

Χαρακτηριστικά:

- **Balances essential histological information with sufficient detail** for studying histology within an evolving, systems-based health sciences curriculum
- Presents **current, evidence-based clinical content and the latest research** in a concise yet comprehensive manner, with deliberate repetition of certain content within and across multiple chapters for effective learning
- Uses a **succinct writing style with inclusive language and content**, and features new placement of figures and clinical pearls adjacent to the related text
- Provides **USMLE STEP 1-type questions** with explanations for correct and incorrect answers
- Features **hundreds of high-quality images**—including colorful photomicrographs and clear electron micrographs—and helpful tables that summarize complex information for fast, efficient review
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures, and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud

Περιεχόμενα:

1. Introduction to Histology and Basic Histological Techniques
2. Cytoplasm
3. Nucleus
4. Extracellular Matrix
5. Epithelium and Glands
6. Connective Tissue
7. Cartilage and Bone
8. Muscle
9. Nervous Tissue
10. Blood and Hemopoiesis
11. Circulatory System
12. Lymphoid (Immune) System
13. Endocrine System
14. Integument
15. Respiratory System
16. Digestive System: Oral Cavity
17. Digestive System: Alimentary Canal
18. Digestive System: Glands
19. Urinary System
20. Female Reproductive System

21. Male Reproductive System

22. Special Senses
