Foreword	xv
Preface	xvii
Acknowledgment	xix
1 Definitions	1
<i>Randa A. Alfotawi</i>	
1.1 Definitions	1
1.1.1 Allografts	1
1.1.2 Alloplasts	2
1.1.3 Antibody	2
1.1.4 Antigen	2
1.1.5 Autogenous	2
1.1.6 Bone–Implant Contact (BIC)	2
1.1.7 Bioactive Material	3
1.1.8 Biodegradation	3
1.1.9 Bioengineered Graft	3
1.1.10 Bioinert Graft	3
1.1.11 Biomaterials	3
1.1.12 Biomimetic Graft	3
1.1.13 Bone Graft	4
1.1.14 Bone Remodelling	4
1.1.15 Cell Surface Markers	4
1.1.16 Composite Bone Graft	4
1.1.17 Cumulative Survival Rate (CSR)	4
1.1.18 Extracellular Matrix (ECM)	5
1.1.19 Graft	5
1.1.20 Gene Expression	5
1.1.21 Foreign Body Reaction	5
1.1.22 Flap	6
1.1.23 Immunohistochemistry	6

1.1.24	Macrophages	6
1.1.25	Osteoblasts	6
1.1.26	Osteocytes	7
1.1.27	Osteogenesis	7
1.1.28	Osteoinduction	7
1.1.29	Osteoconduction	7
1.1.30	Osteoclasts	7
1.1.31	Osteointegration Graft	8
1.1.32	Osteoid Matrix	8
1.1.33	Osteogenic Proteins	8
1.1.34	Radiostereometric Analysis	8
1.1.35	Regeneration	8
1.1.36	Regenerative Medicine	9
1.1.37	Reconstructions	9
1.1.38	Rejuvenation	9
1.1.39	Reverse Torque Test	9
1.1.40	Scaffolds	9
1.1.41	Signalling System	9
1.1.42	Tissue Engineering	10
1.1.43	Xenograft, Xenotransplantation	10
	References	10
2	Anatomical Considerations of Facial Bone Reconstruction	15
	<i>Maryam Alhindi, Mohammed Binsalah and Afnan AlJuaid</i>	
2.1	Orbital Bone Grafting	15
2.1.1	Orbital Wall Anatomy	16
2.1.2	Classification of Orbital Bone Fracture	16
2.1.3	Reconstruction of the Orbit	17
2.1.4	Complication of Orbital Reconstruction	19
2.2	Maxillary Bone Grafting	19
2.2.1	The Maxilla: Basic Anatomy	20
2.2.2	Neurovascular Considerations	20
2.2.3	The Pterygopalatine Fossa	21
2.2.4	The Maxillary Sinus	21
2.2.5	Key Considerations	21
2.2.6	Soft Tissue Considerations	22
2.2.6.1	The Buccal Fat Pad	22
2.2.6.2	Facial Expression Muscles	22
2.2.7	Surgical Approaches to the Maxilla	22
2.3	Mandibular Bone Grafting	23

2.3.1	Surgical Anatomy of the Mandible	24
2.3.2	Regional Considerations	25
2.3.2.1	Posterior Mandible	25
2.3.2.2	Anterior Mandible	25
2.3.2.3	Ramus Region	25
2.3.3	Radiographic and Surgical Planning	26
2.3.4	Graft Material Selection	26
2.3.5	Anatomically Driven Surgical Techniques	26
2.3.6	Complications and Anatomical Basis	27
2.3.7	Paediatric and Geriatric Considerations	27
2.3.8	Clinical Pearls	28
2.4	Conclusion	28
	References	28
3	Bone and Bone Substitutes Grafts Resorption Rate	35
	<i>Raniah Abdullah Al Eid</i>	
3.1	Introduction	36
3.2	Examination Techniques of Bone Healing, Remodeling, and Graft Integration	37
3.2.1	Histological and Histomorphometric	37
3.2.2	Immunohistochemistry (IHC)	37
3.2.3	Radiographic Evaluation	37
3.2.4	Microcomputed Tomography (μ CT)	38
3.3	Mechanism of Bone Graft Healing	38
3.4	Bone Remodeling	40
3.5	Types of Bone Grafts and Their Resorption Rates	41
3.5.1	Autografts	41
3.5.1.1	Source	42
3.5.1.2	Resorption Rate	43
3.5.1.3	Resorption Duration	45
3.5.1.4	Cellular and Molecular Cascades Following Bone Autograft	45
3.5.2	Allografts	47
3.5.2.1	Source	47
3.5.3	Xenografts	51
3.5.3.1	Resorption Rate and Time	52
3.5.3.2	Cellular and Molecular Cascades After Xenograft	52
3.5.4	Alloplastic Materials or Synthetic Grafts	55
3.5.4.1	Hydroxyapatite (HA)	55

3.5.4.2	Calcium Sulfate (CS)	56
3.5.4.3	Calcium Phosphate Cements (CPCs)	57
3.5.4.4	Bioactive Glass	57
3.5.4.5	Poly(Methyl Methacrylate) (PMMA) Bone Cement	58
3.5.4.6	Magnesium Barrier Membranes (NOVAMag®)	58
3.5.5	Molecular and Cellular Cascades After the Alloplast	58
3.6	Factors Influencing Resorption and Degradation	59
3.6.1	Patient-Related Factors	59
3.6.2	Material Properties	59
3.6.3	Strategies for Prolonging Structural Support	61
3.6.3.1	Utilizing Slowly Resorbing Materials	61
3.6.3.2	Adjusting Graft Size and Density	62
3.6.3.3	Surface Coatings and Modifications	62
3.6.3.4	Cross-Linking and Polymerization	62
3.6.3.5	Controlled Release Systems	62
3.6.4	Manipulating the Local Biological Environment	63
3.7	Conclusion	64
	References	64
4	Mechanism of Action of Bone Grafts	73
	<i>Paramjit Kaur Khinda</i>	
4.1	Introduction	73
4.2	Mechanism of Action of Bone Graft Materials	75
4.2.1	Osteogenesis	75
4.2.2	Growth Factor Signaling	77
4.2.3	Transcription Factors	77
4.2.4	Extracellular Matrix (ECM) Synthesis	78
4.2.5	Mineralization	78
4.2.6	Osteoinduction	78
4.2.7	Osteoconduction	80
4.3	Structural Characteristics for Osteoconduction	80
4.4	Ideal Requirements for Bone Grafts and Substitutes	81
4.5	Factors Influencing Graft Integration and Success	82
4.5.1	Biological Factors	82
4.5.2	Mechanical Factors	82
4.5.3	Patient-Specific Factors	82
4.6	Advantages and Disadvantages of Bone Grafting	82

4.7	Emerging Technologies and Advanced Grafting Materials in Bone Regeneration	83
4.8	Clinical Outcomes and Complications	84
4.9	Future Directions in Bone Graft Mechanisms	84
	References	85
5	Osteointegration	89
	<i>Randa A. Alfotawi</i>	
5.1	Introduction	90
5.2	Biological Osseointegration	90
	5.2.1 Osteogenesis and the Contact Distance	92
	5.2.2 The Effect of Loading Implant and Distance on Osseointegration	93
5.3	Materials Known to Osteointegrate	94
	5.3.1 Titanium (Ti)	94
	5.3.1.1 Surface Modification to Enhance Osteointegration	95
	5.3.1.2 Implant Modification	95
	5.3.1.3 Effect of Surface Modification on Osteointegration	98
	5.3.2 Yttria-Stabilized Tetragonal Zirconia Polycrystals (Y-TZPs)	100
	5.3.3 Polyetheretherketone (PEEK)	100
5.4	Conclusion	101
	References	101
6	Autogenous Bone Graft	107
	<i>Yaser AlNatheer and Sameh A. Seif</i>	
6.1	Introduction	108
6.2	Free Bone Graft	109
	6.2.1 Techniques	112
	6.2.1.1 The Mandibular Symphysis	112
	6.2.1.2 Ramal Bone Grafts	112
	6.2.1.3 Ilium Bone Grafts	112
6.3	Particulate Cancellous Bone Marrow Grafts (PCBM)	115
6.4	Evidence of Using Composite Bone Grafts	117
6.5	Success Rate vs Complications	119
	6.5.1 Donor Site Morbidity	119
	6.5.2 Graft Site Complications	120
6.6	Conclusion	120
	References	121

7	Allografts in Oral and Maxillofacial Reconstruction	125
	<i>Sree Lalita Kotha, Shams Altwaim and Antonio Palma</i>	
7.1	Introduction	126
7.2	History	127
7.3	Processing and Sterilization Techniques	127
7.3.1	Decreasing the Risk of Disease Transfer	128
7.3.2	Increasing the Availability of Growth Factors (Demineralization)	128
7.3.3	Decreasing the Immunogenic Reaction (Decellularization)	129
7.3.4	Enhancing the Shelf Life	129
7.4	Types of Allografts	129
7.4.1	Bone Grafts	130
7.4.1.1	Mineralized Bone Allograft	133
7.4.1.2	Demineralized Bone Matrix (DBM)	133
7.4.1.3	Extracellular Matrix (ECM)	136
7.4.1.4	Decellularized Bone Extracellular Matrix (dECM)	137
7.4.2	Cartilage Grafts	138
7.4.2.1	Osteochondral Graft	138
7.4.2.2	Cellular Cartilage	138
7.4.2.3	Cartilage ECM/Extracellular Matrix Cartilage Allograft (EMCA)	139
7.4.3	Epithelial Grafts	139
7.4.3.1	Dermal ECM (Acellular Dermal Matrix)	139
7.4.3.2	Amniotic Membrane	139
7.4.4	Other Connective Tissue Grafts	140
7.4.4.1	Fascia Lata Allograft	140
7.4.4.2	Lyophilized Dura Mater	141
7.4.5	Nerve Grafts	141
7.4.5.1	Processed Nerve Allograft	141
7.5	Advantages of Allografts	141
7.6	Limitations and Concerns	142
7.7	Future Directions	142
7.8	Conclusion	142
	References	143
8	Xenografts	149
	<i>Manju Roby Philip</i>	
8.1	Introduction	150
8.2	Types and Sources	150

8.3	Factors Affecting Selection	152
8.3.1	Type of Materials and Manufacturing	152
8.3.2	The Particle Size and Morphology	153
8.3.3	Patient Factors	153
8.4	Biodegradation	154
8.5	Uses in Maxillofacial Surgery, Outcomes, and Success Rates	154
8.5.1	Sinus Floor Augmentation	154
8.5.2	Alveolar Ridge Preservation (ARP)	155
8.5.3	Ridge Augmentation (Horizontal and Vertical)	156
8.5.4	Local Bone Defect Filling/Peri-Implant Defects	157
8.5.5	Injectable Dermal Fillers/Skin Substitutes	159
8.5.6	Reconstruction of Critical-Size Bone Defects	159
8.6	Products: Common Trade Names and Applications	161
8.7	Other Clinical Indications	163
8.8	Complications	164
8.8.1	Delayed Type of Hypersensitivity	164
8.8.2	Delayed Bone Regeneration	165
8.9	Xenografts—Ethics and Public Policy	165
8.10	Patient-Derived Xenograft Models	166
	References	168
9	Alloplastic Bone Graft	175
	<i>Randa A. Alfotawi</i>	
9.1	Introduction	175
9.2	Mineral Substitute Ceramic	177
9.2.1	Ceramic	177
9.2.1.1	Clinical Application	179
9.3	Bioactive Glass	181
9.3.1	Silica–Calcium Phosphate Composite (SCPS)	181
9.3.1.1	Clinical Application	181
9.3.2	Polymers	182
9.3.2.1	High-Density Polyethylene	182
9.3.2.2	Clinical Application	182
9.3.3	Polyetheretherketone (PEEK)	183
9.3.3.1	Clinical Application	183
9.4	Mineral Composites	184
9.4.1	Clinical Application	185
9.5	Injectable Cement	185
9.5.1	Clinical Application	186
9.6	Conclusion	186
	References	187

10 Commercially Available Graft Materials FDA Approved and the Supporting Studies	193
<i>Randa A. Alfotawi</i>	
10.1 Introduction	193
10.2 What is FDA Approved	194
10.3 Enhancing Bone Regeneration with Bioactive Material	220
10.4 Conclusion	222
References	223
11 Graft Materials Used for Facial Rejuvenation and the Evidence	229
<i>Hourya Alnofaie and Nasser Asiri</i>	
11.1 Introduction	229
11.2 Types of Alloplastic Graft Materials	231
11.2.1 Titanium	231
11.2.2 Silicone	232
11.2.3 Porous Polyethylene (PE) [Medpor]	234
11.2.4 Polyetheretherketone (PEEK)	236
11.2.5 Polymethylmethacrylate (PMMA)	238
11.2.6 Polytetrafluorethylene and Expanded Polytetrafluorethylene	239
11.2.7 Calcium Phosphate	240
11.2.8 Composite Implants	241
11.3 Conclusion	241
References	242
12 Supplementary Techniques in Bone Grafting Procedures for Jaw Bones	247
<i>Reham A.L. Jasser</i>	
12.1 Introduction	248
12.2 Platelet Concentrates	249
12.2.1 Platelet-Rich Plasma	250
12.2.1.1 Mechanism of Action	250
12.2.1.2 Clinical Applications	251
12.2.1.3 Leukocyte Platelet-Rich Fibrin	252
12.2.1.4 Advanced Platelet-Rich Fibrin	252
12.2.1.5 Injectable Platelet-Rich Fibrin	253
12.2.2 Concentrated Growth Factor	254
12.2.2.1 Mechanism of Action	254
12.2.2.2 Clinical Applications	255
12.3 Other Growth Factors	255
12.3.1 Bone Morphogenetic Proteins	256

12.3.1.1	Mechanism of Action	256
12.3.1.2	Clinical Applications	256
12.3.2	Platelet-Derived Growth Factor	257
12.3.2.1	Mechanism of Action	257
12.3.2.2	Clinical Applications	258
12.3.3	Transforming Growth Factor-Beta	258
12.3.3.1	Mechanism of Action	259
12.3.3.2	Clinical Applications	259
12.3.4	Enamel Matrix Derivatives	259
12.3.4.1	Mechanism of Action	260
12.3.4.2	Clinical Applications	260
12.4	Conclusions	260
	References	261
13	Histological Assessment of Bone Grafts and Substitute Materials Used in Bone Regeneration	277
	<i>Sundar Ramalingam, Chalini Sundar and Randa A. Alfotawi</i>	
13.1	Introduction	278
13.2	Histological Techniques in Bone Regeneration Research	279
13.2.1	Decalcified and Undecalcified Specimen Processing	279
13.2.2	Staining Techniques in Histological Assessment of Bone Regeneration	279
13.2.3	Quantitative Histology	281
13.3	Microscopy Techniques for Histological Assessment of Bone Grafts	281
