Preface xxiii

Part I The pathogenic clostridia 1

1 Taxonomic relationships among the clostridia 3

Paul A. Lawson

References 6

2 General physiological and virulence properties of the pathogenic clostridia 9

Julian I. Rood

Introduction 9

Anaerobic metabolism 9

Major clostridial diseases 10

The onset of clostridial infections 11

The key role of protein toxins in clostridial disease 11

The key role of spores in the epidemiology of clostridial disease 12

Conclusions 13

References 13

3 Brief description of animal pathogenic clostridia 15

Iman Mehdizadeh Gohari

References 21

Part II Toxins produced by the pathogenic clostridia 25

4 Toxins of histotoxic clostridia: *Clostridium chauvoei*, *Clostridium septicum*, *Clostridium novyi*, *Paraclostridium sordellii*, *Clostridium histolyticum* 27

Michel R. Popoff

Introduction 27

A – Intracellularly active toxins from histotoxic clostridia: large clostridial glucosylating toxin family 27

Structure 31

Mode of action 34

Cellular effects 37

B – Membrane-damaging toxins from histotoxic clostridia 39

1 – Cholesterol-dependent cytolysins 39

Structure of cholesterol-dependent cytolysins	40
Mode of action of cholesterol-dependent cytolysins	41
Role of cholesterol-dependent cytolysins in pathogenesis	42
2 – Heptameric β -pore-forming toxins from histotoxic clostridia	44
<i>Clostridium septicum</i> ATX, a β -PFT of aerolysin family	44
Mode of action of ATX	45
Role of ATX in pathogenesis	47
Other <i>Clostridium septicum</i> toxins	47
<i>Clostridium chauvoei</i> toxin A (CctA)	47
Mode of action of <i>Clostridium chauvoei</i> toxin A (CctA)	48
Other virulence factors of <i>Clostridium chauvoei</i> and their role in pathogenesis	49
3 – Phospholipases	50
4 – Collagenases— <i>Clostridium histolyticum</i>	51
Other <i>Paraclostridium sordellii</i> enzymes which contribute to its pathogenicity	52
References	52

5 Toxins of *Clostridium perfringens* 67

James R. Theoret, Iman Mehdizadeh Gohari, and Bruce A. McClane

Introduction 67

A-Typing toxins 67

Clostridium perfringens alpha toxin 67

Clostridium perfringens beta toxin 68

Clostridium perfringens epsilon toxin 71

Clostridium perfringens iota toxin 72

Clostridium perfringens enterotoxin 73

Clostridium perfringens necrotic enteritis beta-like toxin 74

B-Other toxins 75

Clostridium perfringens perfringolysin O 75

Clostridium perfringens toxin perfringens large (TpeL) 76

Clostridium perfringens beta 2 toxin 76

 Binary enterotoxin of *Clostridium perfringens* 77

Clostridium perfringens NetF toxin 77

References 78

6 Toxins of *Clostridioides difficile* 83

Panagiotis Papatheodorou

Introduction 83

Structure of *Clostridioides difficile* toxins 83

Receptors and cellular uptake of *Clostridioides difficile* toxins 84

Mode-of-action and pathophysiological role of *Clostridioides difficile* toxins 85

Novel anti-toxin strategies against *Clostridioides difficile* toxins 86

References 88

7 *Clostridium botulinum* and *Clostridium tetani* neurotoxins 95

Michel R. Popoff

Introduction 95

Clostridia producing *botulinum* neurotoxins 95

Morphological and cultural characteristics	95
Diversity of <i>botulinum</i> neurotoxin-producing clostridia	95
Groups of <i>botulinum</i> neurotoxin-producing clostridia	97
Group I	97
Group II	99
Group III	99
Group IV	100
Group V	100
Group VI	101
<i>Botulinum</i> neurotoxin gene homologs in other bacteria	101
Physiological properties	101
Group I (<i>Clostridium botulinum</i> A, and proteolytic type B and F strains)	101
Group II (<i>Clostridium botulinum</i> E, and glucidolytic strains of types B and F)	102
Group III (<i>Clostridium botulinum</i> C and D)	102
Group IV (<i>Clostridium botulinum</i> G, also referred as <i>Clostridium argentinense</i>)	102
Group V (Neurotoxicogenic <i>Clostridium butyricum</i>)	103
<i>Clostridium baratii</i>	103
Geographical distribution of <i>botulinum</i> neurotoxin-producing clostridia	103
<i>Clostridium botulinum</i> A and B	103
<i>Clostridium botulinum</i> type E	104
<i>Clostridium botulinum</i> types C and D	105
<i>Clostridium botulinum</i> types F and G	105
<i>Clostridium butyricum</i>	105
<i>Clostridium baratii</i>	106
<i>Botulinum</i> neurotoxin gene locus	107
Botulinum neurotoxin and associated non-toxic protein gene organization	107
Genomic localization of the <i>botulinum</i> locus	109
<i>Botulinum</i> gene diversity, and <i>botulinum</i> toxin types and subtypes	111
<i>Clostridium tetani</i>	115
Morphological, cultural, and physiological properties of <i>Clostridium tetani</i>	115
Genetic characteristics of <i>Clostridium tetani</i>	116
Tetanus neurotoxin gene locus	117
Distribution of <i>Clostridium tetani</i> in the environment	117
Structure of clostridial neurotoxins	118
Structure of <i>botulinum</i> neurotoxins and tetanus toxin	118
Structure of <i>botulinum</i> neurotoxin complexes	119
Mode of action of clostridial neurotoxins	121
Differential trafficking of BoNTs and TeNT in the host organism	121
Mechanisms of neurotransmission	124
Mechanisms of action of clostridial neurotoxins	128
Susceptibility of animal species to clostridial neurotoxins	129
Susceptibility to botulinum neurotoxins	129
Susceptibility to tetanus neurotoxin	135
C3 exoenzyme and C2 toxin	136
C3 exoenzyme	136
C3 structure	137

C3 mode of action	137
C3 cellular effects	138
C2 toxin	139
Structure of C2-I	139
Structure of C2-II and cell entry of C2-I	140
Mode of action of C2 toxin	140
Cellular effects of C2 toxin	140
Concluding remarks	141
References	141

Part III Clostridial infections of the gastrointestinal system 163

8 Diseases produced by *Clostridium perfringens* type A in animals 165

Francisco A. Uzal and Mauricio A. Navarro

Introduction 165

Yellow lamb disease 165

Introduction 165

Etiology 165

Epidemiology and clinical signs 166

Gross changes 166

Microscopic changes 166

Diagnosis 168

Prophylaxis, control, and treatment 170

Clostridium perfringens type A enteric disease in pigs 170

Etiology and epidemiology 170

Pathogenesis 170

Clinical signs and lesions 171

Diagnosis 171

Therapy and prophylaxis 171

Enteric diseases associated with *Clostridium perfringens* type A in other mammalian and avian species 171

References 172

9 Infections by *Clostridium perfringens* type B 175

Francisco A. Uzal and John S. Munday

Introduction 175

Etiology 175

Clinical signs 176

Gross changes 176

Microscopic changes 177

Diagnosis 180

Prevention and treatment 180
