Structural Proteins.....	58
2.5.3 Acquisition of an Envelope (If Applicable).....	59
2.6 Maturation	62
2.7 Release or Exit	63
2.7.1 Cell Lysis	63
2.7.2 Budding.....	63
2.7.3 Exocytosis.....	64
2.7.4 Syncytia Formation.....	64
2.7.5 Apoptosis-Induced Release.....	64
2.7.6 Microvesicle Release.....	64
2.8 Study Questions.....	66
Case Study	66

Objectives.....	67
References.....	67
3 Principles of Cell Biology During Virus Infections.....	74
3.1 Cell Cycle Progression During Virus Replication.....	74
3.1.1 Cell Cycle in Eukaryotes.....	74
3.1.1.1 Interphase.....	74
3.1.1.2 Mitosis.....	76
3.1.2 Virus Manipulations of the Cell Cycle Phases.....	77
3.1.2.1 Virus Preference for the G1 Phase.....	77
3.1.2.2 Virus Preference for the S and G2 Phases.....	77
3.1.2.3 Virus Preference for G2 and M Phases.....	77
3.1.2.4 Virus Preference for Nondividing Quiescent Cells.....	77
3.1.2.5 Reactivation of the Cell Cycle.....	78
3.1.3 Viral Replication and DNA Damage During the Cell Cycle.....	79
3.1.3.1 Mechanism of Virus-Induced DNA Damage.....	80
3.1.3.2 Cellular Responses to Virus-Induced DNA Damage.....	80
3.1.3.3 Viral Strategies and Countermeasures.....	81
3.2 Cellular Response to Virus-Induced Stress.....	81
3.2.1 Activation of the Unfolded Protein Response (UPR).....	81
3.2.2 Activation of Oxidative Stress Response.....	82
3.2.3 Heat Shock Response.....	84
3.2.4 Formation of Stress Granules.....	85
3.2.5 Formation of RNA Processing Bodies (P-Bodies).....	87
3.2.6 Autophagy.....	88
3.2.7 Apoptosis.....	92
3.3 Cell Trafficking Machinery and Cytoskeleton During Viral Infection.....	94
3.3.1 Trafficking Machinery During Viral Entry.....	95
3.3.2 Trafficking Machinery During Viral Replication and Assembly.....	95
3.3.3 Trafficking Machinery During Viral Protein Modification.....	96
3.3.4 Trafficking Machinery During Viral Egress and Spread.....	96
3.4 Cell Transformation and Oncogenesis.....	96
3.4.1 Integration of Viral Genome.....	97
3.4.2 Expression of Viral Oncogenes.....	97

3.4.3 Inactivation of Tumor Suppressor Genes 97
3.4.4 Alteration of Signaling Pathways 98
3.4.5 Induction of Genetic Instability and Mutation. 98
3.5 Study Questions. 99
Case Study 99
Objectives. 100
References 101

4 Overview of Viral Genetics and Evolution in Tropical Virology 107

4.1 Overview of Viral Genome Structure 107
4.1.1 Coding Regions 107
4.1.2 Noncoding Regions. 109
4.1.3 Special Features of Viral Genomic Structure 111
4.2 Genetic Basis of Emergence and Cross-Species Transmission
in Tropical Virology 112
4.3 Overview of Virus Mutation 114
4.3.1 Forms of Mutations 114
4.3.1.1 Spontaneous Mutations 114
4.3.1.2 Induced Mutations. 115
4.3.2 Types of Mutation During Virus Infection. 115
4.3.2.1 Point Mutations 115
4.3.2.2 Insertion and Deletion 116
4.3.2.3 Duplication 116
4.3.3 Medical Importance of Mutations in Virus Infections Includes 116
4.3.3.1 Role in Viral Evolution and Adaptation. 116
4.3.3.2 Role in Viral Pathogenicity 117
4.3.3.3 Role in Immune Evasion 117
4.3.3.4 Role in Drug Resistance 117
4.4 Genetic Recombination in Virus Infection 118
4.4.1 Mechanisms of Genetic Recombination in Viruses. 118
4.4.1.1 Homologous Recombination 118
4.4.1.2 Nonhomologous Recombination 118
4.4.1.3 Segmented Genome Reassortment 118

4.4.2	Importance of Genetic Recombination in Virus Replication	118
4.4.2.1	Increased Genetic Diversity	118
4.4.2.2	Emergence of New Viral Strains	118
4.4.2.3	Antigenic Shift and Drift	119
4.4.2.4	Drug Resistance	119
4.4.2.5	Altered Pathogenicity	119
4.4.2.6	Epidemiological Implications	119
4.5	Molecular Evolution of Viruses	121
4.5.1	Forms of Evolutionary Mechanisms in Viruses	122
4.5.1.1	Adaptive Evolution in Viruses	122
4.5.1.2	Neutral Evolution in Viruses	123
4.5.2	Importance of Viral Evolutionary Events	123
4.5.2.1	Molecular Clock and Viral Evolutionary Rates	123
4.5.2.2	Viral Evolutionary Rates	123
4.5.2.3	Predicting Viral Evolution and Pandemic Preparedness	123
4.5.2.4	Virus-Mediated Horizontal Gene Transfer	124
4.5.2.5	Endogenous Viral Elements in Host Genomes	124
4.6	Future Directions in Viral Genetics and Evolution	124
4.6.1	Implications of Mutation and Evolution for Viral Genetics in Vaccines, Diagnostics, and Therapeutics	124
4.6.2	CRISPR-Based Gene Editing, Diagnostics, and Therapeutics in Viral Infections	125
4.6.2.1	CRISPR-Based Diagnostics	127
4.6.2.2	CRISPR-Based Therapeutics	127
4.6.3	Synthetic Virology and Directed Evolution	128
4.7	MicroRNAs in Viral Genomes and Evolution	128
4.7.1	Classification of Small RNA	128
4.7.2	Role of Small RNA in Modulating Host Antiviral and Immune Response	132
4.7.3	Viral Evasion of the RNAi Antiviral Mechanism	133
4.8	Study Questions	133
	Case Study/Applied Questions	133
	Objectives	134
	References	135

5 Immune Response to Viral Diseases	141
5.1 Innate Immunity	141
5.1.1 Physical Barriers	142
5.1.1.1 Skin	142
5.1.1.2 Mucous Membranes	142
5.1.2 Chemical Barriers	142
5.1.2.1 Acidic pH of the Stomach	142
5.1.2.2 Tears and Saliva	143
5.1.3 Cell-Mediated Innate Immune Responses	143
5.1.3.1 NK Recognition of Virus-Infected Cells	144
5.1.3.2 Macrophages	145
5.1.3.3 Process of Phagocytosis During Viral Infection	146
5.1.4 Cytokine-Mediated Innate Immune Response	149
5.1.4.1 Interferons	149
5.1.4.2 Interleukins	153
5.1.4.3 Tumor Necrosis Factors (TNFs)	154
5.1.4.4 Chemokines	161
5.1.5 Complement System	162
5.1.5.1 Functions of the Complement System and Protein	165
5.1.5.2 Regulation of the Complement System	165
5.1.6 Acute-Phase Response	165
5.2 Adaptive Immune System	166
5.2.1 Cell-Mediated Adaptive Immunity	166
5.2.1.1 Antigen-Presenting Cells	167
5.2.2 Major Histocompatibility Complex Molecules	167
5.2.2.1 T-Cell Recognition of Peptide Antigens	169
5.2.3 Antibody-Mediated Adaptive Immunity (Humoral Immunity)	178
5.2.3.1 Antibody-Mediated Cytotoxicity	178
5.2.3.2 Subsets of Mature B Cells	179
5.2.3.3 Process of Activation and Differentiation of B Cells	179
5.3 Virus Persistence and Immune Evasion	184
5.3.1 Virus Persistence	184

5.3.2 Virus Immune Evasion	184
5.3.2.1 Viral Strategies for Evading Innate Immunity.	184
5.3.2.2 Viral Strategies for Evading Adaptive Immunity.	188
5.4 Virus-Induced Autoimmune Diseases	190
5.4.1 Mechanisms of Virus-Induced Autoimmunity	190
5.4.1.1 Molecular Mimicry	190
5.4.1.2 Bystander Activation	191
5.4.1.3 Epitope Spreading	191
5.5 Study Question.	191
Case Study Questions.	191
Objectives.	192
References	193
6 Antivirals and Vaccines	204
6.1 Antivirals	204
6.1.1 History and Development of Antiviral Agents	204
6.1.2 Mechanism of Antiviral Agents.	204
6.1.2.1 Antiviral That Targets Viral Entry.	207
6.1.2.2 Antiviral That Targets Viral Uncoating	209
6.1.2.3 Antiviral That Targets Nucleic Acid Synthesis	210
6.1.2.4 Inhibition of Viral Assembly and Release.	213
6.1.3 Combination Therapy in Viral Infections.	214
6.1.3.1 Principles of Combination Therapy.	214
6.1.3.2 Advantages and Disadvantages of Combination Therapy	214
6.1.4 Long-Acting Antiviral Drug: Overview.	215
6.1.5 Immunotherapy for Viral Diseases	217
6.2 Traditional Medicine	218
6.3 Screening for Antiviral Drugs	220
6.3.1 Preclinical Investigations	220
6.3.1.1 High-Throughput Screening (HTS)	221
6.3.1.2 Target-Based Screening	221
6.3.1.3 Cell-Based Assays.	221
6.3.1.4 Mechanism of Action Studies.	221

6.3.1.5 <i>In Vivo</i> Studies	221
6.3.2 Clinical Trials	224
6.3.2.1 Phase I Clinical Trial	224
6.3.2.2 Phase II Clinical Trial	224
6.3.2.3 Phase III Clinical Trial	224
6.3.2.4 Phase IV Clinical Trial	224
6.4 Antiviral Vaccination	224
6.4.1 Principles and Theory of Antiviral Vaccination	224
6.4.1.1 Immune Memory	224
6.4.1.2 Herd Immunity	225
6.4.2 Types of Antiviral Vaccines	225
6.4.2.1 Live Attenuated Vaccines	225
6.4.2.2 Inactivated Vaccines	225
6.4.2.3 Subunit, Recombinant, and Conjugate Vaccines	226
6.4.2.4 Messenger RNA Vaccines	226
6.4.2.5 Viral Vector Vaccines	226
6.4.3 Public Health Significance and Impact of Vaccine	226
6.4.4 Challenges in Antiviral Vaccination	226
Study Questions	228
Objectives	229

7 Organization and Safety Management in Tropical Virology Laboratory233

7.1 Organizational Management	233
7.1.1 Structural Management	233
7.1.1.1 Laboratory Hierarchical Setup	233
7.1.1.2 Departmental Divisions	233
7.1.2 Operational Management	235
7.1.2.1 Standard Operating Procedures (SOPs)	235
7.1.2.2 Quality Assurance (QA)	238
7.1.2.3 Quality Control (QC) Programs	238
7.1.2.4 Inventory Management	239
7.1.3 Human Resource Management	240

7.1.3.1	Staff Recruitment and Training	240
7.1.3.2	Workload Management	240
7.1.3.3	Performance Evaluation	241
7.1.4	Data Management and Reporting	241
7.1.4.1	Laboratory Information Management System	241
7.1.4.2	Result Reporting	242
7.1.4.3	Confidentiality	242
7.2	Personal and Laboratory Safety and Precautions	242
7.2.1	Responsibilities of the Laboratory Safety Officer	244
7.2.1.1	Developing and Implementing Safety Protocols	244
7.2.1.2	Conducting Safety Training	244
7.2.1.3	Monitoring Compliance	245
7.2.1.4	Risk Assessment and Hazard Identification	245
7.2.1.5	Incident Investigation and Reporting	247
7.2.1.6	Emergency Preparedness and Response	247
7.2.1.7	Maintenance of Safety Equipment	248
7.2.1.8	Waste Management	248
7.2.1.9	Communication and Coordination	248
7.2.1.10	Continuous Improvement	248
7.2.2	Common Causes of Possible Accidents in Virology Laboratories	248
7.2.2.1	Accidental Exposure to Sharps	248
7.2.2.2	Accidental Exposure to an Infectious Agent	249
7.2.2.3	Accidental Exposure to Chemical Agents	250
7.2.2.4	Accidental Exposure to Equipment	250
7.3	Laboratory Waste Management	251
7.3.1	General Waste	252
7.3.2	Hazardous Waste	252
7.3.3	Offensive Waste	253
7.4	Sterilization, Decontamination, and Disinfection in a Virology Laboratory	254
7.4.1	Disinfection of Laboratory Space and Surfaces	254
7.4.2	Decontamination of Liquid Biological Waste	256
7.4.2.1	Sewer Decontamination of Liquid Biological Waste	256
7.4.2.2	Chemical Decontamination of Liquid Biological Waste	256
7.4.2.3	Autoclave Sterilization of Liquid Biological Waste	257

7.4.3	Decontamination of Solid Biological Waste	257
7.4.3.1	Autoclave Sterilization of Solid Biological Waste	257
7.4.3.2	Alkaline Hydrolysis-Based Solid Tissue Digestion	258
7.4.3.3	Incineration of Solid Biological Wastes	258
7.5	Risk Assessment and Safety in the Virology Laboratory	259
7.5.1	Biosafety Level 1	259
7.5.2	Biosafety Level 2	259
7.5.3	Biosafety Level 3	260
7.5.4	Biosafety Level 4	262
7.6	Procedure for the Use of Biological Safety Cabinets (BSCs)	263
7.7	Storage of Biological Samples, Chemicals, Materials, and Apparatus	266
7.8	Study Questions	269
	Objectives	269
	References	271
8	Methods of Cell Culture and Cell Line Maintenance:	
	<i>For Resource-Limited Settings</i>	272
8.1	Types of Cell Culture	272
8.1.1	Primary Cell Culture	272
8.1.2	Secondary Cell Culture	274
8.1.3	Cell Line	274
8.1.4	Cell Strain	277
8.1.5	Stem Cells	279
8.2	Facility, Material, and Methods for Cell Culture	283
8.2.1	Laboratory Workspace	283
8.2.2	Basic Equipment and Reagents	283
8.2.2.1	Biosafety Cabinet	283
8.2.2.2	Incubators	284
8.2.2.3	Cell Culture Maintenance Medium	285
8.2.2.4	Basic Components of Culture Media	285
8.2.2.5	Preparation of Chemically Defined Culture Media Locally	290
8.2.2.6	Media Supplements	293

8.3 Cell Passage, Subculture, or Splitting	295
8.3.1 What to Consider Before Passaging Your Cells?	295
8.3.1.1 Confluency and Cell Density	295
8.3.1.2 Depletion of Medium and Nutrients.....	296
8.3.2 Subculturing of Adherent Cells.....	296
8.3.2.1 Materials for Subculturing of Adherent Cell Passage	296
8.3.2.2 Method of Subculturing Adherent Cells.....	296
8.3.3 Subculturing Suspension Cells	299
8.3.3.1 Materials for Subculturing of Suspension Cells	299
8.3.3.2 Methods of Subculturing Suspension Cells.....	301
8.4 Measuring Cell Growth and Growth Curves.....	301
8.4.1 How to Use a Hemacytometer to Count Cells	301
8.4.2 How to Calculate the Total Number of Cells Using a Hemocytometer	302
8.4.3 How to Calculate Total Cell Viability.....	303
8.5 Cryopreservation of Cells.....	303
8.5.1 Cryoprotective Agents	304
8.5.2 How to Prepare Cells for Cryopreservation	304
8.5.3 How to Recover Cryo-Freeze Cells	305
8.6 Cell Culture Contamination and Infections.....	306
8.6.1 Sources of Cell Contamination and Infections.....	306
8.6.1.1 Chemical Source of Cell Culture Contamination.....	306
8.6.1.2 Biological Source of Cell Culture Contamination	308
8.6.2 Routes of Microbial Contamination and Prevention.....	310
8.6.2.1 Nonsterile Disposable Supplies, Media, Serum, and Solutions.....	310
8.6.2.2 Airborne Particles and Aerosols	310
8.6.2.3 Prevention of Microbial Contamination of Culture Media	310
8.6.3 Cell Line Cross-Contamination in the Culture System	311
8.6.3.1 Sources of Cross-Contamination of Cell Culture	311
8.6.3.2 Prevention of Cell Culture Cross-Contamination	312
8.7 Sterility Testing for Cell Culture Contamination and Infections	312
8.7.1 Testing Methods for Detecting Bacterial and Fungal Contamination of Cell Culture	312
8.7.2 Testing Methods for Detecting Virus Contamination of Cell Culture.....	313

8.7.3 Testing Methods for Detecting Mycoplasma Contamination	313
8.7.3.1 Direct Detection of Mycoplasma Contamination	313
8.7.4 Testing Methods for Detecting Cell Line Cross-Contamination	315
8.8 Dealing with a Contaminated Cell Culture Room.	315
8.9 Curing Irreplaceable Contaminated Cell Cultures.	316
8.9.1 Curing Irreplaceable Contaminated Cell Cultures due to Microbial Infections	316
8.9.2 Curing Irreplaceable Contaminated Cell Cultures due to Cell Line Cross-Contamination	317
8.10 Study Questions.	317
Objectives.	318

10.2.2	Urban Vs. Rural Areas	456
10.2.3	Regions with Endemic Viruses	457
10.2.4	Epidemic Vs. Pandemic	458
10.3	Modes of Transmission of Viral Infections	458
10.3.1	Sexually Transmitted Viral Diseases	459
10.3.2	Fecal–Oral and Foodborne Viral Infections	460
10.3.3	Airborne and Respiratory Viral Infections	461
10.3.4	Animal-Associated (Zoonotic) Viral Infections	462
10.3.5	Vector-Borne Transmission of Virus Infections	462
10.3.5.1	Mosquitoes	463
10.3.5.2	Ticks	463
10.3.5.3	Sandflies	463
10.3.6	Vertical Transmission (Mother to Child)	464
10.4	Surveillance and Reporting of Virus Infection	464
10.4.1	Surveillance Systems	464
10.4.2	Epidemiological Methods	464
10.4.3	Environmental Monitoring	466
10.4.4	Digital and Syndromic Surveillance	466
10.4.5	Mathematical Modeling	467
10.5	Public Health Strategies for Prevention and Control of Viral Diseases	467
10.5.1	Vaccination Programs	467
10.5.2	Hygiene and Sanitation Practices	468
10.5.3	Public Awareness and Education Campaigns	469
10.5.4	Quarantine and Isolation Measures	469
10.5.5	Vector Control Programs	469
10.6	“One Health” Approach to Controlling Viral Diseases	470

10.7	Challenges in the Control of Viral Infections	471
10.7.1	Emerging and Re-emerging Viral Infections	472
10.7.2	Impact of Travel and Globalization	473
10.7.3	Antiviral Resistance and Challenges in Vaccine Development	473
10.7.4	Socioeconomic and Cultural Factors Affecting Control Measures	473
10.7.5	Climate Change and Geographical Factors	474
10.8	Global Health Initiatives	474
10.8.1	Overview of the Activities of the WHO and the National Center for Disease Control of Viral Infection Control	475
10.8.1.1	World Health Organization (WHO)	475
10.8.1.2	National Center for Disease Control (CDC)	475
10.8.2	International Collaborations and Efforts to Control Viral Outbreaks	475
10.8.2.1	Global Initiatives	475
10.8.2.2	Regional and Bilateral Collaborations	476
10.9	Viruses as Bioterrorism Agents: Implications for Biosecurity in Tropical Countries	476
10.10	Historical Outbreaks and Lessons Learned	478
10.11	Study Questions	480
	Objectives	481
