Preface	xxi
----------------------	-----

Contributors	xxii
---------------------------	------

Part I: Head and Neck

1 Preoperative Considerations in Head and Neck Reconstruction	3
<i>Matthew M. Hanasono</i>	

1.1 Introduction	3	1.5 Recipient Blood Vessel Selection	6
1.2 Preoperative Evaluation	3	1.6 Anticipating Secondary Surgery	9
1.3 Imaging Studies	5	1.7 Pearls and Pitfalls	11
1.4 Flap Selection	5		

2 Scalp, Forehead, and Calvarial Reconstruction	13
<i>Detlev Erdmann, Visakha Suresh, and David Powers</i>	

2.1 Introduction	13	2.6 Vascularized Composite Allotransplantation	17
2.2 Regional Anatomy and Defect Classification	13	2.7 Calvarial Reconstruction	18
2.3 Clinical Decision-Making	14	2.8 Secondary Cranioplasty after Infection of Graft Material	18
2.4 Scalp Reconstruction	14	2.9 Complications	21
2.4.1 Primary Closure	14	2.9.1 Scalp Reconstruction	21
2.4.2 Skin Grafts	14	2.9.2 Calvarial Reconstruction	21
2.4.3 Allografts	14	2.10 Pearls and Pitfalls	21
2.4.4 Local/Regional Flaps	14		
2.4.5 Tissue Expansion	15		
2.4.6 Free Tissue Transfer	15		
2.5 Scalp Avulsion Injury and Replantation	17		

3 Tongue Reconstruction	23
<i>Edward I. Chang</i>	

3.1 Introduction	23	3.3.3 Innervation and Sensate Flap	26
3.2 Regional Anatomy	23	3.3.4 Flap Inset	26
3.3 Clinical Decision-Making	23	3.4 Complications	26
3.3.1 Partial and Hemiglossectomy Defects	24	3.5 Pearls and Pitfalls	27
3.3.2 Subtotal and Total Glossectomy Defects	25		

4	Mandible Reconstruction	28		
	<i>Jeremy C. Sinkin, Joseph J. Disa, and Evan Matros</i>			
4.1	Introduction	28	4.3.1	Anterior Mandibulectomy
4.2	Regional Anatomy and Defect Classification	28	4.4	Complications
4.3	Clinical Decision-Making	28	4.5	Pearls and Pitfalls
5	Pharyngeal and Esophageal Reconstruction	33		
	<i>Sahil K. Kapur and Jesse C. Selber</i>			
5.1	Introduction	33	5.5	Complications
5.2	Regional Anatomy	33	5.5.1	Pharyngocutaneous Fistulas
5.3	Defect Classification	33	5.5.2	Anastomotic Strictures
5.4	Clinical Decision-Making	33	5.5.3	Wound Infections
5.4.1	Flap Choices	33	5.6	Pearls and Pitfalls
6	Pedicated Flaps in Head and Neck Reconstruction	40		
	<i>Adrian S. H. Ooi and Lawrence J. Gottlieb</i>			
6.1	Introduction	40	6.5.1	Pedicated Flaps from the Region of the Head
6.2	Regional Anatomy	40	6.5.2	Pedicated Flaps from the Neck
6.3	Regional Anatomy	40	6.5.3	Pedicated Flaps from the Chest
6.4	Defect Classification	41	6.5.4	Pedicated Flaps from the Back
6.5	Clinical Decision-Making	41	6.6	Complications
7	Midfacial Reconstruction	49	6.7	Pearls and Pitfalls
	<i>Matthew M. Hanasono</i>			
7.1	Introduction	49	7.4.2	Unilateral Posterior Palatotomy
7.2	Regional Anatomy	49	7.4.3	Orbital Floor Defects
7.3	Clinical Decision-Making	50	7.4.4	Orbital Exenteration Defects
7.4	Defect Classification	51	7.5	Complications
7.4.1	Palatoalveolar Defects	51	7.6	Pearls and Pitfalls
8	Nasal Reconstruction	58		
	<i>Robert L. Walton and Brent Robinson</i>			
8.1	Introduction	58	8.3	Clinical Decision-Making
8.2	Regional Anatomy	58	8.3.1	Indications

8.3.2	Assessment of the Defect and Approach to Reconstruction.	59	8.3.8	Oral Mucosal Flaps	66
8.3.3	Reconstruction of Defects Involving the Nasal Cover	60	8.3.9	Microsurgical Reconstruction of the Nasal Lining	69
8.3.4	The Forehead Flap	63	8.3.10	Microsurgical Transfer	70
8.3.5	Nasal Defects Involving the External Cover and Underlying Cartilage/Bone Framework	64	8.3.11	Nasal Lining–Only Defects	72
8.3.6	Materials for Rigid Support	65	8.3.12	Putting It All Together	75
8.3.7	Nasal Defects Involving the External Cover, the Underlying Cartilage/Bone Framework, and the Nasal Lining	65	8.4	Pearls and Pitfalls	75
9	Eyelid Reconstruction	77			
	<i>Danielle R. Olla, Justin D. Sawyer, Michael W. Neumeister, and Miroslaw F. Stranc</i>				
9.1	Introduction	77	9.3.3	Suspension Techniques	83
9.2	Regional Anatomy	77	9.3.4	Eyelid Malposition	84
9.2.1	Preoperative Assessment	78	9.4	Complications	88
9.3	Clinical Decision-Making	80	9.5	Pearls and Pitfalls	88
9.3.1	Lower Eyelid Reconstruction	80		Acknowledgement	88
9.3.2	Upper Eyelid Reconstruction	82			
10	Skull Base Reconstruction	89			
	<i>Peter C. Neligan</i>				
10.1	Introduction	89	10.4	Complications	91
10.2	Regional Anatomy and Defect Classification	89	10.5	Conclusion	91
10.3	Clinical Decision-Making	90	10.6	Pearls and Pitfalls	92
10.3.1	Endoscopic Reconstruction	90			
11	Facial Reanimation	93			
	<i>Marissa Suchyta, Carrie E. Robertson, Elena Millesi, Elizabeth A. Bradley, Waleed Gibreel, and Samir Mardini</i>				
11.1	Introduction	93	11.5	Post-FP Synkinesis	101
11.2	Regional Anatomy and Defect Classification	93	11.6	Complications	101
11.3	Decision-Making Algorithm	93	11.6.1	Complications Related to Autologous Nerve Graft Harvest	101
11.3.1	Acute Presentation (<6 Months)	94	11.6.2	Complications Related to Babysitter Procedures	101
11.3.2	Subacute Presentation (6–27 Months)	96	11.6.3	Complications Related to Free-Functional Muscle Transfer	101
11.3.3	Late Presentation (> 27 Months or Silent EMG)	96	11.6.4	Complications Related to Labbé Procedure	101
11.4	Static Reanimation	99	11.7	Revision Surgery in Facial Reanimation	102
11.4.1	Upper Face	99			
11.4.2	Middle and Lower Face	99			

11.7.1	Weak Smile Following Babysitter Procedure and Connection of CFNGs	102	11.8	The Value of the Multidisciplinary Team in Facial Reanimation	102
11.7.2	Excessive Pull/Activation Following Gracilis Muscle Transfer	102	11.9	Pearls and Pitfalls	102
12	Facial Transplantation	105			
	<i>Rami S. Kantar, J. Rodrigo Diaz-Siso, and Eduardo D. Rodriguez</i>				
12.1	Introduction	105	12.4.1	Soft Tissue Defect Reconstruction	105
12.2	Regional Anatomy	105	12.4.2	Skeletal Tissue Defect Reconstruction	105
12.3	Defect Classification	105	12.4.3	Critical Considerations	106
12.3.1	Soft Tissue Defects and Classification	105	12.5	Complications	109
12.3.2	Skeletal Defects and Classification	105	12.6	Pearls and Pitfalls	110
12.4	Clinical Decision-Making	105			
Part II: Breast					
13	Preoperative Considerations and Algorithm in Autologous and Implant-Based Breast Reconstruction	113			
	<i>Maurice Y. Nahabedian</i>				
13.1	Introduction	113	13.3.2	Device Location	118
13.2	Principles of Patient Selection	113	13.4	Shaped versus Round Implants	119
13.2.1	Patient Selection Based on Comorbidities	114	13.5	DTI versus TE-I	119
13.2.2	Patient Selection Based on Cancer Stage	114	13.5.1	Immediate DTI	120
13.2.3	Algorithm for Autologous Reconstruction	115	13.5.2	Immediate TE-I	120
13.3	Algorithm for Prosthetic Reconstruction ...	118	13.6	Conclusion	121
13.3.1	Patient Selection	118			
14	Autologous Reconstruction in the High-BMI Patient	123			
	<i>Jasson Abraham, Reuben A. Falola, and Michel H. Saint-Cyr</i>				
14.1	Introduction	123	14.8	Goldilocks Procedure (Inferior Dermal Flap)	124
14.2	Risk Factors of Obesity	123	14.9	Abdominal-Based Flaps: TRAM, msTRAM, DIEP, SIEA	124
14.3	Preoperative Evaluation	123	14.10	Latissimus Dorsi Myocutaneous Flap	125
14.4	Massive Weight Loss Patient (50–100 + lb Weight Loss)	123	14.11	Thigh-Based Flaps: TUG, VUG, BUGs	126
14.5	Intraoperative Safety	123	14.12	Alternatives	130
14.6	Reconstructive Options	124	14.13	Conclusion	130
14.7	Oncoplastic Breast Reduction	124			

15	Autologous Reconstruction in the Thin (Low-BMI) Patient	132		
	<i>Jamie P. Levine and Jordan D. Frey</i>			
15.1	Introduction	132	15.8.1	Case 1: Deep Inferior Epigastric Perforator (DIEP) Flaps
15.2	Regional Anatomy	132	15.8.2	Case 2: Profunda Artery Perforator (PAP) Flaps
15.3	Abdominally Based Flaps	133	15.8.3	Case 3: Lateral Thigh Perforator (LTP) Flaps
15.4	Profunda Artery Perforator Flap	133	15.9	Adjunctive Techniques and Considerations .
15.5	Superior/Inferior Gluteal Artery Perforator Flaps	133	15.9.1	Recipient Site Preparation
15.6	Lateral Thigh Perforator Flap	134	15.9.2	Stacked Flap Autologous Breast Reconstruction
15.7	Transverse Upper Gracilis Flap	135	15.9.3	Autologous Fat Grafting
15.8	Clinical Decision-Making	135	15.9.4	Adjunctive Prosthetic Device Placement
			15.10	Complications
			15.11	Pearls and Pitfalls
16	Breast Reconstruction in the Irradiated Patient	144		
	<i>Kate Elzinga and Edward Buchel</i>			
16.1	Introduction	144	16.4	Considerations for Delayed Breast Reconstruction, after Radiation Therapy
16.2	Regional Anatomy	144	16.5	Balancing Procedures
16.3	Clinical Decision-Making	144	16.6	Breast Reconstruction Revisions
16.3.1	Effects of Radiation	144	16.7	Complications
16.3.2	Timing of Surgery after Radiation	145	16.7.1	Skin Necrosis
16.3.3	Breast Reconstruction and Radiation	145	16.7.2	Fat Necrosis
16.3.4	Considerations for Immediate Breast Reconstruction, Prior to Radiation Therapy	147	16.8	Pearls and Pitfalls
17	Partial Breast Reconstruction	154		
	<i>Albert Losken, Alexandra Boric, Alexandra Hart, and Moustapha Hamdi</i>			
17.1	Introduction	154	17.4	Surgical Planning
17.2	Regional Anatomy	154	17.4.1	Volume Displacement Techniques
17.3	Clinical Decision-Making	154	17.4.2	Volume Replacement Techniques
17.3.1	Indications	154	17.5	Complications
17.3.2	Timing	154	17.6	Pearls and Pitfalls
17.3.3	Margins	155		
18	Salvage Breast Reconstruction after Failed Breast Implant	161		
	<i>Summer E. Hanson and Patrick B. Garvey</i>			
18.1	Introduction	161	18.3	Clinical Decision-Making
18.2	Regional Anatomy	161	18.4	Capsular Contracture

18.5	Postmastectomy Radiation Therapy	163	18.8	Complications	165
18.6	Attempted Implant Salvage	163	18.9	Pearls and Pitfalls	165
18.7	Autologous Fat Grafting	163			
19	Correction of the Unsatisfactory Implant-Based Breast Reconstruction	167			
	<i>Mohin A. Bhadkamkar and Mark W. Clemens</i>				
19.1	Introduction	167	19.5	Soft Tissue	171
19.2	Regional Anatomy	167	19.5.1	Malposition	171
19.3	Clinical Decision-Making	168	19.5.2	Capsular Contracture	171
19.4	Complications	168	19.5.3	Volume Asymmetry and Contour Deformities	171
19.4.1	Infection	168	19.5.4	Skin Envelope	171
19.4.2	Implant Rupture or Leak	169	19.5.5	Animation Deformity	172
19.4.3	Rippling	170	19.6	Conclusion	173
19.4.4	Implant Edge Visibility	170	19.7	Pearls and Pitfalls	173
19.4.5	BIA-ALCL	170			
20	Correction of the Unsatisfactory Autologous-Based Breast Reconstruction	174			
	<i>Reuben A. Falola, Hope Shin, Abigail Rodriguez, and Michel H. Saint-Cyr</i>				
20.1	Introduction	174	20.4.2	Volume and Projection	177
20.2	Preoperative Planning	174	20.4.3	Nipple-Areolar Complex	183
20.3	Classification of Defects	174	20.5	Conclusion	185
20.4	Secondary Revisions	174	20.6	Pearls and Pitfalls	186
20.4.1	Footprint	174			
21	Prevention and Management of Complications Following Autologous Abdominal-Based Breast Reconstruction	187			
	<i>Chen Yan, Michael N. Mirzabeigi, Peter F. Koltz, and Liza C. Wu</i>				
21.1	Introduction	187	21.3.3	Wound-Healing Problems	191
21.2	Flap Complications	187	21.4	Other Complications	192
21.2.1	Flap Thrombosis	187	21.4.1	Postoperative Infection	192
21.2.2	Partial Flap Loss and Fat Necrosis	189	21.4.2	Seroma	192
21.3	Donor Site Complications	189	21.4.3	Hematoma	192
21.3.1	Hernia	189	21.4.4	Aesthetic Dissatisfaction	192
21.3.2	Abdominal Wall or Donor Site Weakness	190	21.5	Pearls and Pitfalls	193

22	Management of Venous and Arterial Compromise, Both Acute and Delayed, in Autologous Breast Reconstruction	194		
	<i>Stefan O. P. Hofer</i>			
22.1	Introduction	194	22.4.1	Acute
			22.4.2	Delayed
22.2	Classification of Vascular Compromise for Autologous Tissue Used in Breast Reconstruction	195	22.5	Soft Tissue Management in Partial Flap Compromise
22.3	Arterial Compromise	195	22.6	Total Flap Failure
22.3.1	Acute	195	22.7	Pearls and Pitfalls
22.3.2	Delayed	195		
22.4	Venous Compromise	195		
Part III: Trunk/Pelvis				
23	Sternal Wound Reconstruction	205		
	<i>David H. Song</i>			
23.1	Introduction	205		
23.2	Regional Anatomy and Defect/Disease Classification	205		
23.2.1	Functions of the Chest	205		
23.2.2	Relevant Anatomical Considerations	205		
23.2.3	Classification of Poststernotomy Wounds	205		
23.3	Clinical Decision-Making	206		
23.3.1	AMSTERDAM (Assiduous Mediastinal Sternal Debridement and Aimed			
	Management) Classification of Sternal Mediastinitis and Management	206		
	Early Sternal Dehiscence	207		
	Sterile Nonunion	207		
	Mediastinitis Reconstruction Based on AMSTERDAM Classification	207		
	Muscle Flap Options for Soft Tissue Coverage	209		
23.4	Complications	213		
23.5	Pearls and Pitfalls	213		
24	Chest Wall and Thoracic Reconstruction	215		
	<i>Shih-Heng Chen, Hung-Chi Chen, and Pedro Ciudad</i>			
24.1	Introduction	215		
24.2	Regional Anatomy and Classification of Defects/Diseases	215		
24.3	Clinical Decision-Making	215		
24.3.1	Planning of Reconstruction	215		
24.3.2	Methods	215		
24.3.3	Flaps Available for Chest Reconstruction	216		
24.3.4	Reconstruction for Specific Regions	218		
24.4	Complications	220		
24.5	Pearls and Pitfalls	221		
25	Abdominal Wall Reconstruction	223		
	<i>Eugene Park and Gregory A. Dumanian</i>			
25.1	Introduction	223		
25.2	Regional Anatomy and Defect Classification	223		
25.2.1	Regional Anatomy	223		
25.2.2	Defect Classification	224		
25.3	Clinical Decision-Making	224		

25.3.1	Incisional Hernias	224	25.5	Pearls and Pitfalls	232
25.3.2	Full-Thickness Defects	232			
25.4	Complications	232			
26	Pedicated and Free Flaps in Abdominal Wall Reconstruction	234			
	<i>Michael V. DeFazio, Sarah R. Sher, James M. Economides, Olivia A. Ford, David H. Song, and Karen K. Evans</i>				
26.1	Introduction	234	26.2.7	Defect Classification	239
26.2	Regional Anatomy	234	26.2.8	Flap Selection	240
26.2.1	Anatomical Boundaries	234	26.2.9	Regional Pedicled Flaps for AWR	240
26.2.2	Integumentary System	234	26.2.10	Free Tissue Transfer in AWR	246
26.2.3	The Musculoaponeurotic Girdle	234	26.3	Conclusion	247
26.2.4	Zones of Perfusion	236	26.4	Pearls and Pitfalls	247
26.2.5	Innervation	236			
26.2.6	Preoperative Evaluation	237			
27	Pressure Wounds: Reconstructive Techniques and Special Considerations	249			
	<i>Stefanos Boukoulas, Stephanie Nemir, Kristen A. Aliano, and Linda G. Phillips</i>				
27.1	Introduction	249	27.3.3	Operative Strategies	251
27.2	Classification	249	27.3.4	Strategies for Common Pressure Sores	252
27.3	Clinical Decision-Making	249	27.3.5	Postoperative Care	254
27.3.1	Preoperative Evaluation	249	27.4	Complications	255
27.3.2	Preoperative Optimization	251	27.5	Pearls and Pitfalls	256
28	Pelvic and Genital Reconstruction	257			
	<i>Sarah E. Hammond and Christopher J. Salgado</i>				
28.1	Introduction	257	28.5.1	Congenital	265
28.2	Female Anatomy and Physiology	257	28.5.2	Infection	265
28.2.1	Female Reconstruction	258	28.5.3	Trauma	265
28.2.2	Vulvar Reconstruction	260	28.5.4	Autoimmune	266
28.3	Vaginal Reconstruction	260	28.5.5	Cancer	266
28.4	Male Anatomy and Physiology	263	28.6	Penile Reconstruction	266
28.5	Male Reconstruction	264	28.7	Scrotal and Perineal Reconstruction	269
29	Male-to-Female Gender-Confirming Surgery	273			
	<i>Dhivya R. Srinivasa and William M. Kuzon Jr.</i>				
29.1	Introduction	273	29.1.4	Clinical Decision-Making: Facial Feminization Surgery	275
29.1.1	Gender Dysphoria	273	29.2	Thyrochondroplasty	276
29.1.2	Preoperative Evaluation	274			
29.1.3	Regional Anatomy: Facial Feminization	274			

29.2.1	Regional Anatomy: Thyrochondroplasty	276	29.4.3	Clinical Decision-Making: Pedicled Intestinal Transfer	281
29.2.2	Clinical Decision-Making: Thyrochondroplasty	276	29.5	Complications	281
29.3	“Top Surgery”: Breast Augmentation	276	29.5.1	Rectoneovaginal Fistula	281
29.3.1	Regional Anatomy: “Top” Surgery	276	29.5.2	Urethral Stricture	281
29.3.2	Clinical Decision-Making: “Top” Surgery	276	29.5.3	Flap Necrosis and Wound Complications	281
29.4	“Bottom” Surgery	276	29.5.4	Vaginal Stricture	281
29.4.1	Regional Anatomy: “Bottom” Surgery	276	29.6	Pearls and Pitfalls	282
29.4.2	Clinical Decision-Making: Penile Inversion Vagioplasty	277			

Part IV: Extremity

30	Lower Extremity Trauma: Upper and Middle Third	285			
	<i>Geoffrey G. Hallock and Joon Pio Hong</i>				
30.1	Introduction	285	30.3	Complications	290
30.2	Regional Anatomy	285	30.4	Conclusion	291
30.2.1	Vascular Anatomy	285	30.5	Pearls and Pitfalls	291
30.2.2	Local Flaps	286			
30.2.3	Free Flaps	289			
31	Lower Extremity Trauma: Foot and Ankle	293			
	<i>Fares Samra, Arash Momeni, Stephen J. Kovach, and L. Scott Levin</i>				
31.1	Introduction	293	31.3.2	Soft Tissue Defects Requiring Free Tissue Transfer	299
31.2	Regional Anatomy and Defect Classification	293	31.3.3	Bone Loss Requiring Free Tissue Transfer	299
31.2.1	Regional Anatomy	293	31.4	Complications	301
31.2.2	Defect Classification	294	31.5	Pearls and Pitfalls	302
31.3	Clinical Decision-Making	296			
31.3.1	Small Soft Tissue Defects	297			
32	Bone Loss in Lower Extremity	303			
	<i>Marco Innocenti</i>				
32.1	Introduction	303	32.3.2	Reconstruction of the Tibia	305
32.2	Regional Anatomy	303	32.3.3	Reconstruction of the Foot	307
32.3	Clinical Decision-Making	303	32.4	Pearls and Pitfalls	311
32.3.1	Reconstruction of the Femur	304			

33	Upper Extremity Soft Tissue Reconstruction in the Forearm and Hand	312		
	<i>M. Diya Sabbagh and Brian T. Carlsen</i>			
33.1	Introduction	312	33.3.3	Forearm and Elbow Reconstruction
33.2	Regional Anatomy	312	33.3.4	Hand and Fingers Reconstruction
33.2.1	The Forearm	312	33.4	Complications
33.2.2	The Hand	312	33.5	Pearls and Pitfalls
33.3	Clinical Decision-Making	315	33.5.1	Pearls
33.3.1	Wound Preparation and Debridement	315	33.5.2	Pitfalls
33.3.2	Flap Selection: General Considerations	316		
34	The Management of Upper Extremity Bone Loss	320		
	<i>Nicole A. Zelenski, Matthew L. Iorio, and Steven L. Moran</i>			
34.1	Introduction	320	34.3.1	Induced Membrane
34.2	Bone Defect < 5 cm	320	34.3.2	Bone Transport and Distraction Osteogenesis
34.2.1	Autograft	320	34.3.3	Vascularized Bone Grafting
34.2.2	Allograft	320	34.4	Clinical Decision-Making
34.2.3	Biologics	321	34.5	Complications
34.3	Bone Defect < 5 cm	321	34.6	Conclusion
35	Upper Extremity Tendon Transfer	333		
	<i>Milan Stevanovic and Frances Sharpe</i>			
35.1	Introduction	333	35.3.1	Specific Nerve Deficits
35.2	Regional Anatomy	333	35.4	Complications
35.2.1	Muscle Size and Excursion	333	35.5	Pearls and Pitfalls
35.2.2	Synergism	333		
35.3	Clinical Decision-Making	334		
36	Acute Nerve Injuries	344		
	<i>Amy M. Moore, Jonathan Dalton, and Thomas H. Tung</i>			
36.1	Introduction	344	36.3.1	Perioperative Considerations
36.2	Regional Anatomy	344	36.4	Complications
36.2.1	Injury Classification	344	36.5	Pearls and Pitfalls
36.3	Clinical Decision-Making	345		
37	Chronic Nerve Injuries	350		
	<i>Emily M. Krauss, Ida K. Fox, and Susan E. Mackinnon</i>			
37.1	Introduction	350	37.3	Clinical Decision-Making
37.2	Disease Classification	350	37.3.1	Clinical Evaluation

37.3.2	Special Tests.....	351	37.4	Complications.....	359
37.3.3	Investigations.....	351	37.5	Pearls and Pitfalls.....	360
37.3.4	Nonsurgical Interventions.....	351			
37.3.5	Surgical Interventions.....	356			
38	Thumb Reconstruction.....				361
	<i>Heather L. Baltzer and Steven L. Moran</i>				
38.1	Introduction.....	361	38.3.2	Middle Third Amputations.....	366
38.2	Regional Anatomy and Defect/Disease Classification.....	361	38.3.3	Proximal Third Injuries.....	368
38.3	Clinical Decision-Making.....	361	38.4	Complications.....	369
38.3.1	Distal Third Amputations.....	362	38.5	Pearls and Pitfalls.....	369
39	Hand and Upper Limb Replantation.....				370
	<i>S. Raja Sabapathy and Hari Venkatramani</i>				
39.1	Introduction.....	370	39.3.5	Wrist-Level Replantation.....	373
39.2	Regional Anatomy and Classification.....	370	39.3.6	Major Replantations.....	373
39.3	Clinical Decision-Making.....	370	39.3.7	Anticoagulation Protocol.....	375
39.3.1	Fingertip Replantation.....	370	39.3.8	Rehabilitation.....	375
39.3.2	Thumb Replantation.....	370	39.4	Complications.....	375
39.3.3	Digital Replantation.....	372	39.5	Pearls and Pitfalls.....	375
39.3.4	Transmetacarpal Replantation.....	372			
40	Digital Replantation.....				376
	<i>Michael S. Gart, Jason H. Ko, and John Y.S. Kim</i>				
40.1	Introduction.....	376	40.3.2	Evaluation and Preparation of the Amputated Part(s).....	377
40.2	Regional Anatomy and Defect/Disease Classification.....	376	40.3.3	Evaluation and Preparation of the Proximal Stump.....	378
40.3	Clinical Decision-Making.....	376	40.4	Complications.....	378
40.3.1	Indications for Replantation.....	376	40.5	Pearls and Pitfalls.....	378
41	Hand Transplantation.....				380
	<i>David L. Colen, Arash Momeni, and L. Scott Levin</i>				
41.1	Introduction.....	380	41.3.2	Preoperative Preparation.....	382
41.2	Regional Anatomy and Defect Classification.....	380	41.3.3	Transplantation: Technique and Protocol.....	382
41.3	Clinical Decision-Making.....	381	41.3.4	Postoperative Care.....	384
41.3.1	Patient Selection.....	381	41.4	Complications.....	384
			41.5	Pearls and Pitfalls.....	386

42	Vascular Disorders of the Hand	387		
	<i>Nikhil A. Agrawal, Hatcher G. Cox, Lawrence Colen, and William C. Pederson</i>			
42.1	Introduction and Evaluation	387	42.4	Management of Vasospastic Disorders: Surgical Sympathectomy versus Botox
42.2	Anatomy	387		389
42.3	Management	387	42.4.1	Clinical Decision-Making
42.3.1	Iatrogenic Causes of Ischemia	387	42.4.2	Treatment with Botulinum Toxin
42.3.2	Trauma	388	42.4.3	Treatment with Periarterial Sympathectomy ...
42.3.3	Intrinsic Vascular Disease	388		391
43	Tendon Repair and Reconstruction within the Hand	393		
	<i>Victor W. Wong, Paige M. Fox, and James Chang</i>			
43.1	Introduction	393	43.3.1	Acute Flexor Tendon Injury
43.2	Regional Anatomy and Defect Classification	393		394
43.3	Clinical Decision-Making	394	43.4	Complications
				397
			43.5	Pearls and Pitfalls
				398
44	Phalangeal Fractures	399		
	<i>Francisco del Piñal</i>			
44.1	Introduction	399	44.6	Fractures of the Condyle of F1 and F2
44.2	Avulsion Fractures from the Proximal Phalanx Base	399		404
44.3	Impaction Fractures of the Base of P1	399	44.7	Fractures of the Base of Middle Phalanx
44.4	Marginal Transverse Fractures of the Base of P1	400		404
44.5	Fractures of the Shaft of the Proximal Phalanx	400	44.7.1	Dorsal Fracture Dislocations
			44.7.2	Volar Fracture Dislocations
			44.7.3	Pilon Fractures
				406
			44.8	Postoperative Care
				408
45	Wrist and Distal Radius Fractures	411		
	<i>Michael S. Gart and Jason H. Ko</i>			
45.1	Introduction	411	45.3.2	Scaphoid
45.2	Regional Anatomy and Defect/Disease Classification	411		416
45.2.1	Distal Radius and Ulna	411	45.4	Complications
45.2.2	Scaphoid	412		418
45.3	Clinical Decision-Making	412	45.4.1	Distal Radius and Ulna
45.3.1	Distal Radius Fractures	414	45.4.2	Carpal Bone Fractures
				421
			45.5	Pearls and Pitfalls
				421

Part V: Lymphatics

46	The Mutilated Hand	425			
	<i>Francisco del Piñal</i>				
46.1	Introduction	425	46.5	How	430
46.2	Goal	425	46.6	Psychological Issues	433
46.3	What to Preserve	427	46.7	Aftercare	433
46.4	When	427			
47	Preoperative Considerations: Tools for Evaluating the Lymphedema Patient	440			
	<i>Peter C. Neligan and Joseph H. Dayan</i>				
47.1	Introduction	440	47.6	Bioimpedance Spectroscopy	440
47.2	Clinical History	440	47.7	Lymphoscintigraphy	440
47.3	Physical Examination	440	47.8	Fluorescent Lymphangiography	441
47.4	Limb Circumference	440	47.9	Magnetic Resonance Lymphangiography ...	441
47.5	Volumetric Measurements	440	47.10	Conclusions	441
48	Lymphedema: Pathophysiology, Evaluation, and Treatment Algorithm	443			
	<i>Catherine L. Ly, Richa Verma, Joseph H. Dayan, and Babak J. Mehrara</i>				
48.1	Introduction	443	48.3.5	Indocyanine Green Lymphangiography	445
48.2	Pathophysiology	443	48.3.6	Subjective Assessment	445
48.2.1	Interstitial Fluid Accumulation	443	48.4	Treatment	445
48.2.2	Chronic Inflammation	443	48.4.1	Conservative Management	446
48.2.3	Fibrosis and Adipose Deposition	444	48.4.2	Reductive Techniques	446
48.2.4	Hyperkeratosis	444	48.4.3	Physiologic Procedures	447
48.3	Evaluation	444	48.5	Lymphovenous Anastomosis	447
48.3.1	History and Physical Examination	444	48.6	Vascularized Lymph Node Transfer	448
48.3.2	Limb Volume Assessment	444	48.7	Conclusions	450
48.3.3	Lymphoscintigraphy	444			
48.3.4	Magnetic Resonance Angiography	445			
49	Vascularized Lymph Node Transfer for Lymphedema	452			
	<i>Olivia Ho, Joseph H. Dayan, and Ming-Huei Cheng</i>				
49.1	Introduction	452	49.2.4	Mesenteric Nodes	454
49.2	Regional Anatomy	453	49.3	Clinical Decision-Making	455
49.2.1	Submental	453	49.4	Complications	456
49.2.2	Thoracodorsal Axis	454	49.5	Pearls and Pitfalls	457
49.2.3	Omentum and Gastroepiploic Nodes	454			

50	Immediate Lymphatic Reconstruction	459		
	<i>Anna R. Johnson, Miguel G. Bravo, Jaime Pardo-Palau, and Dhruv Singhal</i>			
50.1	Introduction	459	50.2.4	Operative Considerations
			50.2.5	Intraoperative Approach
50.2	Regional Anatomy	459	50.3	Complications
50.2.1	Axillary Anatomy	459	50.4	Pearls and Pitfalls
50.2.2	Lymphatic Anatomy	459		
50.2.3	Venous Anatomy	460		
51	Management of the Severe Patient: Nonmicrovascular Surgery for Lymphedema	467		
	<i>Arin K. Greene, Håkan Brorson, and Jeremy A. Goss</i>			
51.1	Introduction	467	51.4	Complications
51.2	Regional Anatomy and Disease Classification	467	51.5	Pearls and Pitfalls
51.3	Clinical Decision-Making	467		
52	Controversies in Lymphedema Surgery	472		
	<i>Laura S. Humphries and David W. Chang</i>			
52.1	Introduction	472	52.3.4	LVA: Mechanism of Action
52.2	Regional Anatomy and Defect/Disease Classification	472	52.3.5	LVA Anastomosis Technique and LVA Patency ..
			52.3.6	LVA Efficacy
52.3	Controversies in Lymphedema	473	52.3.7	Reverse Lymph Node Mapping
52.3.1	VLNT: Mechanism of Action	473	52.4	LYMPHA Procedure
52.3.2	VLNT Donor Site Morbidity	473	52.5	Pearls and Pitfalls
52.3.3	VLNT Recipient Site Location	473		
Index				477
