

Χαρακτηριστικά:

- **Part 1: Fundamentals of Medicine** covers the principles of genetics, immunology, infectious diseases, population health, oncology and pain management, along with the core principles behind clinical decision-making and good prescribing. The Immunology chapter has a new section on biologic agents to ground these therapies in basic science
- **Part 2: Emergency and Critical Care Medicine** covers poisoning and envenomation, medicine in austere environments, common presentations in acute medicine and the recognition and management of the critically ill
- **Part 3: Clinical Medicine** covers the major medical specialties, each thoroughly revised and brought fully up to date. HIV/AIDS and stroke medicine has been fully integrated into the Infectious Disease and Neurology chapters, respectively, to improve readability. The chapter on Pain, Palliative, and Supportive Care contains new guidance on the management of chronic pain
- **Clinical Examination overviews** summarise the main elements for each system; **Presenting Problems sections** provide a clear pathway for the assessment of and approach to the most common complaints in each specialty; **Practice Point summaries** detail the practical skills that medical students and resident doctors must acquire; **Emergency boxes** emphasise the core knowledge needed to manage acutely ill patients; **In Old Age, In Pregnancy, and In Adolescence boxes** highlight differences in the practice of medicine in these patient groups, and illustrate the interfaces between medical, obstetric, and paediatric services
- **Extensive illustrations** include more than 1,000 diagrams, clinical photographs, and radiology and pathology images
- **Latest radiology images** have been incorporated throughout the book, aided by a new, dedicated *Davidson's* Imaging Editor
- The **global perspective** is enhanced by an International Advisory Board of experts from 11 countries and by leading authors from around the world
- **Interactive self-assessment material** in the accompanying eBook includes more than 150 questions and answers that test your understanding of chapter key points and help you prepare for exams
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud

Περιεχόμενα:

Part 1: Fundamentals of medicine

1. Clinical decision-making
2. Clinical therapeutics and good prescribing
3. Clinical genetics

4. Clinical immunology
5. Population health and epidemiology
6. Principles of infectious disease

Part 2: Emergency and critical care medicine

7. Poisoning
8. Envenomation
9. Environmental medicine

Part 3: Clinical Medicine

10. Acute medicine and critical illness
11. Infectious disease
12. HIV infection and AIDS
13. Sexually transmitted infections
14. Clinical biochemistry and metabolic medicine
15. Nephrology and urology
16. Cardiology
17. Respiratory medicine
18. Endocrinology
19. Nutritional factors in disease
20. Diabetes mellitus
21. Gastroenterology
22. Hepatology
23. Haematology and transfusion medicine
24. Rheumatology and bone disease
25. Neurology
26. Stroke medicine
27. Medical ophthalmology
28. Medical psychiatry
29. Dermatology
30. Maternal medicine
31. Adolescent and transition medicine
32. Ageing and disease
33. Oncology
34. Pain and palliative care
35. Laboratory reference ranges
