

Χαρακτηριστικά:

- Provides critical information to help hematologists and other clinicians become more familiar with diagnosis and treatment of immune hemolytic anemias, and develop the **rapid, informed decision-making skills** that these conditions often demand
- Includes both **foundational knowledge** and **clinical guidance** for diagnosis
- Highlights **laboratory features** of individual disease states and provides guidance on tests used to determine differential diagnoses
- Provides **recommendations for navigating difficult cases** where diagnostic testing and/or clinical presentation are unclear
- Covers **key topics** including drug-induced hemolytic anemia, suppressed erythropoiesis in HDFN, blood transfusion in autoimmune hemolytic anemias, transplantation and autoimmune hemolytic anemias, with two new chapters on monoclonal antibody therapies affecting red blood cells, and pediatric immune hemolytic anemia
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud. Additional digital ancillary content may publish after the publication date

Περιεχόμενα:

1. Historical Concepts of Immune Hemolytic Anemias
2. The Diagnosis of Hemolytic Anemia
3. Classification and Clinical Characteristics of Autoimmune Hemolytic Anemias
4. Mechanisms of Immune Hemolysis
5. Differential Diagnosis of Immune Hemolytic Anemias
6. The Serologic Investigation of Autoimmune Hemolytic Anemia
7. Specificity of Autoantibodies
8. Drug-Induced Immune Hemolytic Anemia
9. Biological (Monoclonal Antibody) Therapies Affecting Red Blood Cells
10. Unusual Aspects of Acquired Immune Hemolytic Anemias
11. Blood Transfusion in Autoimmune Hemolytic Anemias
12. Management of Autoimmune Hemolytic Anemias
13. Immune Hemolysis Associated With Transplantation
14. Hemolytic Disease of the Fetus and Newborn
15. Pediatric Immune Hemolytic Anemia
16. Hemolytic Transfusion Reactions
