

Χαρακτηριστικά:

- **Comprehensive coverage presents case-based examples** of the potential challenges you may face when selecting an aligner treatment option
- **Logical, atlas-style format addresses each phase of treatment**, starting with the pretreatment workup, continuing through the treatment sequence, and ending with final results and follow-up observations
- **About 3,300 clinical photographs, radiographs, and illustrations** support key concepts and demonstrate real-life examples of patient scenarios
- **International author team** includes leading experts in the field of aligner orthodontics
- **Enhanced ebook version**, *included with every new print purchase*, features e-only content, plus access to all the text, figures, and references, with the ability to search, customize content, make notes and highlights, and have content read aloud

Περιεχόμενα:

1. Exploring Aligner Biomechanics: Current Status and Future Perspectives
2. Advancements in Direct 3D-Printed Shape Memory Aligners: Current Innovations and Future Directions

Section I: Thermoformed Aligners

Treatment and Aligners

3. Bimaxillary Protrusion With Reverse Smile Line
4. Nonextraction Treatment of Class II Subdivision, Overjet
5. Combining a Herbst Appliance and Aligners in an Adolescent Patient
6. Impacted Lower Bilateral Second Premolars and Molar Crossbite Treated With Clear Aligners
7. Nonextraction With Crowding
8. Nonextraction and Uprighting of Tipped Molars
9. Nonextraction Class III Camouflage Treatment in an Adolescent Patient

Management of Deep Bites

10. Class II Division 2 With Deep Bite in an Adolescent Patient
11. Class II Division 2 and Deep Bite in an Adolescent Patient
12. Class II Division 2 With Deep Bite and Ectopic Canine
13. Treatment of Unilateral Class II With Deep Bite With In-Office Aligners
14. Deep Bite and Aligners
15. Interdisciplinary Patient With Severe Deep Bite
16. Class II Division 2 With Deep Bite
17. Maxillary Dentoalveolar Intrusion via Clear Aligner Therapy: An Orthodontic-Periodontal Approach

Management of Open Bites

- 18. Open Bite: Functional Therapy Followed by Aligners in an Adolescent Patient
- 19. Maxillary Protrusion and Open Bite
- 20. Severe Open Bite With High Mandibular Angle
- 21. Skeletal and Dental Open Bite With Crowding in an Adult Patient: A Dentoalveolar Solution
- 22. Corticotomy-Assisted Clear Aligner Treatment With Open Bite
- 23. Open Bite Midfacial Expansion With Maxillary Skeletal Expander

Management of Extraction

- 24. Biomechanics of Closing Extraction Space
- 25. Bimaxillary Protrusion and Extraction of First Premolars
- 26. Severe Crowding and Extraction of Four Premolars and Novel Staging Protocol
- 27. Maxillary Protrusion With Crowding Treated With Extractions
- 28. First Premolar Extraction Treatment With Clear Aligners
- 29. Clear Aligners and Auxiliaries in a Young Adult Patient Treated With Four Bicuspid Extractions

Dental Asymmetries and Aligners

- 30. Mandibular Asymmetry Treated With Aligners and Temporary Anchorage Devices
- 31. Class II and Dental Asymmetry
- 32. Class II With Maxillary Constriction and Crowding

Class III Malocclusion

- 33. Treatment of a Class III Subdivision Adult Patient
- 34. Class III Malocclusion Treated With Aligners
- 35. Class III Malocclusion With Anterior Crossbite and Agenesis of 12
- 36. Class III Mandibular Extraction: Hybrid Treatment, Conventional Lower Arch, and Aligner Upper Arch

Temporary Anchorage Devices With Aligners

- 37. Aligners and Palatal TADs
- 38. Aligners and Mini-Screws to Treat an Open Bite in an Adolescent Patient
- 39. Aligners and Temporary Anchorage Devices for Managing Impacted Incisor and Premolar
- 40. Class II With Deep Bite and Palatal TADs Miniscrews
- 41. Bimaxillary Protrusion Treated With Premolar Extractions Assisted With Temporary Anchorage Devices
- 42. Second Premolar Extraction and Mini Screw-Anchored Correction of Midline Discrepancy

Orthognathic Surgery and Aligners

- 43. Class III and Open Bite Treatment With Surgery First and Aligners
- 44. Mandibular Asymmetry Treated With Surgery First and Aligners
- 45. Gummy Smile Orthognathic Surgery and Aligners

- 46. Class II Division 1 Mandibular Retrognathism Treated With Surgical Mandibular Advancement
- 47. Skeletal Class III Treated With Surgery First and Aligners
- 48. Class II With Open Bite and Large Overjet Treated With Orthognathic Surgery and Aligners

Section II: Direct Printed Shape Memory Aligners

- 49. Managing Simple Problems With In-Office Aligners
- 50. Class I Crowding
- 51. Lateral Expansion of the Upper and Lower Dentition to Improve Crowding in the Anterior Teeth Without Tooth Extraction
- 52. 3D-Printed Shape Memory Aligners to Rescue Fixed Retainer Failure
- 53. Managing Crowding With Lower Incisor Extraction
- 54. Upper Incisors' Intrusion With 3D-Printed Aligners and Temporary Anchorage Devices
- 55. Retruded Mandible and Clear Aligner Treatment in Growing Patients
- 56. A Hybrid Approach for Class II Malocclusions in Growing Patients
- 57. Class I Malocclusion with Crowding solved with DPAs
- 58. Hybrid Aligner Treatment: TADs, Mesial Slider, Brackets, and Direct-Printed Aligners
