

Χαρακτηριστικά:

- Provides numerous **diagnostic, treatment, and management algorithms**—ideal for assistance with navigating often-complex guidelines
- Includes guidance on **endoscopic ultrasound techniques** in the diagnosis, staging, and treatment of pancreatic lesions
- References the **leading society guidelines** throughout the text
- Discusses issues of **tumor recurrence** and long-term outcome of treatment
- Covers **key topics** such as artificial intelligence in pancreatic disease, enucleation, and minimally invasive surgical approaches—all **highly illustrated** with pathology slides, clinical photos, and easy-to-read tables
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud. Additional digital ancillary content may publish after the publication date

Περιεχόμενα:

SECTION I General Topics

1. Incidence of Pancreatic Cystic Lesions in the General Population
2. Current Guidelines in the Management of Pancreatic Cystic Lesions
3. Recommendations for Radiologic Testing and Surveillance
4. Advanced Endoscopic Ultrasound Diagnostics, Including Endomicroscopy and Molecular Analysis of Pancreatic Cystic Lesions
5. Pancreatic Cyst Fluid Analysis
6. Artificial Intelligence in the Management of Pancreatic Cystic Lesions
7. Pancreatic Cystic Lesions in the Pediatric Population
8. Surgical Approaches to the Management of Pancreatic Cystic Lesions: Drainage Versus Resection
9. Minimally Invasive Surgical Approaches in the Management of Pancreatic Cysts
- Chapter 10 Management of Peripancreatic Postoperative Fluids Collections and Pancreatic Fistulas
11. Percutaneous Management of Pancreatic Pseudocysts
12. Endoscopic Endosonography in the Diagnosis of Pancreatic Cystic Lesions
13. Enucleation of Pancreatic Cystic Neoplasms: Indications, Techniques, and Outcomes
14. Endoscopic Management of Pancreatic Cystic Lesions Including Ablation
15. Perioperative Planning for Patients With Pancreatic Cystic Lesions: Nutrition Maximization, Splenic Vaccinations, and Enhanced Recovery After Surgery Protocols
16. Management of Pancreatic Hematomas
17. Financial Implications of Pancreatic Cystic Lesions
18. Endoscopic Drainage of Benign Cystic Lesions
19. Emergent Technologies in the Management of Pancreatic Cysts

SECTION II Pancreatic Cystic Lesions With no Malignant Potential

20. Pseudocysts, Simple Cysts, Retention Cysts, and Lymphangiomas

21. Pancreatic Serous Cystadenoma

SECTION III Pancreatic Cystic Lesions With Malignant Potential

22. Mucinous Cystic Neoplasms

23. Intrapapillary Mucinous Neoplasms

24. Total Pancreatectomy Versus Selective Resections for Intraductal Papillary Mucinous Neoplasms

25. Solid Pseudopapillary Tumors of the Pancreas

26. Pancreatic Teratomas

SECTION IV Malignant Lesions With Cystic Presentations

27. Malignant Pancreatic Tumors Presenting With Cystic Appearances

28. Metastatic Disease to the Pancreas
