Acknowledgement	xi

PART 1 Overview

1	Preventing Cancer in Dogs and Cats: Is It Possible?	3
2	Oncogenesis	12
3	Paraneoplastic Syndromes	19
4	Practical Diagnostics	25

PART 2 Practical Therapeutics

5	Cancer Chemotherapy	33
6	Select Individual Chemotherapies	49
a)	Carboplatin	
b)	CCNU	
c)	Chlorambucil	
d)	Cyclophosphamide	
e)	Doxorubicin	
f)	L-ASPARAGINASE	
g)	Melphalan	
h)	Mitoxantrone	
i)	Satraplatin	
j)	Tanovea	
k)	Temodar	
l)	Vinblastine	
m)	Vincristine	

7	Select Multidrug Chemotherapy Protocols	65
a)	CCNU + Cyclophosphamide Combination Protocol for Canine Lymphoma	
b)	C.O.P. Protocol for Canine or Feline Lymphoma	
c)	Doxorubicin-Based Combination Protocol for Canine Lymphoma	
d)	Doxorubicin-Based Combination Protocol for Feline Lymphoma	
e)	Six Week/Truncated Doxorubicin-Based Combination Protocol for Canine Lymphoma	
8	Tumor Lysis Syndrome	74
9	Small Molecule Inhibitors	77
10	Immunotherapy	93
11	Intratumoral Injections	98
12	Repurposing Drugs in Veterinary Oncology	102
13	Diets for Cancer Treatment: Is Any Science Behind It?	111
14	Managing Chronic Pain	115

PART 3 **Common Malignancies in Small Animals**

15	The Aggressive Lymphomas and Leukemias	143
16	Indolent Lymphomas and Leukemia	155
17	Plasma Cell Neoplasm/Myeloma Related Disorders	160
18	Canine Mast Cell Tumors	164
19	Feline Mast Cell Tumors	172
20	Melanoma	178
21	Soft Tissue Sarcoma	190
22	Oral Tumors	199
23	Gastrointestinal Stromal Tumor	204
24	Apocrine Gland Anal Sac Adenocarcinoma	207
25	Splenic Nodules and Masses	213
26	Canine Splenic Stromal Cell Tumors	218
27	Primary Pulmonary Tumors	222

28	Osteosarcoma	228
29	Thyroid Carcinoma	237
30	Canine Insulinoma	243
31	Mammary Gland Tumor	248
32	Canine Urothelial Carcinoma	257
33	Hemangiosarcoma	262
34	Canine and Feline Thymic Epithelial Tumors (Thymomas and Thymic Carcinoma)	270
35	Histiocytic Sarcoma	275
	Index	279
