

Χαρακτηριστικά:

- **116 vignettes** feature a description of the patient's journey before diagnosis, the diagnostic process, and the significance of the situation to clinical professionals
- **350 full-color photos and illustrations** show the clinically diagnostic features of each lesion
- **Consistent format** provides ease of use and reference
- **Expert authorship** ensures that all information is authoritative, current, and clinically accurate
- **eBook version** — *included with print purchase* — allows you to access all of the text, figures and references, with the ability to search, customize content, make notes and highlights, and have content read aloud

Περιεχόμενα:

Section 1: Developmental Conditions/Syndromes

1. Acro-osteolysis syndrome
2. Gardner syndrome
3. Oligodontia misdiagnosed as ectodermal dysplasia
4. Plasminogen deficiency
5. White sponge nevus

Section 2: Dental Conditions

6. Fluorosis
7. Erosion secondary to bulimia

Section 3: Environmental and Trauma-Related Conditions

8. Toothbrush trauma
9. Petechial hemorrhage caused by fellatio
10. Oxycontin insufflation injury
11. Abrading the fibrin covering a non-specific ulcer
12. Traumatic ulcers related to xerostomia and candida
13. Burn caused by inhaling hashish ember
14. Graphite tattoo
15. Factitial oro-antral fistula
16. Lip burns caused by crack pipe
17. Mucosal sloughing caused by tartar-control toothpaste

Section 4: Salivary Gland – Reactive

18. Necrotizing sialometaplasia

Section 5: Infections – Bacterial

- 19. Syphilis – secondary, presenting as lymphadenopathy
- 20. Syphilis – secondary, presenting as leukoplakia

Section 6: Infections - Fungal

- 21. Candidiasis – mucosal presentations and their management
- 22. Candidiasis – severe cheilitis/lip balms
- 23. Candidiasis – perioral, due to petroleum jelly application
- 24. Candidiasis – invasive in uncontrolled diabetic with oral ulcer
- 25. Aspergillosis – patient being treated for leukemia

Section 7: Infections – Viral

- 26. Hand, foot and mouth disease mistaken for erythema multiforme
- 27. Oral HSV-1 in a leukemia patient
- 28. Oral primary herpes affecting a teenager
- 29. Herpes - recurrent intraoral infection

Section 8: Oral Manifestations of HIV Infection

- 30. Oral Kaposi sarcoma mistaken for Crohn disease
- 31. Recurrent candidiasis and Kaposi sarcoma in a previously undiagnosed HIV patient
- 32. HSV causing a persistent tongue ulcer
- 33. Oral lymphoma mimicking a pyogenic granuloma
- 34. Oral aphthous ulcers in HIV-positive patients
- 35. Oral histoplasmosis in AIDS patients
- 36. HIV-positive man with squamous cell carcinoma
- 37. Behcet syndrome in an HIV-positive man
- 38. HIV-positive man with gingival ulceration
- 39. HIV-positive man with a vascular anomaly of his lip

Section 9: Oral Precancerous Conditions – Leukoplakia and Erythroplaki

- 40. Precancerous oral lesions - three different presentations
- 41. Erythroplakia of the floor of the mouth, treated with radiation
- 42. Erythro-leukoplakia of young man's tongue

Section 10: Oral Precancerous Conditions – Proliferative Verrucous Leukoplaki

- 43. A woman with palatal erythroplakia and pharyngeal “polyps”
- 44. PVL of the mandibular ridge
- 45. PVL of a young woman's tongue
- 46. PVL of the lateral tongue of a nurse, treated as lichen planus
- 47. PVL, lichenoid, in a middle-aged man
- 48. PVL, slowly progressive in an older man
- 49. PVL, erosive, but eventually leukoplakia and carcinoma
- 50. PVL, young woman with lichenoid tongue lesions
- 51. PVL eventually transforming to verrucous carcinoma

Section 11: Oral Squamous Cell Carcinoma (SCCa)

- 52. Poorly differentiated Ca of buccal mucosa in a young woman
- 53. SCCa of tongue treated as denture sore
- 54. SCCa of gingiva arising in "lichen planus"
- 55. SCCa of gingiva mistaken for cyclosporine hyperplasia
- 56. SCCa of the lower lip in BMT patient, treated as infection
- 57. SCCa of dorsal tongue, treated as candidiasis
- 58. SCCa, large and destructive of the buccal mucosa
- 59. SCCa, due to betel quid and cigarette use in an Indian man
- 60. SCCa of the dorsal tongue. Mild dysplasia 10 years earlier.
- 61. SCCa of the tongue treated as infection over several months
- 62. SCCa of tongue thought to be due to a foreign body
- 63. SCCa, massive lesion of the lower lip. Non-treatable.
- 64. SCCa of the gingiva. Prior biopsy suggested dysplasia.
- 65. SCCa of tongue in a 36-year-old woman
- 66. SCCa mistaken for abscess in a 19-year-old male
- 67. SCCa of the cheek in a man who used alternative treatments
- 68. Verrucous Ca is managed with radiation in an older man
- 69. Verrucous Ca is seen in the initial incisional biopsy...

Section 12: Melanoma

- 70. Oral melanoma in an edentulous man

Section 13: Malignancies of Osseous Differentiation

- 71. Osteosarcoma affecting a woman with Turner syndrome
- 72. Osteosarcoma, massive, of a woman's mandible
- 73. Osteosarcoma, referred by the woman's dentist

Section 14: Hematopoietic Malignancies

- 74. Lymphoma causing palatal swelling
- 75. Lymphoma causing a posterior maxillary mass
- 76. Granulocytic sarcoma in an older man and a teenager
- 77. Multiple myeloma – presenting as tongue and eyelid nodules of amyloid
- 78. Multiple myeloma in a man with tongue and neck swelling

Section 15: Other Mesenchymal Malignancies

- 79. Synovial sarcoma in a woman treated as TMJ dysfunction

Section 16: Salivary Gland Malignancies

- 80. Mucoepidermoid carcinoma misdiagnosed as a tattoo
- 81. Mucoepidermoid carcinoma presenting as a tongue nodule
- 82. Secretory carcinoma seen as a nodule in the buccal vestibule

Section 17: Metastatic Disease

- 83. Metastatic adenocarcinoma of the colon in a denture patient
- 84. Metastatic lung carcinoma presenting as a tongue nodule
- 85. Metastatic nasopharyngeal Ca involving the brain and gingiva
- 86. Metastatic prostate carcinoma treated endodontically
- 87. Metastatic renal cell Ca presenting as a large jaw swelling
- 88. Metastatic malignant peripheral nerve sheath tumor in a boy

Section 18: Vesiculobullous Disease

- 89. Pemphigus vulgaris affecting a 15-year-old boy
- 90. Mucous membrane pemphigoid leading to blindness
- 91. Paraneoplastic pemphigoid caused by burn pit exposure
- 92. Paraneoplastic pemphigus affecting a man with lymphoma

Section 19: Immune-Mediated Disease

- 93. Geographic tongue affecting a young woman
- 94. Herpetiform aphthae and coated tongue in a young woman
- 95. Lichenoid and granulomatous stomatitis in an elderly man
- 96. Behcet syndrome in a woman with oral sores for months
- 97. Pyostomatitis vegetans presenting as painful gingival lesions
- 98. Crohn disease in a man with gingival swelling
- 99. Crohn disease in a young woman with gingival swelling
- 100. Cheilitis granulomatosa for years in a young woman
- 101. Cinnamon reaction of the tongue noted for months
- 102. Toothpaste reaction on both sides of the tongue
- 103. Drug reaction causing diffuse oral ulcers for several years
- 104. Erythema multiforme treated as oral candidiasis
- 105. Wegener granulomatosis with palatal and gingival lesions

Section 20: Oral Manifestations of Systemic Disease

- 106. Brown tumor presenting as an enlarging mandibular mass
- 107. Hypothyroidism in a girl whose teeth were not erupting
- 108. Burning mouth syndrome in a middle-aged woman

Section 21: Coincidental Cutaneous Lesions

- 109. Cutaneous sinus of dental origin on the facial skin
- 110. Recurrent basal cell carcinoma of the forehead
- 111. Basal cell carcinoma involving the forehead of a student
- 112. Pigmented basal cell carcinoma of the neck
- 113. Superficial basal cell carcinoma behind the ear
- 114. Basal cell carcinoma of the upper lip
- 115. Recurrent basal cell carcinoma of the nasal ala
- 116. Melanoma arising in a congenital melanocytic nevus
